

## E.I.A.R RECOMMENDATION – E.I.A.R. SUBMITTED

PL 318268-23

1. **To: Director of Planning/Assistant Director of Planning/Senior Planning Inspector/Planning Inspector**

From: Bh S.E.O.

Date: 22/11/23

☒

An EIAR is included with this appeal/application. Please recommend whether or not the EIAR complies with the requirements of Article 94 and Schedule 6 to the Planning and Development Regulations 2001, as amended/circular letter PL 1/2017

☐

The activity is/is not/may be licensable under the EPA Act 1992, as amended/Waste Management Act 1996, as amended. Please recommend whether or not the EPA should be requested to confirm the licensing status and to submit observations on the EIAR, where appropriate.

2. **To: Director of Planning/Assistant Director of Planning**  
**From:- Reporting Inspector**

In my view, the submitted EIAR:-

☐

Complies with the above requirements

☐

Does not comply with the above requirements for the reasons set out in the attached memo.

☐

I consider that further information (as set out in the attached memo) is necessary to enable the Board to determine the appeal. I recommend that this information should be requested under Section 132 of the Regulations.

In my view, the EPA should/should not be requested to confirm the licensing status and to submit observations on the EIAR, as appropriate.

Date: \_\_\_\_\_

### 3. Decision

Pursuant to Board Resolution of 2/12/2008, under Section 111 (6) (a) of the Planning and Development Act 2000, as amended, which authorised me to perform certain of its functions, I hereby

☐

agree with the above recommendation.

☐

disagree with the above recommendation for reasons set out in the attached memo.

D.O.P/A.D.P: \_\_\_\_\_ Date: \_\_\_\_\_

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture.

Another way to meet this demand is to increase the efficiency of food production. This can be done by using better farming techniques.

Both of these methods have their own problems. Increasing the amount of land used for agriculture can lead to deforestation and loss of biodiversity.

Increasing the efficiency of food production can lead to the use of more pesticides and fertilizers, which can be harmful to the environment.

One solution is to use a combination of these methods. This would involve using better farming techniques on existing farmland.

Another solution is to use more land for agriculture, but in a way that is sustainable. This would involve using techniques that protect the environment.

There are many other ways to meet the world's growing demand for food. The key is to find a way that is sustainable and that protects the environment.

One way to do this is to use more land for agriculture. This can be done by using better farming techniques.

Another way to do this is to increase the efficiency of food production. This can be done by using better farming techniques.

Both of these methods have their own problems. Increasing the amount of land used for agriculture can lead to deforestation and loss of biodiversity.
