RE: *An Coimisiún Pleanála Case No. 318802*

Dear Sirs,

In respect of the Planning Application Number as above, I and my family wish to object in the strongest terms to another infliction of yet another planning process.

It would appear that the considerable resources are such that they want and intend to wear people down, it is a form of bullying if nothing else.

Their applications have been considered in the greatest context by all sorts of government office and Courts over the years, all to nil effect. Yet, they persist in the belief that they can wear people down with power of their money, I imagine, and resources.

For obvious reasons, as will be articulated by many others, there is a very genuine and good people standing together, this being the CHASE group, who have advocated and will be advocating the meritorious reasons why this planning application should be rejected out of hand.

When I came to live and make this town my home it was desolate, grey, with no employment or employment on the verge, and now, with a bit of forethought, public engagement etc. or otherwise and, indeed, Cork County Council, it has become one of the great tourist hubs of the area. We have the Titanic Experience, Spike Island, Cobh Heritage Centre, Cobh Museum, Fota House, all within a very short proximity and more particular, the beauty of this town is it has ready access by train which opens it up to elderly and others who may not have the ready opportunity of using their own cars, it is an environmental plus for everybody and why would anybody seek to demean and lower the efforts of the local people themselves to bring a bit off job opportunity to the people of the town etc. and, indeed, the surrounding environs. The Harbour is marketed as unit of foresight and commonsense by Cork County Council and An Bord Failte.

Please, please, due consideration. Please refuse this application. There is no merit on the balance of good for the community and the community in general.

Ill-advised, ill thought out. It is not done for the benefit of the people or the environment we live but obviously there is an economic imperative for the company propelling this application and many previously. There must be an awful lot of money to be made out of waste, why otherwise would they keep throwing huge amount of money at this prospect which has been turned down on so many occasions previously for good and valid reasons.

Yours faithfully,

Charles Daly
