

Submission to An Coimisiún Pleanála
Re: Proposed Laurclavagh Renewable Energy Development (Case Ref: PA07.319307)

We, the undersigned residents, wish to formally object to the proposed Laurclavagh Wind Farm.

Declaring our Support for Community Objections

We agree with and fully support all the objections raised by the group submissions from our fellow community members.

We echo those broader community concerns such as:

- Inadequate Environmental Impact assessment on Groundwater, Karst Geology and Blasting gaps
- Biodiversity loss of local flora and fauna
- Threats to Equine Industry and horse welfare
- Residential Amenity Impacts – Noise, Vibration and Shadow Flicker
- Inadequate modelling practices in the EIAR
- Public health concerns – Sleep, health and lack of HSE consultation on the project
- Visual and Landscape intrusion
- Impacts on Recreation and Tourism
- Planning policy conflicts
- Impact on property values
- Construction Traffic impact on the L-61461
- Lack of consent and permission from landowners regarding grid connections

We incorporate them here by reference as part of our own objection to the proposed development.

We respectfully request that An Coimisiún Pleanála give full and careful consideration to the issues outlined above and, considering them, refuse this application in order to protect our community and local environment.

Thank you for your attention to our submission.

Signed,

Jamie Langan
