Re: Submission to An Bord Pleanala
Case Number ABP-319307-24

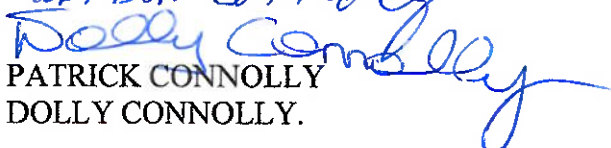

Dear Sir/Madam,

I, Patrick & Dolly Connolly of Clough, Cummer, Tuam, Co. Galway refer to the above and to yours of the 25th of November last, we note that Laurclavagh Limited have furnished significant additional information in respect of the above application.

We note that the plans and information submitted indicate that all construction traffic for the proposed development will pass over our land. It was agreed based on previous discussions and the information provided to us by representatives from the development company, that the use of the access route was limited specifically to the transfer of turbines to and from the development site. The transportation of the turbines was due to take place in the evening time over a short period of time. We were further advised that there would be separate access routes for general construction traffic associated with the development.

Please note the above and if you require any further clarification or information, please do not hesitate to contact us.

Yours faithfully

PATRICK CONNOLLY
DOLLY CONNOLLY.
