Dear Sir/Madam,

Thank you for allowing us the opportunity to make our observations/ submissions in relation to:

Case number: APB-311366-21

Planning Authority Reference Number: 20081365

Having had the opportunity to review the submission from Sheehan Planning dated 26th October 2021 on behalf of Premier Pigs Ltd. to An Bord Pleanala. We the residents of the area are of the opinion that the issue of adherence and compliance to planning has not been addressed. We want it noted that this farm was a working cattle farm used primarily for over wintering of cattle in a straw based shed until it was bought by Premier Pigs Ltd in 2017.

It would seem that a change of use from cattle class 6 to pigs would require a class 7 as per the planners report **EXD00824**.

These sheds have been dramatically altered by Premier Pigs Ltd. to include silos, slurry tank and solar panels to allow them to farm these animals without the proper planning in situé.

This piggery is having a negative impact on the lives of the residents in the vicinity. We have many concerns regarding the horrendous smell from the piggery, the massive increase in the numbers of flies now in the winter months, also some residents have complained about the increase in vermin.

We would like to see a full environmental assessment carried out to assess the impact this farm is having on our health and the environmental impact on the surrounding area to include air pollution, water pollution, and flora and fauna.

Your Sincerely,

Peg Wilson
