Re: This proposed development is for flood defences at key locations along the Carrickmines and Shanganagh rivers including new walls/raised existing walls, culverts, localised screens upgrades and localised works in the river. An Environmental Impact Assessment Report (EIAR) is submitted with application

This proposed Flood Relief Scheme for the Carrickmines-Shanganagh Rivers at sites in the townlands of Woodside, Kilgobbin, Carrickmines, Brennanstown, Shankill, Loughlinstown, Shanganagh and Hackettsland

Dear Sir / Madam,

An Bord Pleanála has received your recent submission in relation to the above mentioned proposed development and will take it into consideration in its determination of the matter.

Please note that the proposed development shall not be carried out unless the Board has approved it or approved it with conditions.

If you have any queries in relation to the matter please do not hesitate to contact the undersigned officer of the Board at laps@pleanala.ie

Please quote the above mentioned An Bord Pleanála reference number in any correspondence or telephone contact with the Board.

Yours faithfully,

Aisling Reilly
Executive Officer

FLOOD RELIEF SCHEME FOR THE CARRICKMINES AND SHANGANAGH RIVERS

21st March 2025

Bord Pleanála Case reference: JA06D.321937 This proposed development is for flood defences at key locations along the Carrickmines and Shanganagh rivers including new walls/raised existing walls, culverts, localised screens upgrades and localised works in the river.

Applicant: Dún Laoghaire-Rathdown County Council

Dear Sir/Madam,

IFI have reviewed the planning application and make the following comments for your consideration.

The proposed flood defence development is located within the Carrickmines and Shanganagh River catchments, both of which are salmonid systems. The most recent River Waterbody WFD Status 2016-2021 assigns good ecological conditions in both rivers, however excessive siltation of the substratum was observed which poses a serious threat to maintaining this status.

Some of the proposed flood defences at specific locations will require direct instream works.

Where there is a requirement to undertake instream works to facilitate the construction of flood defences, then IFI will require pre consultation prior to these works commencing, a method statement specific to the proposed works, to be approved by them and prior notification of commencement of the agreed works.

All discharges from construction sites either directly or indirectly, via the surface water storm network at all phases of the development must be compliant with the European Communities (Surface Water) Regulations 2009 and the European Communities (Groundwater) Regulations 2010.
