The proposed development will comprise:

i. Construction of 11 no. wind turbines, each with a rotor diameter of 133 m. 10 no. turbines will have a hub height of 100.5 m and a tip height of 167 m; while one turbine (T1, closest to the site entrance) will have a hub height of 81.4 m and a tip height of 147.9 m;

height of 167 m; while one turbine (T1, closest to the site entrance) will have a hub height of 81.4 m and a tip height of 147.9 m;

Construction of permanent turbine foundations and crane pad hardstanding areas and associated drainage;

Construction of 1. No. temporary site entrance (off local road L5025), and 1 no. additional site entrance (off local road L5026);

Construction of 1. No. temporary site entrance (off local road L5012) to accommodate the delivery of large turbine components;

V. Use of 1 no. existing Collite entrance (off local road L5012) for pedestrian/cyclist access to an amenity trail;

VI. Construction of 9.67 km of new internal access tracks and associated drainage infrastructure;

VII. Establishment of 2 no. temporary construction site compounds and associated ancillary infrastructure including parking;

ix. Establishment of 1 No. temporary blade set down area;

X. Construction of drainage and sediment control systems;

3 no. Watercourse Crossings;

Upgrade and extension to an existing recreation amenity trail and installation of signage, picnic tables and bicycle stands;

Il related site works and ancillary development including signage, berms, landscaping, and soil excavation;

Forestry felling (both permanent and temporary) to facilitate construction and operation

Forestry felling (both permanent and communications cabling connecting the wind turbines to the proposed Substation

All associated underground electrical and communications cabling connecting the wind turbines to the proposed Substation including the laying of underground cabling along the local road L50242 which traverses the site.

A 35-year operational life from the date of full commissioning of the entire wind farm is being sought for all works (other than temporary and permanent works specified above), and the subsequent decommissioning. The application is seeking a ten year planning permission. A separate planning application for a 110 kV onsite substation and associated 110 kV underground cabling which will loop into the 110 kV overhead line which traverses the site to facilitate the export of power from the wind farm, to the Kinnegad-Rinawade overhead line will also be lodged with An Bord Pleanála.

The Offices of An Bord Pleanála, 64 Marlborough Street, Dublin 1 (9:15am – 5:30pm, Monday to Friday). Kildare County Council, Planning Department, Áras Chil Darra, Devoy Park, Naas, Co. Kildare, W91 X77F. ation may also be viewed /dow

The implications of the proposed development for proper planning and sustainable development of the area concerned, and the likely effects on the environment of the proposed development, if carried out, and the likely effects of the proposed development on a European site, if carried out.

Any submissions/observations must be accompanied by a fee of €50 (except for certain prescribed bodies) and must be received by the Board not later than 5:30 p.m. on 14th August 2025 and must include the following information:
