Re: Proposed construction of 67 no. housing units
on a site at Tyrells Land, situated along Stradbally Road, Portlaoise, Co Laois

Dear Sir / Madam,

An Coimisiún Pleanála has received your recent submission in relation to the above mentioned proposed development and will take it into consideration in its determination of the matter.

Please note that the proposed development shall not be carried out unless the Commission has approved it with or without modifications.

If you have any queries in relation to the matter please contact the undersigned officer of the Commission at laps@pleanala.ie

Please quote the above mentioned An Coimisiún Pleanála reference number in any correspondence or telephone contact with the Commission.

Yours faithfully,

Eimear Reilly
Executive Officer

Case Reference: JP11.323606
Re: Housing Development of 67 Housing Units etc.
Applicant Response to An Coimisiún Pleanála's Comments
Location Tyrrells Land, Stradbally Road, Portlaoise, Co. Laois
Submitted via email to: laps@pleanala.ie

To whom it may concern,

Inland Fisheries Ireland (IFI) is the statutory authority tasked under section 7(1) of the Inland Fisheries Act 2010 (No. 10 of 2010) with responsibility for the protection, management, and conservation of the inland fisheries resource.

IFI's observations on the applicant's response to An Coimisiún Pleanála's comments in relation to this application are detailed below.

In their introduction, the applicant states there is no hydrological connection between the site and the Triogue River. This is incorrect. Historical six-inch and 25-inch maps show that the watercourse along the eastern boundary of the site is hydrologically connected with the Triogue_030 in the townland of Borris Great, and from there to the Barrow-Nore SAC.

Regarding the specific points raised by IFI in its submission of 24 October 2025, IFI's observations are below. Please note, the numbering used refers to IFI's submission of 24 October 2025, and is cited by the applicant in its response.

1. Noted
2. The applicant has responded to the second part of IFI's comment only. The first part related to the conclusion provided by the applicant's Flood Risk Assessment that the development will not be situated in a flood plain. IFI contend that this is not based on an assessment of the greenfield site as shown in Figure 3-5 on page 15 of the Flood Risk Assessment. IFI is not satisfied that this query has been addressed.
With regard to the proposed 400m³ of compensatory flood storage, the applicant refers to Drawing C-002 PL5. No drawing with this reference is indicated in the register of drawings provided with the application.
3. IFI's point related to the effective operation of surface water management features on the site during fluvial flood events. Lining of these feature will not address this.
4. A revised Natura Impact Statement has not been included in the Response to Submissions section for the application. Therefore, there is insufficient information for IFI to assess whether this point has been addressed.

**Iascach Iníre Éireann
Inland Fisheries Ireland**

5. IFI considers the applicant's response vague and non-committal. "Elements of this *may* be addressed" is not satisfactory given the concerns outlined above.

Responses to Points 6 -12 Noted

13. A specific reference to the document has not been provided and IFI has been unable to locate the run-off calculations.
14. As noted above in relation to point 2 above, no drawing with the reference C-020 PL5 is indicated in the register of drawings provided with the application.

Responses to Points 15 – 21 Noted

Future correspondence in respect of this application may be sent by email to environmentalplanning@fisheriesireland.ie or by post to the address below.

Yours sincerely,

Cormac Goulding
Senior Fisheries Environmental Officer
