Dear Sir / Madam,

We wish to make a number of observations regarding the above mentioned project.

- 1 The proposed turbines are huge and unsightly and will have a negative visual impact on the environment. We will be looking directly at all nine of them from behind our house, the nearest one being approx. 500meters from us.
- 2 Our house will be devalued by their presence.
- 3 We will be exposed to the constant noise and shadow flicker from these huge turbines which we fear will affect our health and wellbeing as well as that of our 20 month old daughter. Our daughters sleep will be disrupted and this may affect her growth and development.
- 4 The construction phase will cause huge disruption with heavy traffic in Charleville.
Heavy traffic will increase on the N 20 which is right outside our door.
- 5 There is a long history of flooding on to the N20 at Creggane from the river Maigue just north of our house. I fear the proposed turbines construction will add to this flooding issue and cause huge disruption to traffic on the N 20.

Thank you for your consideration of our observations,

Yours sincerely,

Morgan Lyons
