

Objection to Proposed Shancloon Wind Farm

Case Reference: 323699

To Whom It May Concern,

I am writing to formally object to the proposed Shancloon Wind Farm development near Shrule, Co. Mayo.

While I support the transition to renewable energy, I have serious concerns about the impact this project will have on the local environment and landscape.

The development site includes extensive areas of natural bogland, which are ecologically sensitive and play a vital role in carbon storage and biodiversity. The disruption of these habitats for industrial infrastructure is deeply concerning and risks long-term environmental damage.

Additionally, the visual impact of the proposed wind farm on the surrounding countryside is significant. The presence of large-scale turbines will alter the character of the landscape and diminish the natural beauty of the area, which is highly valued by residents and visitors alike.

I respectfully urge the planning authorities to give full consideration to the environmental and visual consequences of this development and to ensure that the integrity of our local landscape is preserved.

Yours sincerely,

Kieran Hastings
