Dear Sir/Madam,

I am writing to you to lodge my objection in respect of Cooloo Windfarm Development 323761.

I am writing this on behalf of my brother Sean Donoghue.

Sean is Autistic, non verbal and has sensory issues.

I am very concerned for seans future should this development go ahead. Our house will be very close to two of the proposed turbines being turbine 4, 5 and 8.

As the below letter from Sean's GP states, he is very sensitive to loud noises and persistent noise. I would also be very worried about any shadow flickering from the proposed turbines because as you can see below from the report Sean is also epileptic.

Myself and Sean walk this road daily as part of his daily routine. I feel that this is simply not going to be an option once this development goes ahead due to the reasons mentioned above and below.

If you need any further information in respect to this document please let me know.

Regards

Brian Donoghue
