Bruff Co Limerick

V35 RK51

To whom it may concern I Colette Butler write in connection with the above listed planning application at Ballincurra, Ballingayrou, Ballinlee North & South, Ballinrea, Ballyreesode, Camass North & South, Carrigeen, Knockuregare, Ballybane and other townlands in County Limerick

I recognise the importance of wind energy in meeting Irelands National renewable energy targets and addressing climate change. However, this development is unsuitable for this location and fails to take proper account of the environmental, social and cultural impacts on the local area.

This wind farm would permanently alter the rural character of the character of the area and expose nearby residents to health and amenity risks, devalue local properties and threaten the long term sustainability of our community. For these reasons i ask that the Board refuse planning permission

Some of my individual concerns are as follows

As a member of the Bruff community and a parent of 4 children living a few kms from the proposed wind turbines, I strenuously object to this development

From the widespread visual change to the rural landscape to the prolonged traffic disruption, i would like to see a detailed traffic management plan , pre construction being

made with Limerick County Council and it being made available for public review before any work commences

My wish for my 4 children is for them to remain living in the present environment now and into the future but this proposed development could when they decide to build their own homes put planning permission at risk for them, this cannot be allowed to happen

I strongly urge that this development be rejected for the reasons outlined

Regards

Colette Butler
