16<sup>th</sup> November, 2025

**Re: 10 year planning permission for Ballinlee Wind Farm consisting of 17 no. wind turbines, a permanent 110kV substation and ancillary development. Located in Ballincurra, Ballingayroure, Ballinlee North & South, Ballinrea, Ballyreesode, Camas North & South, Carrigeen, Knockuregare, Ballybane and other townlands in County Limerick.**

To Whom It May Concern,

I Denise Donworth, write in connection with the above listed planning application at Ballincurra, Ballingayroure, Ballinlee North & South, Ballinrea, Ballyreesode, Camas North & South, Carrigeen, Knockuregare, Ballybane and other townlands in County Limerick.

I wish to object strongly to this proposal and ask that the Board refuse planning permission.

Some of my summarised observations and concerns are as follows:

My home has a view west across the vale and these industrial machines will destroy that view.

I will be very badly impacted by shadow flicker and the entire development is the south and west of me and we were not considered in the shadow flicker study.

Many of my neighbours and friends who are closer to the wind park are deeply concerned about the noise and health effects of the wind turbines.

As a community we are opposed to this invasion of our quiet place.

As parent I hope that our children will settle here and I am very concerned that the planning restrictions being imposed by the developer will prevent my children from building their own homes.

I am concerned about the inevitable devaluation of our property value. The developer says this will not be the case but we have learned that it is.

I strongly urge that this development be rejected for the reasons outlined above.

I request that for an Oral Hearing in relation to this wind farm application, for the reasons outlined above. In particular the proximity and impact this will have on Lough Gur, an architectural and archaeological site of international importance, and the impact on our Golden Vale's High Value Landscape. Furthermore the scale of the project and the pattern of population distribution which will have widespread impact on our local community.

Kind Regards,

Name: Denise Donworth
