Objection to Proposed Wind Turbine Development PAX91.323780

I wish to submit a formal objection to the proposed wind turbine project in our local area.

Environmental Risks: The construction will endanger local wildlife habitats and may lead to contamination of farmland and water.

Impact on Local Agriculture: The visual, noise, and shadow effects will negatively impact the productivity and quality of life for local agricultural families.

Community Wellbeing: The presence of large turbines will affect the rural character of our area and create challenges for residents, particularly children and individuals with autism who are sensitive to such stimuli.

Planning Restrictions on Local Families: This proposal will also place unfair planning restrictions on local families and landowners, limiting their ability to develop or improve their own properties in the future. Such restrictions are unreasonable and will directly harm those who have lived and worked in this community for generations.

Our community strongly believes that renewable energy projects should not come at the expense of environmental integrity, family livelihoods, or residents' welfare. We therefore urge the council to reject this proposal.
