Reference number: PAX91.323780

Dear Members of the Council,

As lifelong residents of this area, we feel compelled to voice our strong objection to the planned installation of wind turbines near our homes and farmland.

This proposal is not just about energy infrastructure—it's about the future of our community and the protection of the local environment that sustains us. Our fields, our wildlife, and our way of life are all at risk if this development goes ahead.

We are deeply worried about the impact these massive structures will have on our local habitat and the hardworking agricultural families who depend on the land. Beyond this, we are particularly concerned for the wellbeing of local children, including those who live with autism and sensory sensitivities, who may find the noise and visual disturbance extremely distressing.

We stand together as a community that values progress, but not at the cost of our environment or our families' health and peace of mind. We urge you to listen to the local voices who will be directly affected and to protect the rural heritage that makes this place so special.

Thank you for your time and understanding.

Mary McEniry O Riordan
