Co Limerick

Observations on proposed Planning for development of Windfarm.

I strongly object to this development on the following grounds

- 1. We live in a historic area close to lough Gur with ancient remains and a huge tourist appeal. Such a development will destroy our appeal as a rural haven for tourism and also destroy the historical appeal for the generations to come.**
- 2. It will devalue our lands and our young people who may wish to live in this area will not be able to build or get planning permission.**
- 3. This will have a huge environmental impact on this area and will destroy many habitats.**
- 4. The noise and flicker impact will be very difficult to live with and is going to be very difficult for people with autism.**
- 5. It will be detrimental for small local businesses who depend on easy access. The traffic and concrete trucks etc. on the roads will be difficult to deal with and the dust and noise involved will make it impossible to have local businesses that depend on tourists and visitors to the area.**
