Re: 10-year planning permission for Ballinlee Wind Farm consisting of 17 no. wind turbines, a permanent 110kV substation, underground electric cabling systems between the wind farm site and connection point at existing Killonan 220/110kV substation, and ancillary development. Located in Ballincurra, Ballingayrou, Ballinlee North & South, Ballinrea, Ballyreesode, Camas North & South, Carrigeen, Knockuregare, Ballybane and other townlands in County Limerick.

To Whom It May Concern,

I Philomena Madden write in connection with the above listed planning application at Ballincurra, Ballingayrou, Ballinlee North & South, Ballinrea, Ballyreesode, Camas North & South, Carrigeen, Knockuregare, Ballybane and other townlands in County Limerick.

I recognise the importance of wind energy in meeting Ireland's National renewable energy targets and addressing climate change. However, this development is unsuitable for this location and fails to take proper account of the environmental, social, and cultural impacts on the local area. This wind farm would permanently alter the rural character of the area and expose nearby residents to health and amenity risks, devalue local properties, and threaten the long-term sustainability of our community. For these reasons, I ask that the Board refuse planning permission.

Some of my summarised individual observations and concerns are as follows:

The visual impact which it will have on my home will be huge, it will dominate the skyline all around us.

The scale of this wind farm is massive and will bring so much disruption to the area where we live. The noise and shadow flicker which will affect us is a huge concern also.

I strongly urge that this development be rejected for the reasons outlined above.

Kind regards  
Philomena Madden
