**Proposed road improvement scheme at Newtownmoyaghy Stream, Kilcock
Submission re observation from Mr Anthony and Mrs Grainne Burke**

Dear Sir / Madam,

We acknowledge receipt of your correspondence of 22nd December 2025 which included eight submissions received by An Coimisiún Pleanála in relation to the above proposed development and an invitation to provide observations in relation to the submissions received.

Regarding the submission from Anthony and Grainne Burke we make the following observations:

The MCC project team wish to acknowledge the positive submission from Anthony and Grainne Burke in relation to the proposed development.

The proposed scheme aims to ensure the long-term safety of the Newtownmoyaghy Road and mitigate environmental risks within the wider catchment. The diversion of the Newtownmoyaghy Stream is intended to eliminate the risk of further bankside erosion, prevent potential road collapse into the stream and to increase safety for all road users. The design has been modelled to maintain existing hydraulic characteristics, ensuring there are no adverse impacts downstream of the proposed works.

We note that the Office of Public Works (OPW) is the lead agency responsible for flood zone mapping in Ireland.

The OPW have been consulted with respect to the scheme and as part of this consultation the OPW have approved a Section 50 application for the currently designed culvert sizing as part of the hydraulic modelling exercise.

The MCC project team confirm that it will liaise with the OPW in relation to flood zone mapping in the area and the hydrological model generated for the scheme can be made available to the OPW to assist with any reviews being undertaken in the future at this location.

Yours faithfully,

Signed: 
On behalf of Meath County Council
