RE: Proposed development of a 110kV GIS grid substation, the undergrounding of existing 110kV transmission line and ancillary development in the townland of Halverstown, Naas, County Kildare.

Applicant: Herbart Limited

Dear An Coimisiún Pleanála,

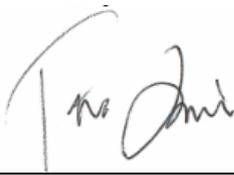

Transport Infrastructure Ireland (TII) observes no direct interactions with the national road network by the above proposed development.

In the case of this development application, Transport Infrastructure Ireland (TII) requests that An Coimisiún Pleanála has regard to the provisions of Chapter 3 of the DoECLG *Spatial Planning and National Roads Guidelines* in the assessment and determination of the subject planning application.

TII observes no direct interactions with the M7 by the proposed development. However, the Authority further notes that the above proposed development is intended to serve an adjoining proposed data centre development that is the subject of current appeal under ref. ACP-323677-25 (Kildare County Council Reg. Ref. 2460787). In submissions to the planning application and appeal of the adjacent proposed data centre development TII identified direct and indirect interactions with the national roads network that require mitigation.

Please acknowledge receipt of this submission.

Yours faithfully,

**on behalf of
Land Use Planning Unit**
