

An Coimisiun Pleanala,
64, Marlborough St.,
Dublin 1.

Dated: 12.02.2026

Name: Louise DOLLARD
Address: Ballyfacey, Glenmore, Co. Kilkenny

Dear Sir/Madam,

Please find enclosed my Observation on the proposed **Development of a 110kv Grid Connection for Ballyfasy Wind Farm. Case Reference number – VA10.323958**

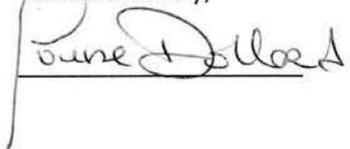

Also included are the observations of the following people listed below:

1. Leonard Garvey, Rathinure, Glenmore, Co. Kilkenny.
2. Kaleb Garvey
3. Cameron Garvey
4. Leon Garvey
5. Shannon Garvey
6. Dee Hayden.....
7. David Garvey
8. Kerry-Ann Garvey
9. Howard Garvey
10. John Garvey
11. Breda Garvey
12. Seamus Dollard, Ballyfacey, Glenmore, Co. Kilkenny.
13. Jack Dollard
14. Lauren Dollard
15. Jennifer Dollard
16. Ella Dollard
17. Denis Drohan, Rathinure, Glenmore Co. Kilkenny
18. Gretta Drohan
19. Koady Kelly, Busherstown, Glenmore, Co. Kilkenny.
20. Calvin Kelly
21. Shane Kelly
22. Kristine Kelly
23. Celia Walsh, Weatherstown, Glenmore, Co. Kilkenny.
24. Liam Walsh
25. Conor Walsh
26. David Walsh
27. Fintan Walsh
28. Denise Walsh
29. Jackie Grace, Kilbride, Glenmore co. Kilkenny.
30. Myles Frayne
31. Betty Grace
32. John Grace
33. Liam Grace
34. Laura Grace
35. Margaret Boyle, Moulerstown, Glenmore, Co. Kilkenny.
36. Donal Boyle
37. Katie Boyle
38. Kieran Boyle
39. James Boyle

40. Nula Hendrick, Kilbride, Glenmore, Co. Kilkenny.
41. Michael Hendrick
42. Patrick Hendrick, Moulurstown, Glenmore, Co. Kilkenny.
43. Judy Hendrick
44. James Hendrick
45. Leah Hendrick
46. Emma Hendrick
47. Catherine Hendrick Meaney, Ballyaden, Via New Ross, Co. Kilkenny
48. Patrick Meaney
49. Theresa Hendrick Foley, Moulurstown, Glenmore, Co. Kilkenny.
50. Edward Foley
51. Michael Murphy, Donard, Clonroche, Co. Wexford.
52. Angela Murphy, 3 Newtown Tce, Thomastown, Co. Kilkenny
53. Gregory Murphy, Donard, Clonroche, Co. Wexford.
54. Andrew Lynch, Clonleigh, Palace, Enniscorthy, Co. Wexford.
55. Brigid Lynch, Clonleigh, Palace, Enniscorthy, Co. Wexford.
56. Mary T. Murphy, 6 Harbour View, New Ross, Co. Wexford.
57. Caroline Murphy, Ballycurran, New Ross, Co. Wexford.
58. Fran Murphy, Ballyfacey,, Glenmore, Co. Kilkenny.
59. Christina Murphy
60. Fionn Murphy
61. Isabel Murphy
62. Cillian Murphy
63. John Dollard, 100 Abbeygate, Rossabbey Village, Ferrybank, Co. Kilkenny.
64. Eimear Dollard
65. Maureen Dollard 17 Lime Grove, Oakridge, Aylesbury Rd., Ferrybank, Co. Kilkenny
66. Eamonn Dollard
67. Thomas Dollard

We would appreciate your consideration on this matter which will hugely impact the lives and health of the community within this area.

Yours Sincerely,

Eimear Dollard

Application Name: Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Case Reference: VA10.323958

FORMAL OBJECTION TO Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Dear Secretary

I am writing as a resident who is impacted by the proposed Ballyfacey Wind Farm to formally object to the Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm.

The applicant was awarded Design Review flexibility by An Coimisiun Pleanala and has provided two options within the application:

- GCO One: Grid connection to the consented Castlebanny Wind Farm substation
- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per Dromada v Cremins High Court Case, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfacey is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe levels and potentially increase readings in buildings where radon was not previously detected.
- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

FORMAL OBJECTION TO Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Dear Secretary

I am writing as a resident who is impacted by the proposed Ballyfacey Wind Farm to formally object to the Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm.

The applicant was awarded Design Review flexibility by An Coimisiun Pleanala and has provided two options within the application:

- GCO One: Grid connection to the consented Castlebanny Wind Farm substation
- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per Dromada v Cremins High Court Case, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfasy is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe levels and potentially increase readings in buildings where radon was not previously detected.
- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfasy is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe levels and potentially increase readings in buildings where radon was not previously detected.
- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

FORMAL OBJECTION TO Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Dear Secretary

I am writing as a resident who is impacted by the proposed Ballyfacey Wind Farm to formally object to the Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm.

The applicant was awarded Design Review flexibility by An Coimisiun Pleanala and has provided two options within the application:

- GCO One: Grid connection to the consented Castlebanny Wind Farm substation
- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per Dromada v Cremins High Court Case, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.

FORMAL OBJECTION TO Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Dear Secretary

I am writing as a resident who is impacted by the proposed Ballyfacey Wind Farm to formally object to the Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm.

The applicant was awarded Design Review flexibility by An Coimisiun Pleanala and has provided two options within the application:

- GCO One: Grid connection to the consented Castlebanny Wind Farm substation
- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per Dromada v Cremins High Court Case, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfasy is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe

levels and potentially increase readings in buildings where radon was not previously detected.

- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

Kind Regards

Donald Boyle

- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per *Dromada v Cremins High Court Case*, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfacy is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe

levels and potentially increase readings in buildings where radon was not previously detected.

- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

Kind Regards

Patrick Murphy

- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfacy is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe

levels and potentially increase readings in buildings where radon was not previously detected.

- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant. They are known to undertake regular low-level flights over distances of several kilometres between breeding, foraging and roosting areas. Overhead grid lines within these landscapes – GCO Two - therefore present a collision risk even where no nests are recorded immediately adjacent to the route.

For the reasons above, . I respectfully request that An Coimisiún Pleanála refuse permission for the Ballyfasy Wind Farm.

Kind Regards

FORMAL OBJECTION TO Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm

Dear Secretary

I am writing as a resident who is impacted by the proposed Ballyfacey Wind Farm to formally object to the Proposed development of a 110kV Grid Connection for Ballyfasy Wind Farm.

The applicant was awarded Design Review flexibility by An Coimisiun Pleanala and has provided two options within the application:

- GCO One: Grid connection to the consented Castlebanny Wind Farm substation
- GCO Two: Proposed loop-in grid connection to existing Great Island-Kilkenny 110 kV overhead line

My objection is based on the following fundamental grounds:

- GCO One will be constructed primarily within public roads within the jurisdiction of Kilkenny County Council, with a section within privately owned lands. As per Dromada v Cremins High Court Case, using such an area without consent is trespass.
- Electromagnetic Interference from the 110kv cable to be laid for the connection to the grid in Castlebanny. This cable is a risk to households living within 50m on either side of the underground grid cable. Any person with a pacemaker is identified as at serious risk from this magnetic field. A public health assessment does not seem to be included in the application to determine if there are people that will be impacted.
- Mullenakill Church, graveyard and mill are located immediately east of the proposed GCO One. The construction of the proposed GCO One will involve the excavation of a trench through the site.
- There was no bat survey carried out on the GCO One grid route as part of the grid connection application. A reference to the Tobin (2021) Castlebanny Windfarm Ecological Impact Assessment Report. Chapter 6 – Biodiversity. This study is 5 years old, and not specific to the grid connection route.
- An ornithology report specific to grid connection GCO One was not included in the planning application.
- Ballyfacey is an area with high radon levels, we are concerned that significant excavation can cause radon gas to migrate into buildings that previously had safe

levels and potentially increase readings in buildings where radon was not previously detected.

- The Curlew is present in Ballyfasy as per the Ornithology report submitted by the applicant.
