Re: Proposed Water Supply Project for the Eastern and Midlands Region
in the counties of Clare, Limerick, Tipperary, Offaly, Kildare, and Dublin.

Dear Sir / Madam,

An Coimisiún Pleanála has received your submission in relation to the above mentioned proposed development and will take it into consideration in its determination of the matter.

The Commission will revert to you in due course in respect of this matter.

Please be advised that copies of all submissions / observations received in relation to the application will be made available for public inspection at the offices of the local authority and at the offices of An Coimisiún Pleanála when they have been processed by the Commission.

More detailed information in relation to strategic infrastructure development can be viewed on the Commission's website: www.pleanala.ie.

If you have any queries in the meantime please contact the undersigned officer of the Commission. Please quote the above mentioned An Coimisiún Pleanála reference number in any correspondence or telephone contact with the Commission.

Yours faithfully,

Eimear Reilly
Executive Officer

RE: Uisce Eireann – Water Supply Project Eastern & Midlands Region

Submission to CPO & Planning

Landowner : Fintan Dunne

Address: Clondonnell, Blueball, Tullamore, Co. Offaly.

**CPO Ref: Wayleave 229, Temporary Acquisition for Construction Compound
Killananny Plots CC5.2.1176 & CC5.2.1180.**

Dear Sirs,

We act on behalf of the above property owner(s) who have been served with notice of the making of the above compulsory purchase order. Having reviewed the drawings, correspondence and documentation, our client(s) have instructed us to object to the confirmation by you of the order.

1. The landowner acknowledges the requirement for the pipeline even though it is going to cause great disruption and disturbance for his farming business. It is the temporary acquisition for the construction compound that is unacceptable to him.
2. The proposed acquisition for the construction compound consists of 8.632ha a large part of the farm. We believe that it is proposed to strip the topsoil and stone the area for the duration required. In the past for infrastructural projects construction compounds were acquired by the contractor after they had been awarded the construction contract. This appeared to work well as the contractors were always successful in acquiring areas and regularly ones that were already in commercial use. The landowners that let the areas were satisfied as they wanted to let the land and were able to complete a commercial deal. The plan to CPO the compounds is resulting in commercial farmers who are already badly affected by the proposed pipeline construction getting an additional hit on ancillary areas making their existing enterprises unsustainable.

3. The construction compound on this property was designed by architects and then the acquisition area was based on this design. Absolutely no regard was had for the farming enterprises as it has created unusable areas within the field layouts. A suitable compound could have been designed and minimised effect on the retained farm lands.
4. To acquire these large amounts of lands temporarily for construction compounds a duration needs to be clearly defined. The temporary loss will be well in excess of 20% of the farm and over 25% when you remove the forestry section. This farmer has a flock of mid-season ewes that have been carefully bred over the years to suit his land and enterprise design along with 115 head of cattle. He will not have the lands available to support them all during the construction period because of the scale of the temporary acquisition and pipe working area. This would result in the loss of a breeding programme that took years to develop. The farmer carries out some tillage which he uses for straw, rotation and reseeded purposes and this will all have to be ceased during the works.
The current department of agriculture schemes are mainly area based and the temporary nature of the acquisitions will cause havoc with this.
5. The landowner is also in contract on the ACREs environmental schemes with the Department of Agriculture. These contracts involve maintaining the environmental measure for the term in the agreement. These proposed temporary acquisitions will prevent entering these contracts.
6. The landowner was carrying out improvements to the farm and this would have to cease if these proposals proceed.
7. The lands are only to be acquired temporarily and are to be returned to the landowner in the same condition as they were received. This could be difficult to achieve after developing and using as a compound for a long period.
8. We reserve the right to raise further matters that may arise as further information is received on the acquisition and expand on outlined issues.

Yours Sincerely,

FOR GAYNOR MILLER LTD
