Case number ABP-324055

With reference to the above case number for the planned application of windmills in our area we wish to formally object to this,
most definitely unsuitable beside our home in reference to the road closures objections the area is not suitable for large vehicles we live in a small rural lane at the moment it's not even able for large vehicles, during the winter months and rain ,it gets flooded many times . The increase water level that happen as a result of this development is unacceptable to us we already have an issue with flooding that I have address
We can't believe that you are even considering this . We walk the lane right outside our house this will not be possible as what you are proposing to do with one way traffic is just too dangerous for our family.

We have a business in the town of monasterevin and therefore going around a route which will lead us to portarlinton in order to get to our work and home again is just not acceptable , especially with the large increase in petrol and diesel.

We have done our homework in reference to vibration and drilling disturbance and that this may cause to our home environment

The surrounding area is home to the Hen Harrier which as I'm sure you know is a protected species,
Along with many owls I have see over the years , this will indeed be a stress on them .

This area is just unsuitable for what you are proposing in our beautiful countryside from flooding to noise, safety

Kind regards

Pat and Noreen Mockler
