RE: Planning Application – Case No: 324069

The Burrow Portrane Coastal Flooding and Erosion Risk Management (CFERM) Scheme

Dear Sir / Madam,

With regard for the above referenced application, I wish to record my full support for the:

- Construction of seven fishtail (Y shaped) groynes structures with a beach nourishment scheme.
- Construction of a c. 190m long earth embankment;
- Construction of a combined c. 130m long sheet piled flood wall and a c. 200m embankment;
- Installation of back drainage behind the proposed defences with associated outfalls;
- Installation of non-return valves to existing outfalls to prevent backflow of water from the estuary;

these works are now critical and essential for the protection of our community.

Now enter your own personal wording, a submission from the heart is much more powerful and remember we are trying to engage with people who don't know us or our area but hopefully will get a feel and understanding for the genuine concern and stress we as residents are under from reading the submissions.

Note: All submissions must be received by An Coimisiún Pleanála no later than 5.30pm on 27th March 2026.

All above provide hope that erosion can be tackled.

Yours sincerely, *Angela Donovan*

Dear Sir / Madam this area is my permanent home I hope to keep living in this area. There is a lot of worry about the erosion which is on going. There a two excellent businesses under threat the Brook pub and Pipers who support 2 families and have a good successful business. How can they plan for a future with the sea eroding so close to these premises? There is a good community spirit in this area people stopping to have a chat during a walk. The local shop is a great place for discussions and they supply literally from an needle to an anchor. It is crucial that the above works are carried out to allay the worry of erosion of our lovely area. A.D.
