RE: Planning Application – Case No: 324069

The Burrow Portrane Coastal Flooding and Erosion Risk Management (CFERM) Scheme

Dear Sir / Madam,

With regard for the above referenced application, I wish to record my full support for the:

- Construction of seven fishtail (Y shaped) groynes structures with a beach nourishment scheme.
- Construction of a c. 190m long earth embankment;
- Construction of a combined c. 130m long sheet piled flood wall and a c. 200m embankment;
- Installation of back drainage behind the proposed defences with associated outfalls;
- Installation of non-return valves to existing outfalls to prevent backflow of water from the estuary;

These works are now critical and essential for the protection of our community.

We have had our property for over 50 years and the changes have been saddening. It would have been better to extend the groynes further towards Rush as there are lot of houses still exposed and could be subject to loss.

Note: All submissions must be received by An Coimisiún Pleanála no later than 5.30pm on 27th March 2026.

Yours sincerely,

Michael Kelly
