LEGEND: -

- Proposed 220 kV UGC Grid Connection Route (8.1km)
- Indicative Substation Layout and Grid Connection Route Corridor

NOTES: -

- This drawing is to be used only for the purpose of the planning application and is subject to detailed design.
- Position of underground cable and location of joint bays, links boxes and comms chambers may vary depending on site conditions.
- Position of link boxes and comms chambers is to be agreed onsite with EirGrid/ESB.
- Other services may be encountered on the route.
- This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

Proposed Cashla
Peaker Plant
Development Area

LEGEND: -

- Proposed 220 kV UGC Grid Connection Route (8.1km)
- Indicative Substation Layout and Grid Connection Route Corridor

NOTES: -

- This drawing is to be used only for the purpose of the planning application and is subject to detailed design.
- Position of underground cable and location of joint bays, links boxes and comms chambers may vary depending on site conditions.
- Position of link boxes and comms chambers is to be agreed onsite with EirGrid/ESB.
- Other services may be encountered on the route.
- This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

LEGEND: -

- Proposed 220 kV UGC Grid Connection Route (8.1km) — KV
- Indicative Substation Layout and Grid Connection Route Corridor
- Existing ESB OHL LV/MV Networks

NOTES: -

- This drawing is to be used only for the purpose of the planning application and is subject to detailed design.
- Position of underground cable and location of joint bays, links boxes and comms chambers may vary depending on site conditions.
- Position of link boxes and comms chambers is to be agreed onsite with EirGrid/ESB.
- Other services may be encountered on the route.
- This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

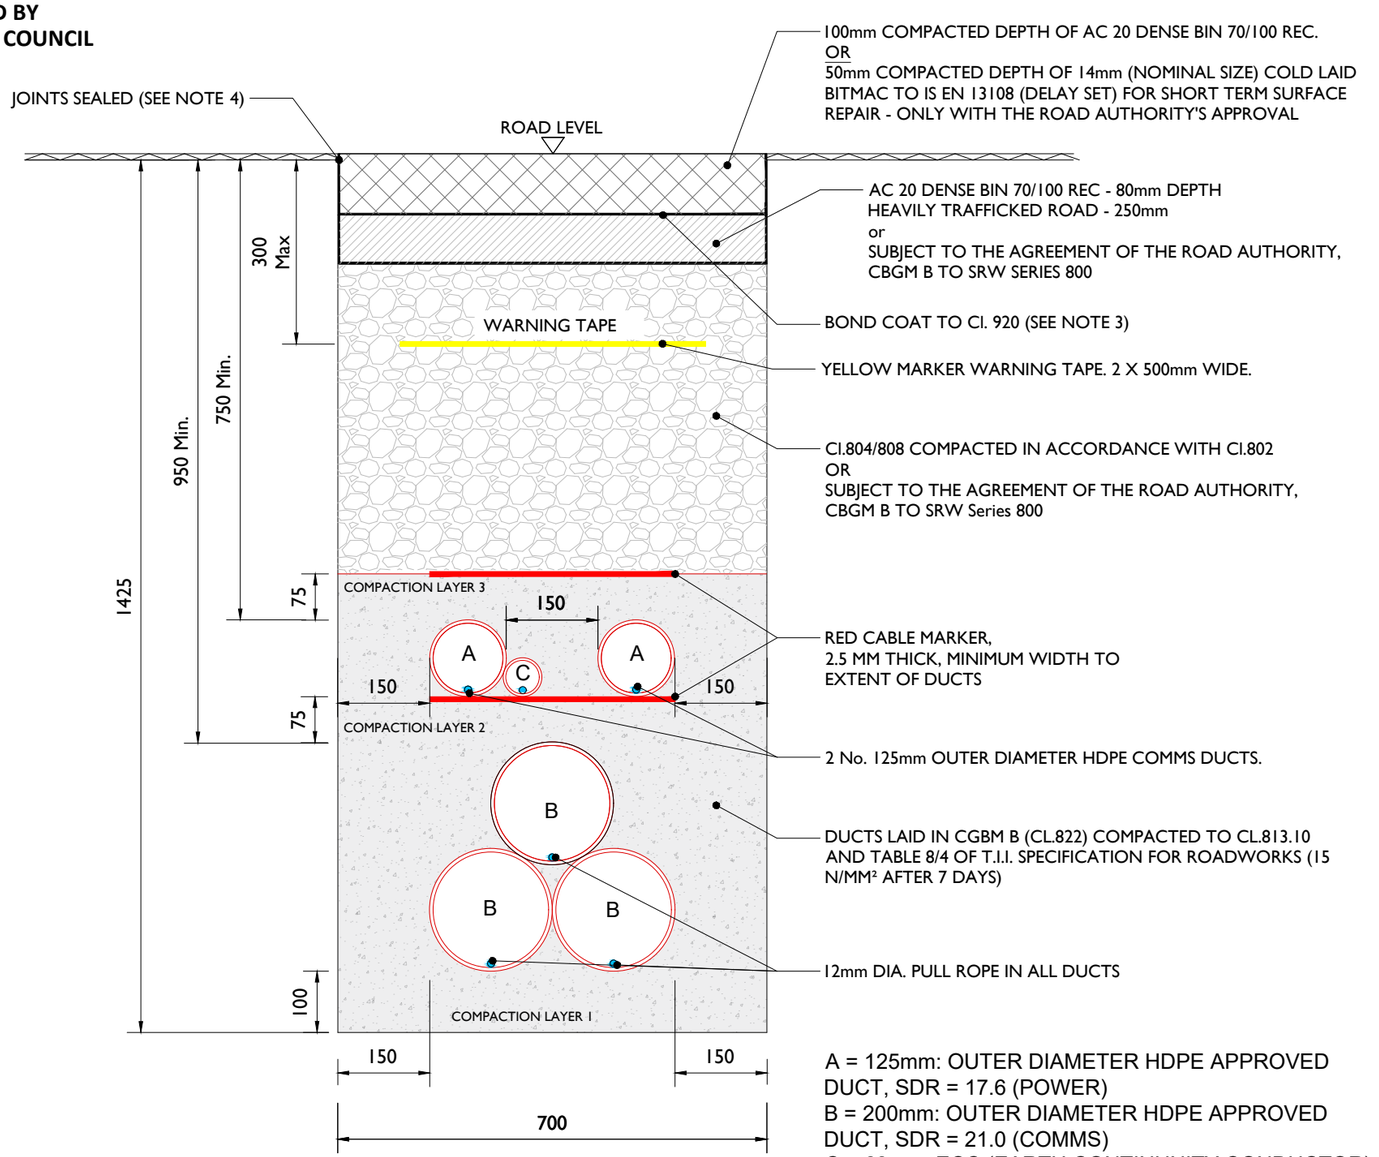
Reinstatement details based on Guidelines for Managing Openings in Public Roads - SD1

EXISTING ROAD BUILD-UP TO BE CONFIRMED BY GALWAY COUNTY COUNCIL



A = 125mm: OUTER DIAMETER HDPE APPROVED DUCT, SDR = 17.6 (POWER)
B = 200mm: OUTER DIAMETER HDPE APPROVED DUCT, SDR = 21.0 (COMMS)
C = 63mm: ECC (EARTH CONTINUNITY CONDUCTOR) DUCT,

Typical Section Through Temporary Reinstatement of Longitudinal Opening in Roadway

ALL REINSTATEMENT WORKS ARE TO BE IN ACCORDANCE WITH LOCAL AREA ENGINEERS REQUIREMENTS AND GUIDELINES FOR MANAGING OPENINGS IN PUBLIC ROADS

NOTES:

1. Refer to 'Guidelines for managing Openings in Public Roads (Purple Book - April 2017)', Chapter 6 'Specifications' for guidance on Duct type / colour and Marker Tape type / colour.
2. All bound edges shall be saw cut to expose the full vertical thickness of each layer prior to excavation. All edges shall be essentially straight, smooth and vertical.
3. Clause 808 surface to be sprayed per clause 920 prior to application of Asphalt Concrete Layer.
4. Joint sealer shall be a hot 40/60 pen bitumen binder or cold thixotropic bitumen 50-70 pen to be applied to all vertical cuts in accordance with B.S. 594987 prior to application of bituminous materials.
5. Licence holder must maintain temporary reinstatement to a safe and acceptable standard.
6. Any damaged area adjacent to the opening and resulting from the excavation operation shall be included within the area to be reinstated.
7. Temporary road Surface warning signs must be used in accordance with the Traffic Signs Manual (Chaper 8 - Temporary Traffic Measures and Signs for Roadworks) and RLS 8/2007.
8. Refer to detail Permanent Reinstatement of Road for advice on permanent reinstatement - all permanent reinstatement shall be carried out when adequate settlement has occurred as determined by the Road Authority.
9. This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

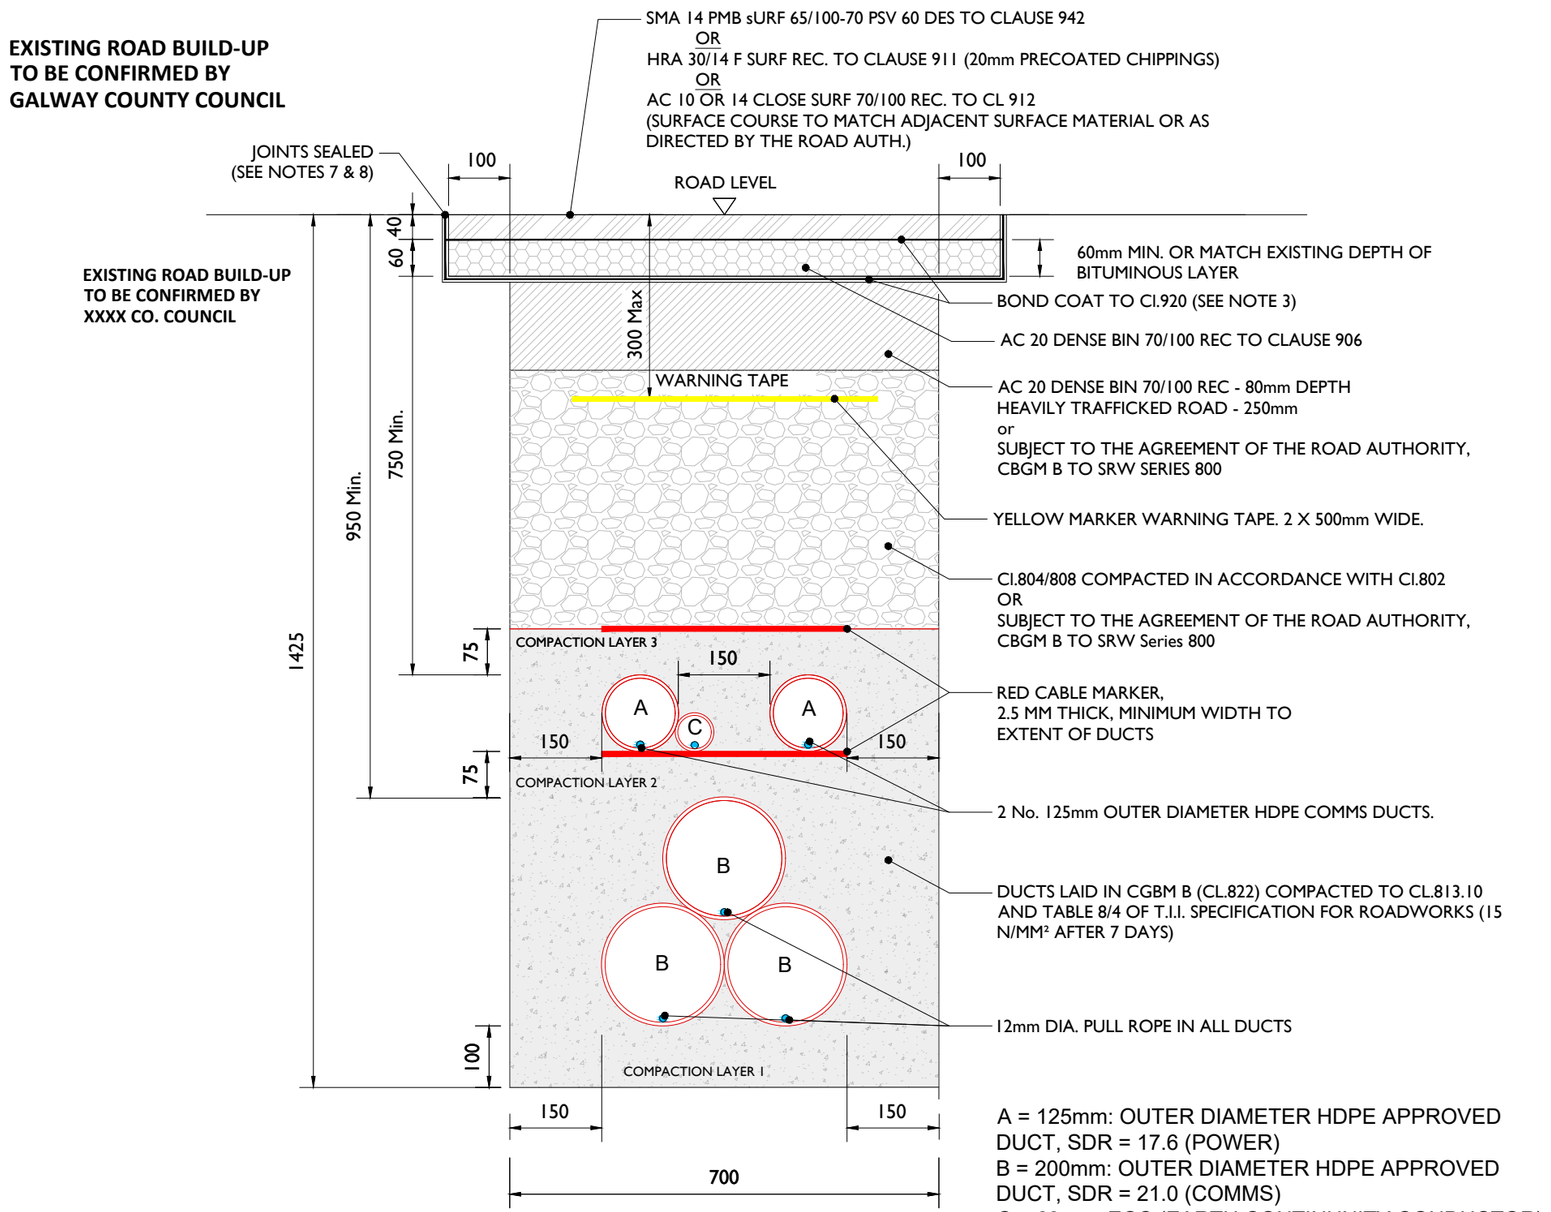
Reinstatement details based on Guidelines for Managing Openings in Public Roads - SD4



Typical Section Through Permanent Reinstatement of Longitudinal Opening in Roadway

ALL REINSTATEMENT WORKS ARE TO BE IN ACCORDANCE WITH LOCAL AREA ENGINEERS REQUIREMENTS AND GUIDELINES FOR MANAGING OPENINGS IN PUBLIC ROADS

NOTES:

1. Refer to Guidelines for managing Openings in Public Roads (Purple Book - April 2017), Chapter 6 'Specifications' for guidance on Duct type / colour and Marker Tape type / colour.
2. All bound edges shall be saw cut to expose the full vertical thickness of each layer prior to excavation. All edges shall be essentially straight, smooth and vertical.
3. Where a temporary surface has been used, material shall be planed out to the depth specified in this drawing. The new permanent surface shall be machined laid and mechanically compacted with a vibrating roller.
4. Where the trimmed edge of excavation is within 400mm* of a joint / edge, ironwork or other reinstatement, this trimmed edge shall be extended to include same and the area of reinstatement shall be extended accordingly (* increase to 800mm where this is pre-existing practice).
5. Any damaged area adjacent to the opening and resulting from the excavation operation shall be included within the area to be reinstated.
6. Clause 808 or Cement Bound Granular Material surface to be sprayed per clause 920 prior to application of Asphalt Concrete Layer.
7. Joint sealer shall be a hot 40/60 pen bitumen binder or cold thixtropic bitumen 50 -70 pen to be applied to all vertical cuts in accordance with B.S. 594987 prior to application of bituminous materials.
8. Joints sealed with hot bitumen and topped with fine sand/grid to get a minimum 55 skid resistance value as determined by the Portable Skid Resistance Pendulum and shall not exceed 3mm depth and 50mm width or other method approved by the road authority.
9. For roads without asphalt concrete surface (e.g. may be Cl.804 with double surface dressing), the road authority may as its discretion permit the temporary reinstatement surface of asphalt concrete to be regulated in lieu of excavation and reinstatement; and subsequently surface dressed.
10. Surface course to match existing surfaces unless otherwise directed by road authority.
11. The coarse aggregate in the asphalt concrete surface course shall have a polished stone value of not less than 60.
12. This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

C = 63mm: ECC (EARTH CONTINUNITY CONDUCTOR) DUCT,

220kV Ducting in Access Track (with ECC Duct)

ALL REINSTATEMENT WORKS ARE TO BE IN ACCORDANCE WITH LOCAL LANDOWNER REQUIREMENTS

NOTES:

1. This design is subject to EirGrid & ESB approval and should be used for Planning purposes only.
2. The Customer shall submit all Planning Application designs and proposed cable routes in compliance with the specification requirements, for EirGrid to review and accept in advance of submitting to the local authority.
3. High Voltage cable installation across third party lands is to be avoided where possible.
4. High Voltage cable installation across peat lands is undesirable and only permitted in exceptional circumstances.
5. Service roads shall be installed along the cable route providing suitable and safe access for maintenance and cable pulling vehicles at all joint bay locations and along any section of the cable route that are not locate within the public road.
6. A deed of easement in respect of the cable route to ESB shall be provided. (min width 4 m for 110 kV circuits and 5 m for 220 kV and 400 kV circuits)
7. Direct burial of the cable is not permitted in any circumstance.
8. This drawing is to be read in conjunction with relevant drawings, specifications and reports
9. Dimensions are in millimeters, unless noted otherwise
10. Drawings are not to be scaled use figured dimensions only
11. This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

SERVICE UNDERCROSSING

GENERAL NOTES

1. This drawing is subject to planning approval and is not to be used for construction.
2. This drawing is to be read in conjunction with all other relevant documentation.
3. Do not scale from this drawing use only printed dimensions
4. All dimensions are in millimetres, all chainages, levels and co-ordinates are in metres unless defined otherwise.
5. No excavation shall commence until the Contractor has consulted up to date services drawings and carried out an Electromagnetic Locator (EML) Scan.
6. Hand dig only within 500mm of existing services.
7. If compacting CBGM B could cause damage to the culvert / service below, use rapid hardening cement grade C25/30 following engineers prior approval.
8. For standard trench cross section drawings and minimum horizontal separation to existing services, see 300101269-DR-117 (TREFOIL).
9. Where depths exceed 2500mm to the top of duct the Contractor shall consult the cable system design engineer for phase spacing requirements.
10. Backfill as per guidelines for the opening, backfilling and reinstatement of openings in public roads (2015).
11. **ESB's preference is to cross under existing services where possible.**
12. Backfill as per guidelines for the opening, backfilling and reinstatement of openings in public roads (2015)
13. The Contractor is responsible for the design and construction of all temporary works. The Contractor shall appoint a temporary works designer, and submit temporary works design to PSDP for review.
14. 225mm minimum concrete over ducts where they transition from standard cross section and where they are at less than standard cover to ground level.
15. Replace existing service marker tape over ESB yellow marker tape.
16. The owner of the existing utility being crossed must be consulted in advance of works commencing as per their guidelines.
17. The Contractor shall record detailed as-built information as per the specification. At all crossing locations these records shall include photographic evidence clearly demonstrating that minimum service clearances and duct separations have been achieved.
18. Where duct for Earth Continuity Conductor (ECC) is required for single point bonded sections, attach the 63mm ECC duct to the A duct and update the trench width accordingly.
19. This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.

SHEET TITLE

Trench Sections For Overcrossing Existing Gas Pipe

SHEET NUMBER

300101269-DR-133

NOTES;

1. ALL DIMENSION IN MILLISMETERS UNLESS OTHERWISE STATED
2. REINSTATEMENTS TO COMPLY WITH REQUIREMENTS OF THE RELEVANT LOCAL AUTHORITY/ASSET OWNER
3. ENTRANCE AND EXIT DUCTS TO BE IN LINE
4. ALL MATERIALS AND WORKMANSHIP TO BE IN ACCORDANCE WITH NRA/T.I.I. SPECIFICATION FOR ROADWORKS, MAY 2005 & SUBSEQUENT REVISIONS
5. REINFORCED CONCRETE TO BE MINIMUM GRADE C32 / 40, SULPHATE RESISTING CEMENT TO BE USED WHERE AGGRESSIVE SOIL CONDITIONS APPLY, REFER TO TABLE 6.1 OF THE BRITISH STANDARD 8110.
6. CARRAIGEWAY COVERS AND FRAMES TO BE TO B.S EN 124.
7. ALL COVERS SHALL HAVE "ESB" LOGO INCORPORATED IN THEM TO THE APPROVAL OF EIRGRID
8. STEP IRONS TO BE GOT DIPPED GALVANISED TO B.S 729 AND POSITIONED AS SHOWN ON ANY CHAMBER DEEPER THAN 700mm ON THE END REMOTE FROM ANY SIDE ENTRY DUCT.
9. CONCRETE PRECAST CHAMBER AND COVER TO BE TESTED THROUGH 5 POINTS, 40 TONNES VERTICAL STATIC LOADING TEST BY AN INDEPENDENT TEST COMPANY. IF REQUIRED, FURTHER DETAILS WILL BE PROVIDED BY EIRGRID.
10. FINAL POSITION OF C2 CHAMBERS SHALL BE AGREED WITH EIRGRID
11. IN A FOREST ENVIROMENT, BACKFILL WITH LEAN MIX OUTSIDE THE COVER FRAME WHERE THE ASPHALT IS SHOWN
12. THIS DRAWING HAS BEEN PREPARED TO INFORM AN ENVIRONMENTAL IMPACT ASSESSMENT FOR THE CASHLA PEAKER PLANT PROJECT AND IS FOR ILLUSTRATIVE PURPOSES ONLY. FINAL DETAILED DRAWINGS FOR THE PROPOSED 220KV GRID CONNECTION ROUTE AND 220KV SUBSTATION WILL BE SUBMITTED AS PART OF A S.182B PLANNING APPLICATION TO AN COIMISIÚN PLEANÁLA IN DUE COURSE.

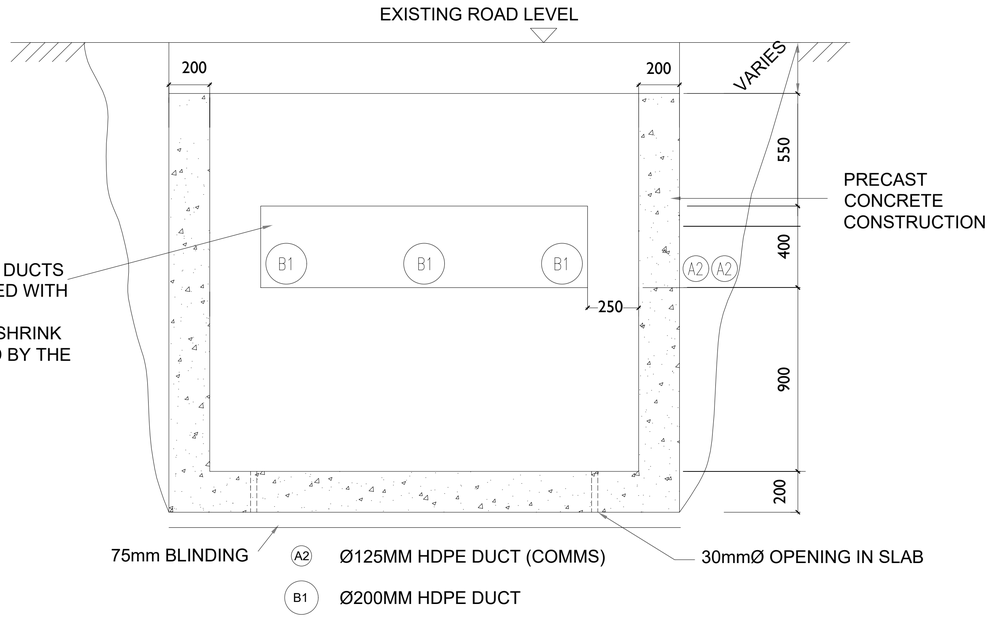
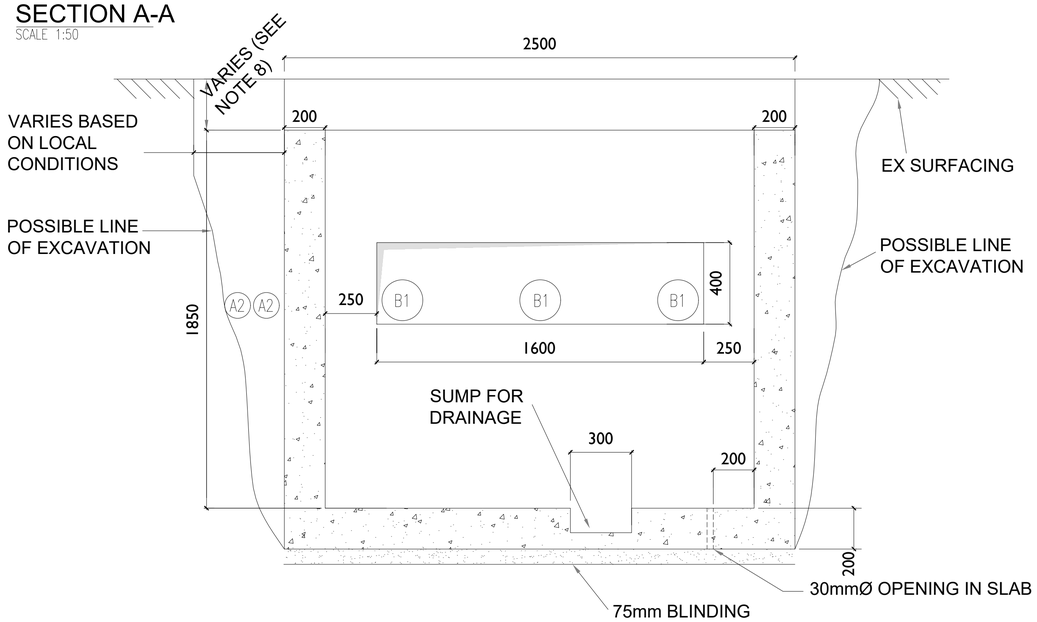
TYPICAL PLAN OF JOINT BAY IN ROAD

SCALE 1:100



SECTION A-A

SCALE 1:50



SECTION B-B

SCALE 1:50

GENERAL NOTES:

1. THIS DRAWING IS TO BE USED ONLY FOR THE PURPOSE OF ISSUE AND IS SUBJECT TO AMENDMENT.
2. THIS DRAWING IS TO BE READ IN CONJUNCTION WITH ALL OTHER RELEVANT INFORMATION.
3. DO NOT SCALE FROM THIS DRAWING, USE ONLY PRINTED DIMENSIONS.
4. ALL DIMENSIONS ARE IN MILLIMETRES UNLESS DEFINED OTHERWISE.
5. STANDARD FOUNDATIONS ARE BASED ON THE FORMATION AT THE BASE OF THE EXCAVATION SHOWN BEING SUITABLE FOR A MINIMUM BEARING PRESSURE OF 100kN/m2. SUITABILITY OF STANDARD JOINT BAY FOUNDATIONS CAN ONLY BE CONFIRMED FOLLOWING GROUND INVESTIGATION. HAND VANE TESTS SHALL BE REQUIRED AS PER GI SPECIFICATION. WHERE SPECIFIED MINIMUM BEARING PRESSURE IS NOT ACHIEVABLE, AND WHERE PEAT IS ENCOUNTERED, THE CONTRACTOR SHALL REFER TO THE ENGINEER FOR GUIDANCE.
6. THE LENGTH OF BONDING LEAD LENGTH SHALL IN NO CASE EXCEED 10M. NO JOINTS IN BONDING CABLE ARE PERMITTED.
7. ALL EARTHING SHALL BE IN ACCORDANCE WITH ENA ER C55 AND EIRGRID/ESBN FUNCTIONAL SPECIFICATION.
8. THE DEPTH FROM GROUND/ROAD LEVELTO THE TOP OF THE CONCRETE WALL SHALL BE
   - A. 500MM - IN CULTIVATED FIELDS & GRASS LAND
   - B. 300MM - IN PAVED ROADS AND GRASS VERGES
   - C. 350MM - IN PAVED CITY ROADS AND GRASS VERGES
9. LINK BOX CHAMBERS TO BE POSITIONED AT THE EDGE OR OFF ROAD.
10. LINK BOX CHAMBERS AND C2 COMM CHAMBERS FINAL POSITIONING TO BE AGREED WITH EIRGRID PRIOR TO INSTALLATION.
11. THIS DRAWING HAS BEEN PREPARED TO INFORM AN ENVIRONMENTAL IMPACT ASSESSMENT FOR THE CASHLA PEAKER PLANT PROJECT AND IS FOR ILLUSTRATIVE PURPOSES ONLY. FINAL DETAILED DRAWINGS FOR THE PROPOSED 220KV GRID CONNECTION ROUTE AND 220KV SUBSTATION WILL BE SUBMITTED AS PART OF A S.182B PLANNING APPLICATION TO AN COIMISIÚN PLEANÁLA IN DUE COURSE.

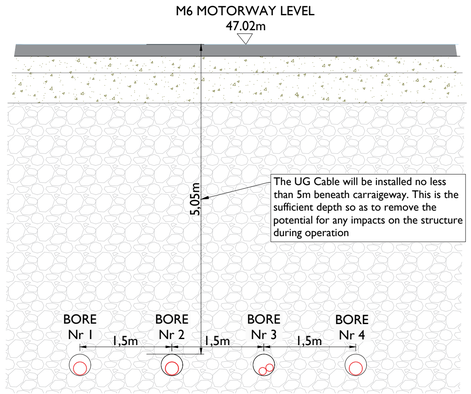
Site Layout Plan

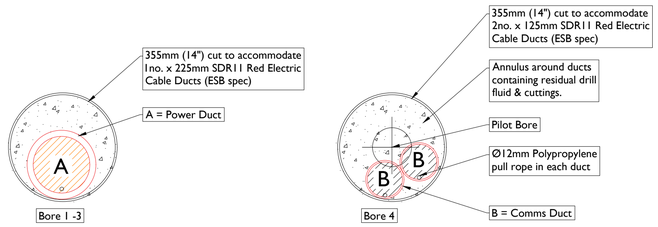
Notes:

1. HDD crossing design will be prepared following completion of site investigation works.
2. This drawing is to be read in conjunction with all other relevant information.
3. Do not scale from this drawing, use only printed dimensions.
4. All dimensions are in metres unless noted otherwise.
5. No excavation shall commence until the contractor has consulted up to date services drawings and carried out an electromagnetic locator (EML) scan.
6. Hand dig only within 500mm of existing services.
7. All co-ordinates are referenced to ITM.
8. The Contractor is responsible for the design and construction of any temporary work required.
9. HDD launch and reception pits locations to be determined following site investigations works.
10. Final HDD design to be completed by Specialist Drilling Contractor in conjunction with the Cable Designer.
11. Transition couplers to be utilised to transition to standard power ducting after HDD. Comms ducts do not require a transition coupler and will be coupled directly using a chamfer between the two ducts.
12. All interstitial space between ducts and borehole to be bentonited thoroughly to maintain cable rating.
13. This drawing has been prepared to inform an Environmental Impact Assessment for the Cashla Peaker Plant project and is for illustrative purposes only. Final detailed drawings for the proposed 220kV grid connection route and 220kV substation will be submitted as part of a S.182B planning application to An Coimisiún Pleanála in due course.



Section B - B

Image 1 : Typical Directional Drilling Rig



A = Power Duct: 225mm (OD) SDR 11, HDPE
B = Comms Duct: 125mm (OD) SDR 11, HDPE

All interstitial space to be bentonited throughly to maintain cable rating. Accurately record crossing location & erect marker posts
