Mark

Further to meeting last week, and proposal to install some of the ducting in private lands to accelerate the program and reduce road closure time, Cork County Council would have no objection to this proposal and would support any measures that would limit the closure of a busy Public Road.

To this end, this email can be taken as confirmation that we would support any submission made by Orsted to this effect.

Trusting this is the information you require but please revert should any additional information be required.

Regards
