Re: Observation to the proposed development of a 220kV substation, telecommunications mast and underground electricity cable infrastructure with associated works.

Location: Rathmorrissey, Pollnagroagh, Moanbaun, Castletambert, Knocknacreeva, Caraunduff, Caherbriskaun, Lisheenkyle East, Barrettspark and Cashla (Townlands), Athenry, Co. Galway

Applicant: Bord Gáis Energy Limited

Dear Sir/Madam,

I run a wholesale bakery delivery service for cafes and restaurants in the county. The road closures will add significant delays to my deliveries and impact my business.

Having reviewed the application documentation, I have outlined my concerns regarding the proposed development

Disruption to Rural and Residential Communities Along Route

The proposed 8.1km underground cable route would pass through a number of established rural and residential communities, including Rathmorrissey, Castletambert, Knocknacreeva, Caherbriskaun, Lisheenkyle East and Cashla. These are active farming and residential areas with homes, schools, farms and local businesses located along narrow rural roads. I am concerned about the level of disruption the proposed

works would cause to residents, farms, local roads and daily community life.

Damage to Hedgerows, Root Systems and Roadside Vegetation

The proposed cable route passes through established rural hedgerows, mature roadside vegetation and tree-lined sections which form part of the local biodiversity network and rural landscape character. I am concerned that trenching works and excavation activity could result in long-term damage to hedgerows, root systems and roadside vegetation throughout the area.

Safety Risks Near Lisheenkyle National School

The proposed cable route passes in close proximity to Lisheenkyle National School along narrow rural roads with limited visibility and no proper hard shoulders. I am concerned that trenching works, construction activity, increased traffic volumes and temporary traffic management measures would create additional safety risks and disruption for children, parents and school staff, particularly during school drop-off and collection times.

Cannot Be Assessed in Isolation from the Wider Development

Although this application relates to grid connection infrastructure, I believe the proposed substation, mast and cable route cannot be properly assessed in isolation from the wider connected energy development to which it relates. The planning documentation does not adequately assess the combined and cumulative impact of the proposed infrastructure on the surrounding rural area, road network, residential amenity, agricultural activity and local environment in accordance with the principles of proper planning and sustainable development.

Conclusion

For the reasons outlined above, I believe the proposed development would have significant adverse impacts on the local community, rural environment, farms, roads, groundwater conditions and surrounding residential areas. In my view, the application has not adequately demonstrated that the proposed development can proceed without unacceptable impacts on rural amenity, traffic safety, environmental protection and community wellbeing. I do not believe the proposal represents proper planning and sustainable development, and I respectfully request that permission be refused.

Yours Sincerely,

Arlene Dooley Prehn
