To Honor Caird Marren
Executive Officer

I received a letter from you this week, in the post, in relation to the above case no. This is presumably as I am one of many concerned observers in the current process.

Your letter advises that I am invited to respond to the applicant's 'Response to Observations Report' - relating 'only to section 4.3.2' of that report.

I am unclear if my following comments fit into that remit, as the same page on that report has a section 4.3.1 which gives two short paragraphs relating to Archaeology.

My submitted observation, which is based on my studies and publications of the archaeology of the West Cork area, has objected to the proposed windfarm on archaeological grounds.

It appears from the brief response on the applicant's 'Response to Observations report' (4.3.1) that the archaeological impact of the proposal has, in my opinion, been greatly minimised and dismissed.

As pointed out in my observation, the submitted proposal by as it stands, has a significant mapping error. I do not see any account, acknowledgement, comment or response regarding this error on the current available documents?

I would respectfully refer the comisiún to my submitted observation in this regard.

Many thanks.

Kind regards,
David Myler
