Tullyskehenry Co. Leitrim

Dear Sir/ Madame

My home place is Brackerymore, Manorhamilton,
Co. Leitrim

This is where I grew up and where most of my family still
live. My Dad Seamus OHara farmed the land for the past
50+ years he passed away 13/07/2025 and I have inherited
land in Brackery more, this is directly across from the
proposed site Dough Mountain wind farm.

Having reviewed the application documents I have great
concern regarding the proposed project for the following
reasons:

It will have Devastating effects on the environment, the
wildlife that have made Dough Mountain their home ie the
Hen Harrier, the number of Different varieties of Bats etc
This area is a historic and hidden gem in Rural Leitrim. We
have been Blessed to have it on our doorstep and in short

we want to keep it that way. The proposed turbines would destroy the Landscape, the tranquility of the area.

It would have immense consequences on the life of our families going forward on their health, their mental health and impact their daily living and potentially in the future planning applications for homes to be built in the area.

Any time of the year Dough Mountain is a naturally beautiful place to walk its many trails and get lost in the peace and quiet that Dough Mountain offers. From the Natural streams, the stunning bog land, the forests to the wilderness the wildlife that all make up the wonderful place that is known locally as Dough Mountain.

In Conclusion however the proposed Windfarm would have a knock on overall devastating impact. Leitrim already has a large number of wind farms. Enough to supply electricity to all of Leitrim...

Why do we need to build more wind farms here??

I feel the proposed development would destroy not only the environment the rural landscape, the wildlife and their habitats and the quality of life for those that live in the area and deter anyone from moving to the area in the future.

We want to keep our part of Lovely Leitrim Lovely and these turbines would destroy the quality of that.

Yours sincerely

Elaine O'Hara
