My opinion on the Planning Application for the Windfarm consisting of 14 nr 185m high Wind Turbines:

These wind turbines need to be Rejected.

We have had ongoing issues with Existing turbine which have not been Resolved.

Company Set up noise monitors in our back garden for weeks as we complained about Noise. Nothing has been done and haven't seen birds Calving Cameras to livestock Stop working

Company Come out and replaced them For but they still don't work properly.

I work from home a few days a week and Need good wi-fi. I use Net 1 which is going to be affected by this.

The existing Turbines are a Private Nuisance. and the Proposed large ones are going to have

A detrimental Effect on our livelihood.
