ACP ref: PAX12.324290

Dear Sir/Madam,

I write with regard to the above 10 year planning permission for the proposed development of Lissinagroagh Wind Farm consisting of 14 no. wind turbines and all associated infrastructure.

Location: In the townlands of Boleyboy, Cashelaveela, Cherrybrook, Killea, Coolodonnell, Faughary, Lissinagroagh, Lisdarush, Lugasnaghta, Raheelin, Shasmore, Tawnyfeacle and Tullyskeherny, County Leitrim.

Following consultations with our Air Corps colleagues at Casement Aerodrome, the Department of Defence would like to make the following observations:

The Minister for Defence is responsible for the regulation of military aviation, whereas the Irish Aviation Authority (IAA) is responsible for the safety regulation of civil aviation including aerodromes. The IAA does not have remit for military aviation or installations. Safeguarding of military flight operations and installations is intended to protect both current and future aircraft operations and also to take account of the security requirements associated with some of those operations.

- All turbines should be illuminated by Type C, Medium intensity, Fixed Red obstacle lighting with a minimum output of 2,000 candela to be visible in all directions of azimuth and to be operational H24/7 days a week. Obstacle lighting may be incandescent. If LED or other lighting types are used, should be a type visible to Night Vision equipment. Obstacle lighting must emit light at the near Infra-Red (IR) range of the electromagnetic spectrum, specifically at or near 850 nanometres (nm) of wavelength. Light intensity to be of similar value to that emitted in the visible spectrum of light.
- In the event of negative impacts on future military radar systems, the owner will engage with the Department of Defence and will provide suitable mitigations as soon as practical.

Any Irish Air Corps (IAC) requirements for are separate to Irish Aviation Authority (IAA) requirements.

Yours faithfully,

Sent via email
