Strategic Infrastructure Development (SID) Application: Littleton Wind Farm Designated Activity Company, townlands of Longfordpass North, Longfordpass South, Leigh, Bawnreagh, Clonoura, Noard, Derryhogan, Derryvella, Ballybeg, Lanespark, Newhill and Killeen in County Tipperary

Dear Sir/Madam,

I refer to correspondence received by the Environmental Protection Agency on 15 June 2026 from consultants on behalf of Littleton Wind Farm DAC regarding the SID planning application and Environmental Impact Assessment Report (EIAR) for the above development. The Agency makes the below observations.

The proposed development appears to be located on an EPA licenced site. Bord na Mona Fuels Limited was issued an Integrated Pollution Control (IPC) Licence (Register No: P0499-01) on 27 February 2001 for the following activity: Class 1.4. of the First Schedule of the EPA Act 1992 as amended '*the extraction of peat in the course of business which involves an area exceeding 50 hectares*' at Littleton Group, c/o Littleton Briquette Factory, Thurles, Co. Tipperary.

Details of the licence application, licence and any amendments made to the licence may be viewed on the Agency's website www.epa.ie. The licence may need to be reviewed or amended to accommodate the changes proposed in the planning application.

It is noted that the planning application was accompanied by an EIAR. As part of its consideration of any licence review application that may be received which addresses the changes proposed, the Agency shall ensure that before the revised licence is granted, the licence application will be made subject to an Environmental Impact Assessment as respects the matters that come within the functions of the Agency and in accordance with Section 83(2A) and Section 87(1G)(a) of the EPA Act. In addition, consultation on the licence application and EIAR will be carried out in accordance with Section 87 (1B) to (1H) of the EPA Act as appropriate. Please also note that you will be requested to provide the documentation relating to the EIA you have carried out to the Agency under Section 173A(4) of the Planning and Development Act 2000 as amended.

Should a licence review application be received by the Agency, all matters to do with emissions to the environment from the activities proposed, the licence review application documentation and EIAR will be considered and assessed by the Agency.

Where the Agency is of the opinion that the activities, as proposed, cannot be carried on, or cannot be effectively regulated under a licence then the Agency cannot grant a licence for such an activity. Should the Agency decide to grant a licence in respect of the activity, as proposed, it will incorporate conditions that will ensure that appropriate National and EU standards are applied, and that Best Available Techniques (BAT) will be used in the carrying on of the activities.

Finally, please note that in accordance with Section 87(1D)(d) of the EPA Act, the Agency cannot issue a Proposed Determination on a licence application which addresses the development above until a planning decision has been made.

For all further queries and correspondence relating to planning matters, please contact eiaplanning@epa.ie

Yours Sincerely,
Marian Doyle

Dear Sir/ Madam,

On behalf of our client, Littleton Wind Farm Designated Activity Company (DAC) (the Applicant), we are submitting a Planning Application for Strategic Infrastructure Development (SID) to An Coimisiún Pleanála (ACP). The Commission provided a list of prescribed bodies to be consulted. Your organisation was on this list and therefore we are providing you with a cover letter and 1 no. electronic copy of the planning application documents for your consideration. Please see link below to access these.
