

Objection against Muingmore wind farm.

Case no. PAX16.324387

Name: Annemarie Doherty

Address: Geesala, Ballina Co. Mayo f26w8c5.

Reasons for objection:

1. The wind turbines will interfere with the natural habitat of many wildlife and birds. Some of these species being, Otters, Badgers, Deer, foxes, birds, bog lizards etc.
2. The wind turbines will cause an eyesore and a visual impact to the landscape and amazing views of the area around them.
3. The wind turbines will make a huge destruction to the peace of citizens living nearby. They will cause noise destruction and a constant flicker of light to those living nearby. This will be very irritating to have to live with against their own will. This could affect their wellbeing, and this could be avoided by not erecting these wind turbines so near to peoples and families' homes.
4. If these ugly monstrosities were to be erected in this beautiful area it will affect tourism hugely to the area as tourists come to the area for the views and amazing sights and as a lot of businesses depend on this tourism to keep them going this will affect local business people and their personal lives. We want to increase tourism, not decrease it with these wind turbines taking away from the natural beauty of the area.
