To whom it concerns,

I am deeply worried about the proposed windfarm, the blight on our beautiful landscape, the last thing we have left, forgotten for always for any type of rural advancements, all we had was our glorious scenery, which will be changed for ever, The best place to go wild no more! (As awarded by the Irish times) It will bring nothing to us, as we have seen by past developments (The Shell refinery)

We gain nothing & lose our soul, Why??

I have been a native of Belmullet all my life, & I love this beautiful place with it glorious wild & unkept scenery, please consider the people of Erris who will not benefit again To hell or to Connacht, well it will feel like hell if this happens,

I object in the strongest fashion, & will protest till the very end,

This development is not welcome & will benefit not one person in Erris
