Case ref: PAX16.324387

To Whom It Concerns,

I would like to express my concern at the proposed development of a wind farm in the Geesala area of Co Mayo.

I am extremely concerned about the potential impact this will have on the area from an environmental point, noise and shadow flicker to the visual impact the turbines will have on the local landscape and views.

These turbines will also have a negative impact on homes and property values in the area, they will potentially effect tourism which the area greatly relies on. The area is also home to many wildlife, birds and habitats which would be destroyed.

Considering all of the above I would like to lodge an objection to the proposed development.

Yours sincerely,
Caroline Scanlon
