Planning Objection to the Proposed Wind Farm Development in County Mayo

To: An Coimisiún Pleanála

I am submitting a formal objection to the proposed wind farm development in North Mayo. I strongly oppose the proposal because of its likely harm to local communities and the natural environment.

While I support renewable energy, wind farms must be located and developed only where they do not endanger communities, human health, wellbeing, or the environment.

The proposed development would damage North Mayo's exceptional natural environment, including internationally significant peatlands, blanket bogs, and coastal habitats that support protected wildlife and marine life.

I am also concerned about the cumulative impact this will have on the area of this proposal alongside existing and approved wind farms, particularly on the landscape, tourism, local communities, and the quality of life of families who wish to remain on land passed down through generations.

For these reasons, I strongly object to the proposed wind farm development in North Mayo.
