

Niamh Leneghan

Muingmore

Belmullet

Ballina

Co. Mayo

Case Number: 324387

To Whom it May Concern,

I wish to make an observation in relation to the above referenced case number.

The proposed development of a Windfarm at the site in Muingmore/Doolough/Tristia and Bangor in County Mayo is totally inappropriate to the area and should not go ahead.

The reasons being:

Environmental impact on the natural flora and fauna.

The Health of the people living near these monstrosities – studies carried out in Ireland have shown evidence that peoples sleep, stress and quality of life have all been impacted by wind turbines being close to their houses.

Shadow flicker

Sound from the turbines

Muingmore/Doolough/Tristia and Bangor are all unique parts of Mayo and Ireland and the beauty of these areas will be destroyed. We are lucky to have such beautiful beaches, skies and animals in our area and any proposed windfarm will have a detrimental impact on this.

Mayo already has the largest wind farm in Ireland we do not need another.

We as a family have lived in Muingmore for generations and farmed this land. We want to continue to do so but this proposed wind farm will have a detrimental effect on our lives should it go ahead.

Yours sincerely,

Niamh Leneghan
