

Observation / Objection to Proposed Muingmore Wind Farm Development - 324308

To whom it may concern,

I wish to submit this observation regarding the proposed Muingmore Wind Farm development.

While I recognise the importance of renewable energy and the need to transition towards cleaner sources of energy, I have concerns about the potential impact this development may have on the character and natural beauty of the surrounding area.

Although we do not live in the immediate area, we have a strong connection to it through friends and family who live there, and we frequently visit and spend time in the region. We greatly value the area for its rural landscape, tranquillity, and natural environment including the diverse plant and wildlife, which we believe could be significantly affected by the scale and visual impact of the proposed turbines.

We also have concerns regarding the potential impact on local wildlife, biodiversity, and the disruption that may arise from construction traffic and associated works.

We respectfully request that these concerns are carefully considered and that the long-term impact on the landscape, environment, and local community is fully assessed before any decision is made.

Yours faithfully,

P.J., Agnes, Joseph and Tracy Nallen
