Muingmore Wind Farm

Observations to reject

We pride ourselves on our beautiful area.

Views of Erris will be greatly impacted

Noise and moving shadows from blades can affect nearby homes.

Tourism is our main economy and the windfarm will impede this. Less tourists due to noise and pollution.

Visual impact will change our landscape

Collision risks of birds with turbines.

Traffic and road safety. Roads are currently not the best so building this infrastructure will cause traffic upheaval. Normal traffic but what about our people who have to visit Mayo Univeraity hospital and die on route due to delays.

Noise pollution and health impacts.

Wind does not blow 24/7 so bsckup/storage.

Turbines removal after end of life is costly and whar guarantee have we thar all will be removed includkng the large battery storage.
