

To whom it may concern, I wish to make a formal objection to the proposed substation by Cunlaghfadda Green Energy Ltd. planning reference number 324429. I am a local resident and have many concerns regarding the project that this substation is part of.

I am deeply worried about the impact this will have on the area, to name but a few;

- Noise pollution
- Ecology impact
- Heritage and biodiversity disturbance

The environmental impact of all the materials being used for the substation and the consequences on the environment and our health is very worrying.

The entire area will be disturbed due to large trucks and machinery using our rural roads, not to mention noise and pollution. This area is used daily by walkers, joggers and cyclists and people walking their pets. Effectively, this project will mean that we will no longer have our quiet, peaceful area for these essential past times.

I feel this entire project is totally unsuitable for this area, and the development will diminish our area and community. Our area essentially is going to be taken from us.

Anne Mannion.

Knockrickard, Claremorris, Co. Mayo, F12 FC67

Furthermore, I am very concerned about the impact this proposed development will have on the diverse flora and fauna of our area, particularly the endangered species that are protected by government bodies. This development will cause major disruption in our locality due to heavy machinery. This proposed development is in my view, totally inappropriate for the chosen location given that these valuable endangered species live in this area. We need all our flora and fauna to thrive as human beings.
