I Joe Corcoran wish to make a submission

To An Coimisiún Pleanála, 64 M'orough St, Dublin 1.

Re: Submission/Observation on case Reference

VA16.324429 ~ proposed 110 kV Electrical Substation,
Loop-In grid Connection and Associated Infrastructure and works,
Townland of Cloonbarul, Co: Mayo.

Applicant: Cuntaghfadla Green Energy Limited.

To whom it may Concern.

We ask An Coimisiún Pleanála to uphold Mayo County
Council's refusal of The Proposed Cuntaghfadla Substation

My personal objection is as follows.

Concerns for the development of the grounds where
proposed Substation is located.

I only live 920 metres from proposed Substation
100 metres from my house are 2 swallow holes.

2

Those are holes that take water that comes from the area of ground where the Substation is proposed to be.

My Dwelling and farmlands are on lower ground than the proposed Substation which will undoubtedly cause flooding in my farmland and home.

At present there is drainage through the proposed side of the Substation area but with the construction of the proposed Substation, drainage system there through nature won't be able to accommodate the volume of water.

Those swallow holes are available for inspection at any time.

I have enclosed photos to indicate the already alarming levels and type of flooding due to diverse weather and changes in our geographical weather conditions.

I have also a natural concern for all our local Wildlife, especially "The Curlew". We have so many species of Wildlife and local history that will be gravely effected by such a large development.

Yours Sincerely
Joseph Corcoran

JOSEPH CORCORAN.
