I Maureen O'Malley wish to make a submission to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1.
Re: Submission/Observation on case reference.
VA16.324429 ~ proposed 110 kV Electrical Substation, Loop ~ in Grid Connection and Associated Infrastructure and works, Townland of Gleenbar, Co: Mayo.
Applicant: Cunkagh-Jadda Green Energy Limited.

To whom it may concern.
We ask An Coimisiún Pleanála to uphold Mayo County Council's refusal of the proposed Cunkagh-Jadda Substation.
My personal objection is as follows.

Concerns for Development of the grounds where proposed Substation is located.

I only live 920 metres from the proposed Substation.
100 metres from the house are two swallow holes.
Those are holes that take water that comes from the area of ground where the substation is proposed.

I Live on Lower ground than the proposed Substation which will undoubtedly cause flooding.

Over the generations there is a natural drainage but with the construction of the proposed substation, the natural flow and drainage won't happen or be able to accommodate the volume of pressure and water.

The Swallow holes are available for inspection at any time.

I have enclosed photos to indicate the already alarming levels and type of flooding due to our diverse weather and changes in our Geographical Weather Conditions.

I also have huge issue and a natural concern for all our Wildlife and habitat. We have so many species of Wildlife, along with Local History that will be greatly effected by this proposed Large Development in our Local Community that will be destroyed forever, which is a harsh reality to both young and Old.

We will lose the privilege of living in such a beautiful, unspoilt area that can never be regained if this proposed Development is granted.

Yours Sincerely

Maureen O'Malley.

MAUREEN O'MALLEY.
