**Observation submission for
ACP-324433-26 Meenbog Windfarm, Donegal**

A Chara

I wish to object to the application for Substitute Consent relating to the Meenbog Wind Farm development.

The peat slide and environmental damage from the previous construction should be reason enough to not repeat historical mistakes.

However the fact that the subsequent finding that the development was unauthorised due to material deviations from the approved plans means that the developers cannot be trusted to act ethically by adhering strictly to the permission requirements.

The Meenbog area is part of a fragile and important bogland habitat containing native flora and fauna already under pressure from human interference and general environmental degradation.

Being from the area I'm aware of the local folklore passed down to me from my grandmother;- stories of Giants Graves and Hungry Grass are woven into the physical environment and should be respected also.

Is mise
