An observation in relation to ACP-324433 Meenbog Windfarm Co Donegal

We have a concerned environmental group here in Donegal and are seriously disappointed that such a project would possibly progress to a further stage. We object to any further development for the following reasons, but not only

1. The partial construction has caused severe pollution upon the local environment and the Mourne river

2. It has and will, if permission granted, have significant damage to European sites. There is also a significant transboundary issue that has not been addressed.

3. Any permission to proceed under S.177E PDA would undermine the law by limiting public access and prioritizing fast tracked developments over ecological protections

4. The procedure of substitute consent not only circumvents democratic accountability but will set a precedent that such procedure will be routine. The direct and indirect residual effects on the environment would be contrary to proper planning even with any adequate considering of exceptional circumstances

These are a summary of our observations, and we plead to reject any further permission to a development upon this site.

Yours sincerely

Sean Gallagher
