Subject: ACP32443

To whom it may concern I Niall Gallen

I wish to object to the proposed development.

As this is a condemned site , was unsuitable in the past and is still definitely unsuitable if not more do today .

It is unbelievable that this company has the cheek to even seek planning given the catastrophic damage it did in this project in the past .

Video footage emerged at the time of fully grown trees moving in the land slide ,

If this project went ahead who will stand accountable to the organizations , the public, when it once against slides into rivers , waterways and God forbid take human life's .?

I don't believe your Department would grant planning for a developer to rebuild a house with using mica blocks , so in the same light could you grant planning to a wind farm that had already has collapsed?

Your board ignored our factual evidence that this site was unsuitable in the past ,

Our submission, backed by professional surveys,

Full forests in landslides was proof that backed up our concerns / submissions

Signed

Niall Gallen
