Case Reference: SU05E.324433

Observation: Shauna Conaghan, Kinletter, Ballybofey, Co. Donegal F93T92H

To whom it concerns,

I am a local resident and wish to object to this application for Substitute Consent.

The events at Meenbog, particularly the landslide and the resulting environmental damage, have demonstrated the unsuitability of this sensitive upland landscape for a development of this scale. Many local residents raised concerns during the original planning process regarding the risks associated with disturbing peatland and upland habitats. The subsequent damage suggests those concerns were justified.

The requirement for Substitute Consent and remedial environmental assessment raises serious questions about the adequacy of the original assessment process. As a member of the local community, I have witnessed the impact this development has had on the area. The environmental damage, controversy and ongoing planning issues have undermined confidence in the original decision-making process and in the assurances provided by the developer.

The existing impacts serve as evidence of the risks that were identified by local residents from the outset.

For these reasons, I respectfully request that the Bord refuse permission for the completion of the development, and require the comprehensive decommissioning and removal of all infrastructure associated with the unauthorised development, including the 110kV substation, grid connection infrastructure and all associated works.

Yours faithfully,

Shauna Conaghan
