An Coimisiún Pleanála,
64 Marlborough Street,
Dublin 1,
D01 V902

Case Reference: PAX21.324561

I, Ashling Munnelly wish to formally make an observation in relation to the proposed Crumhach Wind Farm.

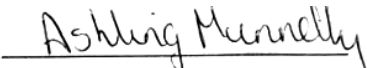

The proposed development's planning application requires the use of a portion of my land which is highlighted in *Annex 1* in order to facilitate the vehicles associated with the transport of the development. My property is located on the West side of Turbine Delivery Route Location 16 shown in EIAR Appendix 15-3- *Annex 2*.

As it stands, I do not have an official agreement with the applicant granting rights to use this area for the purposes outlined in the planning application and believe this is an overreach on the applicant's behalf.

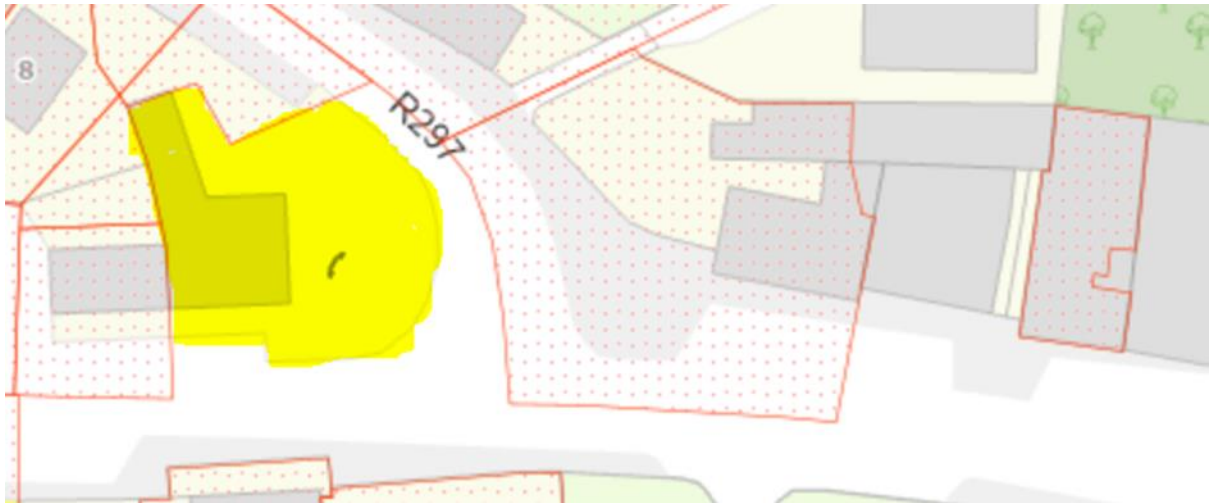

I respectfully request that An Coimisiún Pleanála give careful consideration to the proposed turbine delivery route. Where the feasibility of the stated construction methodology is dependent on unresolved third-party property interests, this is directly relevant to whether the development can be implemented as proposed and should be considered accordingly.

If the proposed turbine delivery route depends upon the use of my private property, the applicant should demonstrate that it has a realistic and lawful means of securing that requirement.

Yours faithfully,

Ashling Munnelly

Date: 18-09-2026
