1.0 INTRODUCTION

- 1.1 This Parking Management Report (PMR) has been prepared by NRB Consulting Engineers Ltd and sets out the proposed car parking management strategy for the proposed Large-Scale Residential Development (LRD) on zoned development lands Temple Hill, Blackrock, Co. Dublin, for Oval Target Ltd.
- 1.2 The local area contains a mixture of services, commercial, schools & residential developments within easy walking or cycling distance, and in these terms has very well established urban transportation characteristics in its own right. The proposed development, being on a prominent & highly accessible site should be considered in this context. A site location plan for the site is included below as **Figure 1.1**.

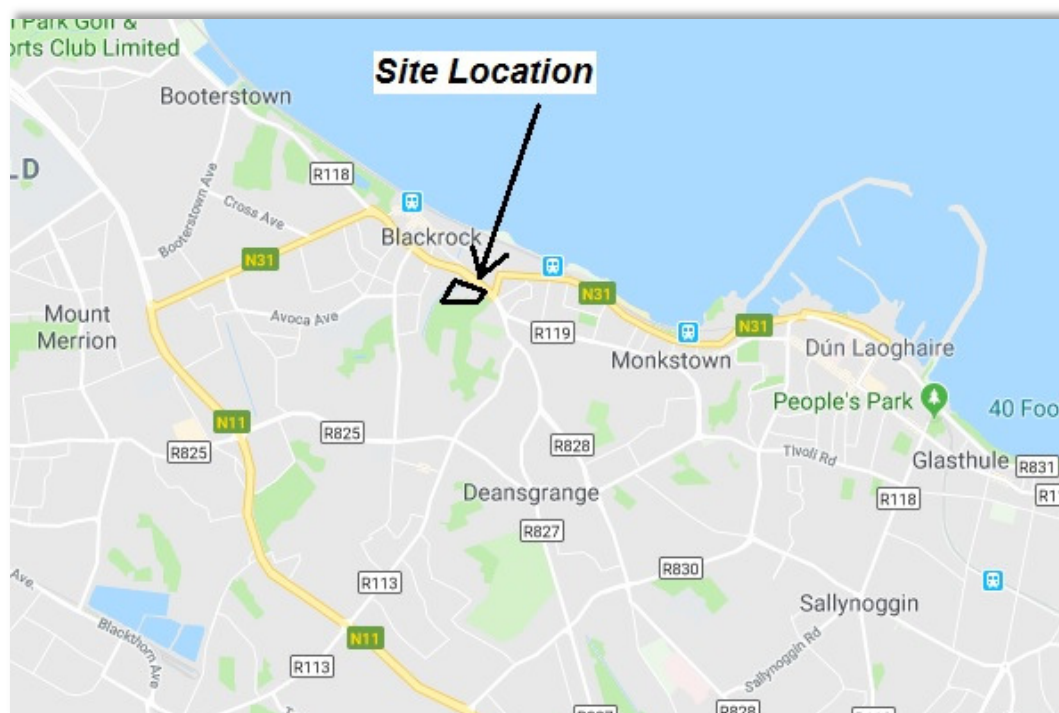

Figure 1.1 - Site Location

- 1.3 The proposed development provides a residential scheme of 414 residential apartments with an ancillary Creche and a small Cafe.
- 1.4 The proposed vehicular access to the development will be via the previously permitted amended existing traffic signal controlled junction at Temple Hill.

- 1.5 An image extract from the Architects Layout Plans showing the proposed development is included as **Figure 1.2** for ease of reference.

Figure 1.2 – Ground Floor Plan Extract (OMP Architects)

- 1.6 This document presents the rationale behind the provision of vehicle parking (including mobility impaired parking, motorcycle parking, and service vehicle parking) and cycle parking being proposed as part of the subject site development proposals. The Report sets out the management measures which will be implemented to allocate the use and control the parking provided at the site.
- 1.7 The document also sets out the principles of the parking management strategy proposed at the development, and should be read in conjunction with the following complementary reports;
- The Traffic & Transportation Assessment (TTA),
 - The Planning Stage Travel Plan (TP), and
 - The DLRCC Cycle Audit Report (addressing amended elements).
- 1.8 The TTA and the TP set out the details of the multi-modal accessibility of the site, together with providing details of the existing conditions pertaining.

2.0 POLICY CONTEXT AND STANDARDS

CAR PARKING POLICY

- 2.1 The **Car Parking** standards originally to be applied in new residential developments in Dún Laoghaire-Rathdown are set out in Table 12.5 of the County Development Plan (2022-2028). Zone 1 standards are defined as "Maximum" requirements, whilst Zones 2/3/4 are not. The provision is to be determined in accordance with the DL RCC Development Plan on a case-by-case basis, depending on the particular circumstances.
- 2.2 **However**, these requirements are now supplemented by Table 3.1 of the recent Compact Settlement Guidelines (CSG) which set out the three different areas and density categories for Dublin City, namely City Centre, City- Urban Neighbourhoods and City - Suburban / Urban Extension. Having reviewed the site location we believe that the site, falls within a **City- Urban Neighbourhoods** (as defined in Table 3.8).
- 2.3 The relevant extract is included below as **Figure 2.1**.

Table 3.1 - Areas and Density Ranges Dublin and Cork City and Suburbs

City - Centre

The city centres of Dublin and Cork, comprising the city core and immediately surrounding neighbourhoods⁶, are the most central and accessible urban locations nationally with the greatest intensity of land uses, including higher order employment, recreation, cultural, education, commercial and retail uses. It is a policy and objective of these Guidelines that residential densities in the range 100 dph to 300 dph (net) shall generally be applied in the centres of Dublin and Cork.

City - Urban Neighbourhoods

The city urban neighbourhoods category includes: (i) the compact medium density residential neighbourhoods around the city centre that have evolved overtime to include a greater range of land uses, (ii) strategic and sustainable development locations⁷, (iii) town centres designated in a statutory development plan, and (iv) lands around existing or planned high-capacity public transport nodes or interchanges (defined in Table 3.8) – all within the city and suburbs area. These are highly accessible urban locations with good access to employment, education and institutional uses and public transport. It is a policy and objective of these Guidelines that residential densities in the range 50 dph to 250 dph (net) shall generally be applied in urban neighbourhoods of Dublin and Cork.

City - Suburban/Urban Extension

Suburban areas are the lower density car-orientated residential suburbs constructed at the edge of cities in the latter half of the 20th and early 21st century, while urban extension refers to the greenfield lands at the edge of the existing built up footprint that are zoned for residential or mixed-use (including residential) development⁸. It is a policy and objective of these Guidelines that residential densities in the range 40 dph to 80 dph (net) shall generally be applied at suburban and urban extension locations in Dublin and Cork, and that densities of up to 150 dph (net) shall be open for consideration at 'accessible' suburban / urban extension locations (as defined in Table 3.8).

Figure 2.1 – Extract Table 3.1 – Areas and Density Ranges from the CSG

- 2.4 Section 3.4 of the CSG sets out how to establish the housing density ranges at various locations, with Step 1 being an assessment of Accessibility to both Services and Public Transport, with Table 3.8 setting out definitions for terms used for defining

accessibility. In terms of Accessibility we have reviewed Table 3.8 (See Extract below as **Figure 2.2**) and note that the Site is located within an easy walk distance of DART (Seapoint being within 550m of the site) and it is also directly on a primary BusConnects Core Bus Corridor route with associated frequent services.

Table 3.8: Accessibility

High Capacity Public Transport Node or Interchange	
• Lands within <u>1,000 metres (1km) walking distance of an existing or planned high capacity urban public transport node or interchange</u>, namely an interchange or node that includes DART, high frequency Commuter Rail¹¹, <u>light rail</u> or MetroLink services; or locations within 500 metres walking distance of an existing or planned BusConnects 'Core Bus Corridor'¹² stop. • Highest densities should be applied at the node or interchange and decrease with distance. • 'Planned public transport' in these Guidelines refers to transport infrastructure and services identified in a Metropolitan Area Transport Strategy for the five cities and where a public authority (e.g. National Transport Authority, Transport Infrastructure Ireland or Irish Rail) has published the preferred route option and stop locations for the planned public transport.	

Figure 2.2 – Extract Table 3.8 – Locational Characteristics in CSG

2.5 In terms of the NTA's PTAL calculation, the site is defined as 'Medium to High Level of Service'. This Examination of the proposed site location therefore confirms that the site can best be described as "urban neighbourhood" solely in the context of the CSG definitions for calculating appropriate car parking provision. We include below the associated Parking Provision Table 3.8 extract from the CSG as **Figure 2.3**.

SPPR 3 - Car Parking	
It is a specific planning policy requirement of these Guidelines that:	
(i)	In city centres and urban neighbourhoods of the five cities, defined in Chapter 3 (Table 3.1 and Table 3.2) <u>car-parking provision should be minimised, substantially reduced or wholly eliminated</u> . The maximum rate of car parking provision for residential development at these locations, where such provision is justified to the satisfaction of the planning authority, shall be 1 no. space per dwelling.
(ii)	In accessible locations, defined in Chapter 3 (Table 3.8) car- parking provision should be substantially reduced. The maximum rate of car parking provision for residential development, where such provision is justified to the satisfaction of the planning authority, shall be 1.5 no. spaces per dwelling.
(iii)	In intermediate and peripheral locations, defined in Chapter 3 (Table 3.8) the maximum rate of car parking provision for residential development, where such provision is justified to the satisfaction of the planning authority, shall be 2 no. spaces per dwelling

Figure 2.3 – Extract SPPR3 – Car Parking Standards in CSG

2.6 Note that the parking provision in the CSG does NOT include car club spaces, set down spaces, public EV Spaces or Accessible spaces, but does include visitor provision. Based on the above, **applying the CSG to the Housing Element** would strictly require the following **maximum**:

- 1 x Car Parking Space per Residential Apartment (414 Spaces),
- Accessible/Set Down and Public EV **in addition** to the above.

2.7 The proposed development includes a total of 236 No. car parking spaces (dedicated to the residential elements), being a parking ratio of approximately 0.57 per unit which we consider to be appropriate in this location.

2.8 20 No Motorcycle spaces are also accommodated exceeding the DLRCC County Development Plan 2022 - 2028 Section 12.4.7 Motorcycle Parking (which requires provision at a rate of 4% of the number of car parking spaces provided).

Bicycle Parking

2.9 It is expected that a significant number of residents of the proposed development will be willing to cycle to work with safe links and secure parking put in place, and that is reflected in the provision of a total of 962 new dedicated cycle parking spaces (with the provision addressed within the enclosed DLRCC Cycle Audit and also in the Car/Bicycle Parking Management Plan). There are now the required number of 209 No. visitor bicycle spaces provided within the landscaping by way of Sheffield Stands at surface level, with the bicycle parking allocation and distribution as outlined in

Table 2.1 below

Block	No. units	No. bedrooms	Residents spaces (long term)	Visitor spaces (short term)	Total bike spaces (required)
Block A1	29	32	32	15.00	47
Block B1	41	62	62	21.00	83
Block B2	30	43	43	15.00	58
Block B3	30	43	43	15.00	58
Block B4	26	42	42	13.00	55
Block C1	10	16	16	5.00	21
Block C2	6	10	10	3.00	13
Block D1	125	269	269	63.00	332
Block E1	61	131	131	31.00	162
Block E2	50	78	78	25.00	103
Block H	6	13	13	3.00	16
Total cycle spaces	414	739	739	209.00	948
			Staff spaces (long term)	Visitor spaces (short term)	
Creche (Block C2)			4	6	10
Café (Block G)			2	2	4
Cycle parking requirement					962
TOTAL CYCLE PARKING PROVISION - residential, creche, café/retail					962

Table 2.1 – Cycle Parking Provision

- 2.10 Within the subject scheme amended elements, the long-stay resident bicycle parking will meet the DLR requirement fully by way of traditional lower level Sheffield Stands with the extra-over Apartment Guideline requirement by way of the upper tier or double stack. Visitor parking is being provided in accordance with the National Apartment Standards by way of Sheffield Stands designed and located within the Landscaping, with 209 No external visitor parking spaces provided.
- 2.11 The New Apartments Guidelines also states that any deviation from these standards shall be at the discretion of the planning authority and shall be justified with respect to factors such as location, quality of facilities proposed, flexibility for future enhancement/enlargement, etc.
- 2.12 The high quality of the cycle parking is reflected in the provision of a total of 962 No. new dedicated cycle parking spaces. Much of the cycle parking are by way of Sheffield stands in line with DLR Cycle Policy preference for same, with double stackers above the Sheffield Stands internally (as appropriate). This high provision of bicycle parking also supports the case for the slight reduction in car parking provision.

3.0 CAR PARKING PROVISION

Overview

- 3.1 The car parking provision is a combination of basement and at-grade, with the justification for the numbers provided as set out in the CSG outlined above. A summary parking schedule has been extracted from the planning information and is included below as **Figure 3.1**.

Car parking provision-Residential	spaces	accessible spaces	Total spaces
Surface level car parking	81	7	88
Basement A (level -1)	42	2	44
Basement B (level 0)	34	2	36
Basement D (level -1)	64	4	68
TOTAL RESIDENTIAL CAR PARKING SPACES	221	15	236
Number of apartments	414		
Car parking provision-residential	(number of spaces 236 / number of units 414)		
	0.57 car spaces per residential unit		
Accessible parking space provision 5% of spaces	236 x 5% = 11.65 spaces		
	Accessible residential car spaces provided = 15 spaces		
Car parking provision - Creche	spaces	accessible spaces	Total spaces
Surface level car parking - creche	7	1	8
TOTAL CRECHE CAR PARKING SPACES	7	1	8
Accessible parking space provision 5% of spaces	8 x 5% = 0.4 spaces		
	Accessible creche car spaces provided = 1 space		
TOTAL CAR PARKING PROVISION - residential and creche	244		

Figure 3.1 – Location of Car Parking & Distribution

- 3.2 All of the car parking spaces have been designed with accessibility in mind, having being designed in accordance with best practice and current design guidance. The parking spaces have been TRACKed using proprietary swept path software to ensure ease of accessibility. Whilst there are dedicated allocated EV spaces shown on the OMP Plans consistent with the DLRCC requirements, it is nonetheless proposed that Electric Vehicle (EV) charging will be provided for in a flexible manner as outlined below.
- 3.3 All of the car parking spaces provided can easily be upgraded to also allow conversion to **Electric Vehicle** charge spaces. In the case of a residential apartment development of the nature proposed, with specific spaces ultimately dedicated to specific apartments, it is considered appropriate to facilitate the retrofitting of spaces, based on demand following occupation, rather than a % of spaces being defined as such and provided from the outset.
- 3.4 The entire car park of the subject scheme is therefore to be ducted or provided with conduits ready to accept future cabling to serve a charging point for every car space, as demanded. On the ground floor, ducts can be run in the ground where charging points can also be mounted and conduits can be run on walls within basements.

- 3.5 Where residents request a charging point to be installed, the relevant charging point will be pre-wired back to their home electricity meter in the designated meter location. The socket point will have a lockable cover on it so that only that resident may use the power point. This provision around the entire parking areas allows future charging points to be installed at any of the car parking spaces with minimum works as and when required.
- 3.6 There are also 19 No dedicated visitor / loading spaces at ground floor level, which can be suitable signed and controlled adjacent to apartment blocks to aid home deliveries for the residential elements.

4.0 BICYCLE PARKING

- 4.1 It is anticipated that a very significant number of residents can be encouraged to cycle to work and school etc., with the safe links and secure parking which will be in place. There are a total of total of 962 no. new dedicated cycle parking spaces. The number of spaces provided meets the requirements as set out in the National Apartment Guidelines and the DLRCC Development Plan.
- 4.2 There is no proposed change to the approved permitted Bicycle Parking Provision within the unchanged Blocks A1, B1, B2, B3 and B4. Conscious of course that the entire Visitor Bicycle Parking is now being provided by way of 209 No spaces within the landscaping.
- 4.3 For the now-amended elements, extracts showing the bicycle storage areas for Long Term Residential Storage in the various locations (which are geometrically compliant with the NTA CDM Design Guidance and which generally provide the DLRCC requirement at lower level by way of Sheffield Stand and the 'extra over' Apartment Guideline requirement by way of Gas-Strut assisted upper tier) are included below as **Figures 4.1 & 4.2**, showing the parking 'typeology'. In addition, the area is accessed by way of a compliant 1:14 access ramp.

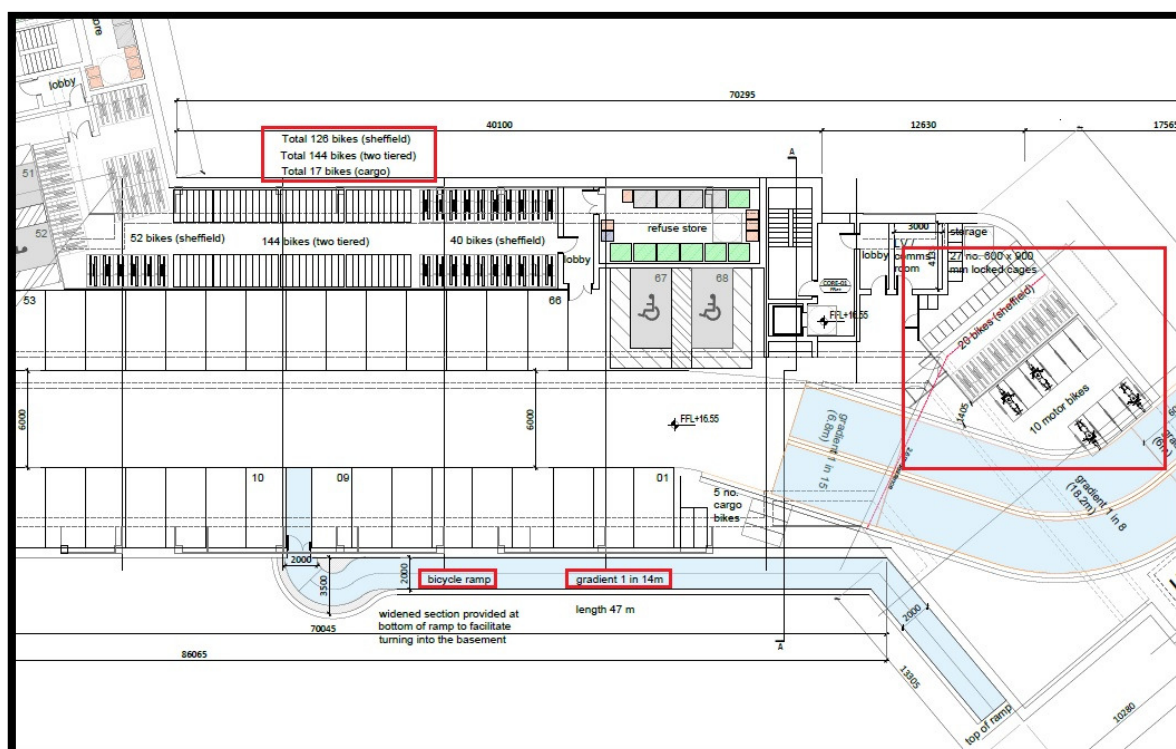

Figure 4.1 – Location and Provision of Cycle Parking, Block D1

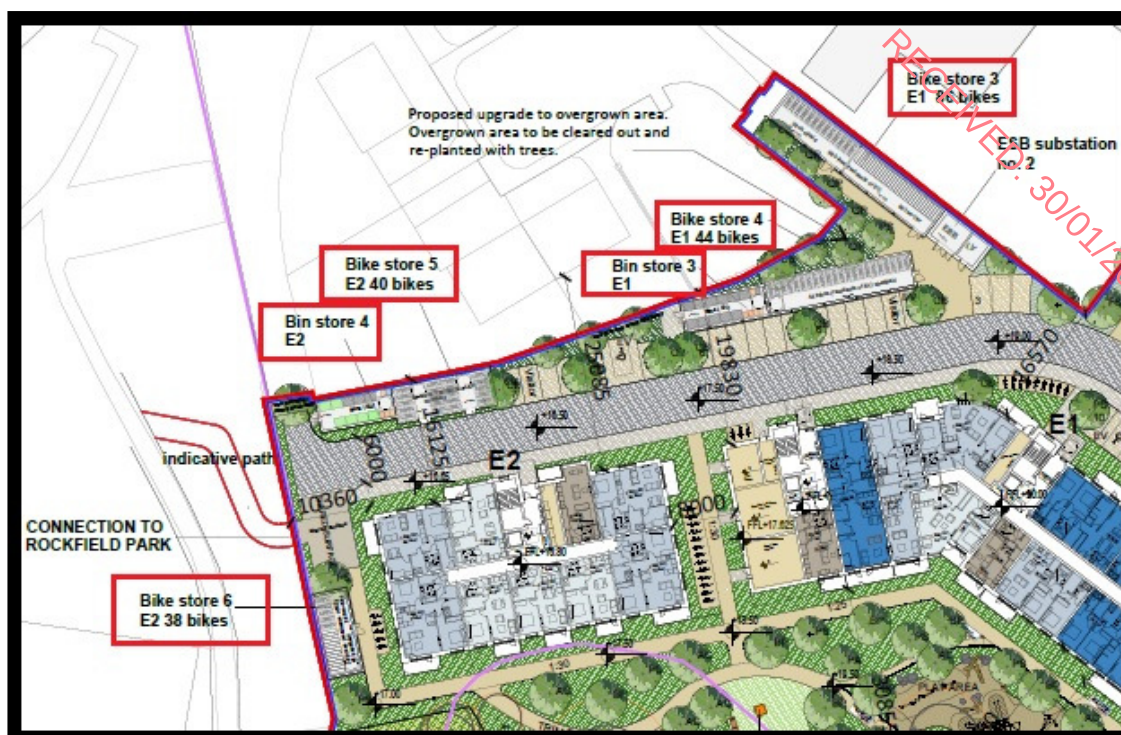

Figure 4.2 – Location and Provision of Cycle Parking, “New” Stores Blocks E1 and E2

- 4.4 There is additional new secure residential Bicycle parking provided in the external secure shelters at Blocks E1 and E2, as shown in **Figure 4.2**. The spaces within these stores are geometrically compliant with the NTA CDM Design Guidance and will provide the DL RCC requirement at lower level by way of Sheffield Stand and the ‘extra over’ Apartment Guideline requirement by way of Gas-Strut assisted upper tier
- 4.5 The long term secure residential cycle parking spaces are all therefore within fob controlled storage areas with locking facilities internally. They are beneficially in areas subject to passive surveillance and they will of course also be monitored by CCTV.
- 4.6 The visitor parking spaces, in the public realm (total no. 209), are all provided in the form of traditional ‘Sheffield Stands’ avoiding double stack systems. All of the visitor bicycle parking is accessible to all.
- 4.7 It is acknowledged that for visitors, cyclists need to be confident that their cycles will not be tampered with, and in these terms the cycle storage are in secure areas, all of which will be monitored through a combination of passive surveillance or by CCTV. An extract showing the typical visitor bicycle storage areas in the public realm, which are standard Sheffield Stands and which are therefore compliant with the NTA CDM Design Guidance is included below as **Figures 4.4**.

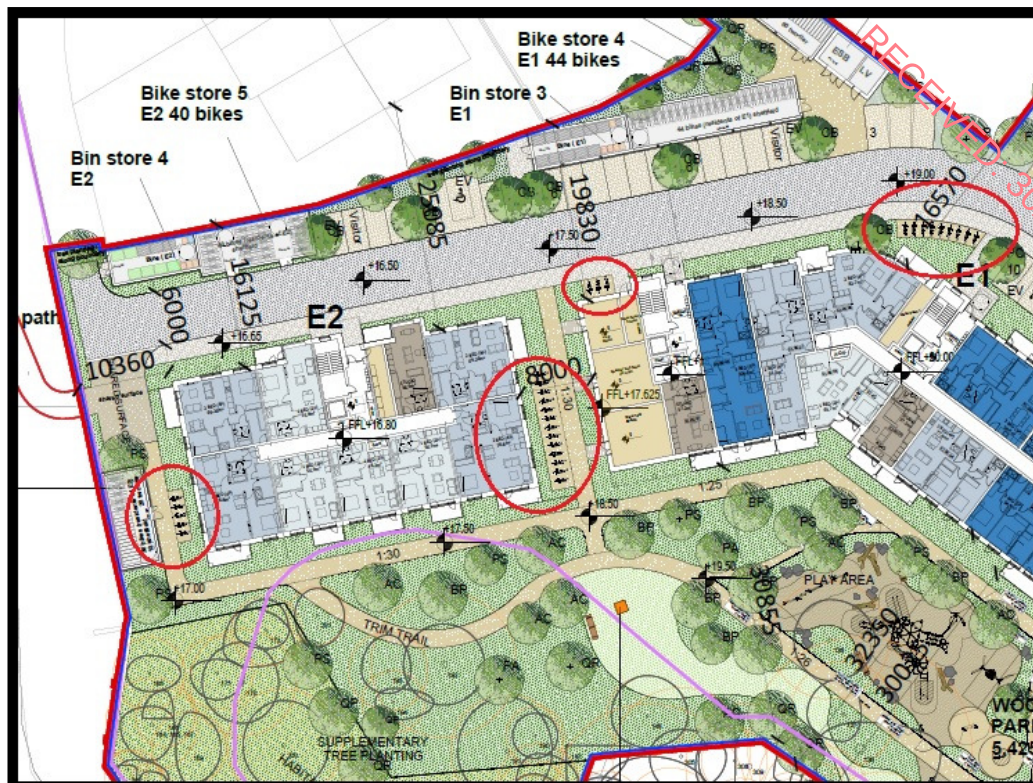

Figure 4.3 – Typical Provision of Visitor Bicycle Parking (Circled Red)

- 4.8 Double Tier Cycle Stands are gas-strut assisted at the upper level which aids smooth usage of the bicycle storage.
- 4.9 It is important to cultivate a cycling culture, through the implementation of appropriate infrastructure and promotional measures, which positively encourages all members of the community to cycle at all life stages and abilities as a mode of sustainable transport that delivers environmental, health and economic benefits to both the individual and the community.

5.0 **INITIATIVES FOR SUSTAINABLE TRAVEL**

5.1 It is acknowledged that residents may require a vehicle of some sort for purposes other than commuting on an everyday basis, and simply reducing car parking would not be realistic without implementing alternative measures to accommodate residents and visitors alike. Therefore the following alternative arrangements are proposed in support of the slightly reduced car parking and car ownership levels within the development;

- A working Travel / Mobility Management Plan once Residents are in place,
- Increased & Well Designed Cycle Parking Provision,
- Parking Management and Control (Refer enclosed drawing and details),
- Dedicated legal controls within Sales or Letting Agreements associated with all Residential Apartments, and

Mobility Management Plan

5.2 A revised outline MMP has been prepared and should be read in conjunction with this Parking Strategy Report. Separate MMPs will be further developed at occupation & operational stage by the Development Management Company.

Increased Bicycle Parking

5.3 Increased bicycle parking provides a realistic alternative transport mode when there is restricted car parking provision. As previously set out, the bicycle parking provision meets the significant requirements of the National Apartment Guidelines. With 414 apartments the provision of 962 No. bicycle parking represents a net provision of 2.3 bicycle parking spaces per apartment. Copious visitor bicycle parking (209 No) is included and is now being provided fully at ground floor level.

Parking Management Strategy

5.4 A key component in ensuring the efficient controlled operation of any car parking is an active and enforced parking management strategy. In this case, this strategy will be managed by the Development Management Company with the specific details as set out in a revised Section 6.0 of this Report.

Legal Controls – Sales/Letting Agreements

- 5.5 Dedicated Clauses can and will be contained within Sales or Letting Agreements for all Residential Apartments, which specifically address both Car & Bicycle Parking. In the event where a parking space is an entitlement as part of a Sale or Letting Agreement, this will be clearly enunciated by way of a dedicated clause, with the specific numbered space or spaces referenced with mapping provided to illustrate the relevant space.

6.0 MANAGEMENT OF PARKING FACILITIES

Introduction

- 6.1 A key component in the effective operation of on-site car parking is an active and enforced parking management strategy. This strategy will be implemented by both the Developer and the Management Company. The Management Company will be charged with responsibility for the control of parking and access within the site.
- 6.2 It is intended that the entire proposed development will be actively marketed as 'Reduced Car Dependency'. Consequently, all marketing material for the development will make it clear that the apartments have reduced car parking availability and will also highlight the alternatives available.
- 6.3 Dedicated Clauses will be contained within Sales or Letting Agreements for all Residential Apartments (and for the commercial tenants), which specifically address Car and Bicycle Parking. In the event where a parking space is an entitlement as part of a Sale or Letting Agreement, this will be clearly enunciated by way of a dedicated clause, with the specific space or spaces referenced in Agreements, with mapping provided & referenced therein to identify the relevant space.
- 6.4 Accordingly, unless they are dedicated to individual Residential Apartments or the commercial elements, on-site parking will otherwise remain in the control of the Management Company. A car parking management regime will be implemented by the Management Company to control and manage access to the parking bays, including visitor bays which can be used as short stay spaces for home deliveries - thereby actively managing the availability of on-site car parking for each of the following user profiles;
- Residents of the Apartments,
 - Visitors,
 - Deliveries (eg E-Shopping).

Car Parking Allocation

- 6.5 As stated above, all residents will be advised that unless it is otherwise stated in the Lease or Sales Agreement, there will be no car parking available on the site.
- 6.6 In the event that a parking space is part of a Legal Agreement, the apartment resident will have a parking permit for the particular dedicated space to display in the vehicle window.

- 6.7 The Management Company will be responsible for the day-to-day management of car parking operations, including the use of the defined visitor parking bays which will be pre-booked as appropriate.

Car Parking Access/Control

- 6.8 If necessary in the longer term, access to the basement parking areas can be controlled by a combination of barriers to ensure that only permitted vehicles can gain access. If required, a barrier can be safely located, set back sufficiently so as not to result in any hazard or obstruction (but this is considered unnecessary at this stage).
- 6.9 In such circumstances, access to approved users can then be facilitated by coded keypad entry/fob control or Automated Number Plate Recognition (ANPR) technology which only permits registered permitted vehicles to enter.
- 6.10 A clamping enforcement regime will also be in place within the entire site to ensure that parking restrictions are adhered to.

7.0 CONCLUSION

Based on the information contained within this Parking Strategy Report, it is considered that the car and bicycle parking provision at the subject development is appropriate and sufficient. This is supported by a high number of bicycle parking spaces at the development, combined with controls that are to be put in place to manage use of the spaces, including Working Mobility Management Plans, Legal Allocation of Spaces to Residents and Commercial elements and the day-to-day management / clamping of parking being a role for the management company.

2	1.0	Introduction
3	2.0	Bicycle Parking Quantum Assessment
5	3.0	Bicycle Parking Layout Audit/Review

RECEIVED: 30/01/2026

INTRODUCTION

As part of the commission NRB Consulting Engineers Ltd were appointed to assess the proposed cycle parking and provide a cycle audit on the residential apartment development at Temple Road, Monkstown, Blackrock, Co Dublin.

The proposed development will consist of revisions to the development previously permitted under SHD ABP-303804-19 (291 no. units were permitted) to provide for a new residential scheme of 414 no. residential units in total. This report assesses the Bicycle Parking provision at the now altered buildings, with the Building content and associated Bicycle Parking for the units adjacent to and parallel with Temple Road being unaltered from the already permitted scheme (Buildings A1, B1, B2, B3 and B4).

The overall Masterplan Layout is included below as Figure 1.1 for ease of reference.

Figure 1.1: Landscape Masterplan (SDA Drawing No. 25-628-SDA-DD-DR-GF-001)

This following sections represents the Bicycle Parking Audit/Review in accordance with DL RCC Requirements.

2.0 BICYCLE PARKING QUANTUM ASSESSMENT

- 2.1 The overall site provision includes a total of 962 new dedicated cycle parking spaces. There are now the required number of 209 No. visitor bicycle spaces provided within the landscaping by way of Sheffield Stands at surface level, with the bicycle parking allocation and distribution as outlined in **Figure 2.1** below.

Block	No. units	No. bedrooms	Residents spaces (long term)	Visitor spaces (short term)	Total bike spaces (required)
Block A1	29	32	32	15.00	47
Block B1	41	62	62	21.00	83
Block B2	30	43	43	15.00	58
Block B3	30	43	43	15.00	58
Block B4	26	42	42	13.00	55
Block C1	10	16	16	5.00	21
Block C2	6	10	10	3.00	13
Block D1	125	269	269	63.00	332
Block E1	61	131	131	31.00	162
Block E2	50	78	78	25.00	103
Block H	6	13	13	3.00	16
Total cycle spaces	414	739	739	209.00	948
			Staff spaces (long term)	Visitor spaces (short term)	
Creche (Block C2)			4	6	10
Café (Block G)			2	2	4
Cycle parking requirement					962
TOTAL CYCLE PARKING PROVISION - residential, creche, café/retail					962

Figure 2.1 – Overall Bicycle Parking Provision on the site

Bicycle Parking

- 2.2 The Dún Laoghaire - Rathdown Cycle Policy sets out the cycle parking requirements for developments. Table 4.1 of the Cycle Policy confirms that the minimum cycle parking requirement is 1 long stay space per unit plus 1 short stay visitor space per 5 units. The National Apartment Guidelines requires 1 Residential Bicycle Space per Bedroom plus 1 visitor bicycle Space per 2 Units.

Table 4.1 Cycle parking for residential development		
Residential Development type	1 short stay (visitor) parking space per: (Minimum of 2 spaces)	1 long stay parking space per: (Minimum of 2 spaces)
Apartments, Flats, Sheltered housing	5 units	1 unit

Figure 2.2 - Extract Table 4.1 DLRCC Standards for Bicycle Parking

- 2.3 The assessment of the required provision on a 'Block-by-Block' basis is as illustrated below as **Figure 2.2**. The intention being to provide the DLRCC Residential requirement by way of internal secure Sheffield Stand, visitor parking by way of external Sheffield Stand, and

with the 'Extra-over' requirements of the National Apartment Guideline excess generally provided by way of double tier gas-strut assisted provision.

Block	No. units	No. bedrooms	Residents spaces (long term)	Visitor spaces (short term)	Total Spaces (required)
Block A1	29	32	29	6	35
Block B1	41	62	41	8	49
Block B2	30	43	30	6	36
Block B3	30	43	30	6	36
Block B4	26	42	26	5	31
Block C1	10	16	10	2	12
Block C2	6	10	6	1	7
Block D1	125	269	125	25	150
Block E1	61	131	61	12	73
Block E2	50	78	50	10	60
Block H	6	13	6	1	7
Cycle spaces	414	739	414	83	497

Figure 2.3 - Extract Schedule of Accommodation, Bicycle Parking

2.4 A total of 962 no. bicycle parking spaces are proposed at both basement and surface level. Residents long term bike spaces on Sheffield stands are provided in compliance with requirements of the Development Plan (being 414 no. spaces by way of Sheffield stands). Visitors short term bicycle spaces on Sheffield stands are provided in compliance with requirements of the Development Plan (Being 83 no. spaces by way of Sheffield stands). Additional visitor short term bicycle are provided in compliance with the Apartment Guidelines (2025) (By way of Sheffield stands (Being 126 no. spaces). There are 14 No. stands by way of Sheffield Stands at the Creche & Café. (Total spaces on Sheffield stands is 637 no. spaces. Total spaces on two-tier stands = 325 no. spaces.

2.5 In terms of breakdown of the Bicycle Spaces now provided:

- Blocks H, C1 & C2 has a provision of 40 No Bicycle Spaces by way of enclosed Sheffield Stands, with a provision for 2 x Cargo Bikes,
- Block D1 will have 144 No. by way of double stack, 126 No. by way of Sheffield Stand, with a provision for 17 x Cargo /Special spaces. These are all accessed by way of the dedicated 1:14 Ramp.
- Block E1 has 60 No. by way of double stack and 70 No. by way of Sheffield Stand.
- Block E2 has 38 No. by way of double stack and 50 No. by way of Sheffield Stand.

2.6 In terms of the provision the numbers are consistent with the normal DLRCC requirement, with spaces available to include additional special bike spaces, easily adaptable in the case of demand.

3.0 BICYCLE PARKING LAYOUT AUDIT / REVIEW

- 3.1 An extract from the plans showing the revised storage areas are included below as **Figures 3.1, 3.2 and 3.3.**

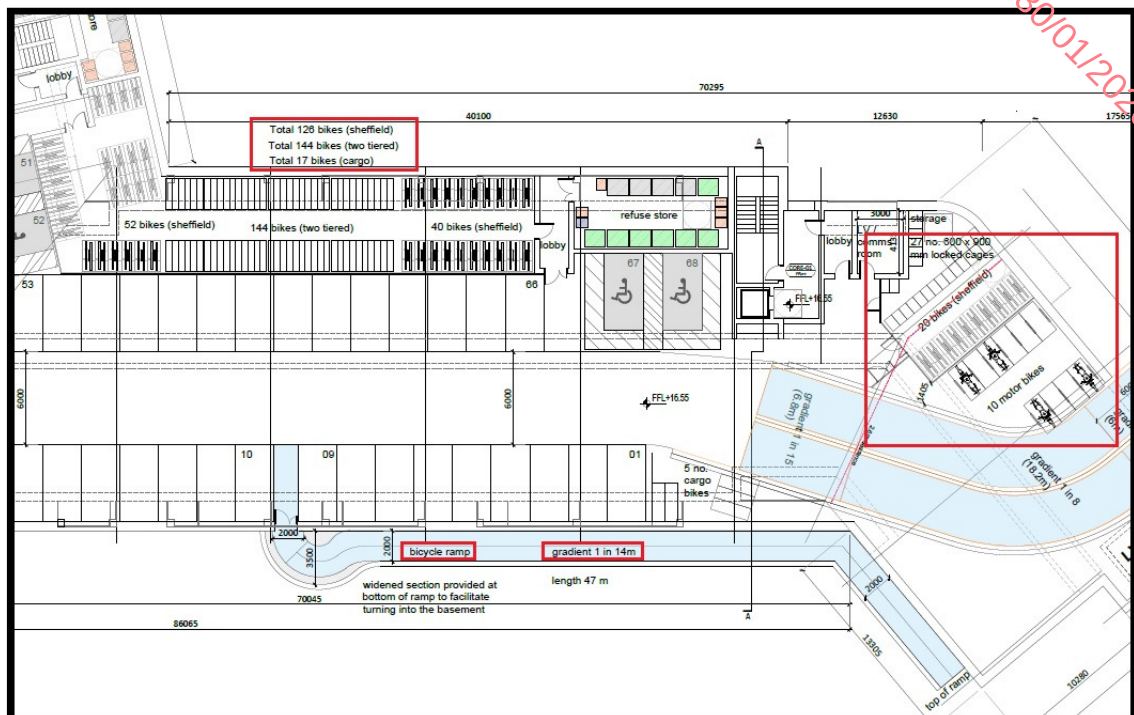

Figure 3.1 – Location and Provision of Cycle Parking, Block D1

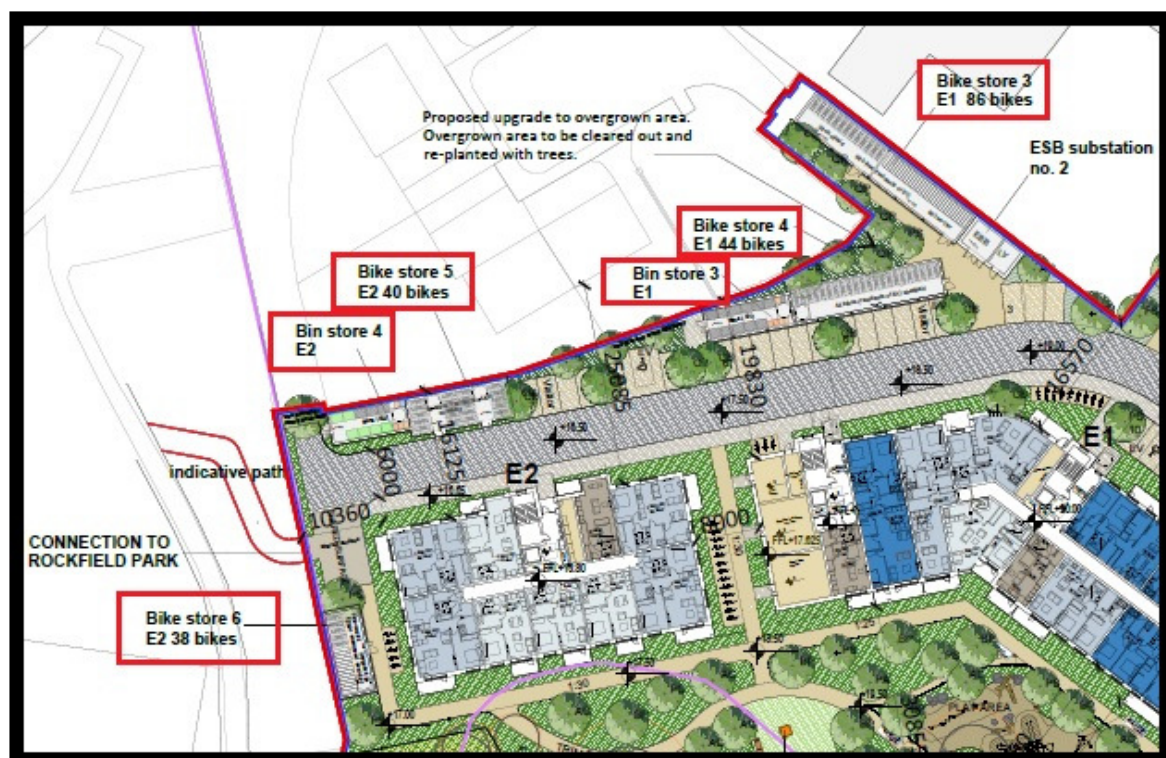

Figure 3.2 – Location and Provision of Cycle Parking, "New" Stores Blocks E1 and E2

Figure 3.3 – Location and Provision of Cycle Parking, Blocks H, C1 and C2

- 3.2 Externally, the 209 No. Sheffield Stands within the landscaping are provided at 1m centres are therefore confirmed as meeting the DLRCC required dimensions as set out in their guidance reproduced below as **Figure 3.4**

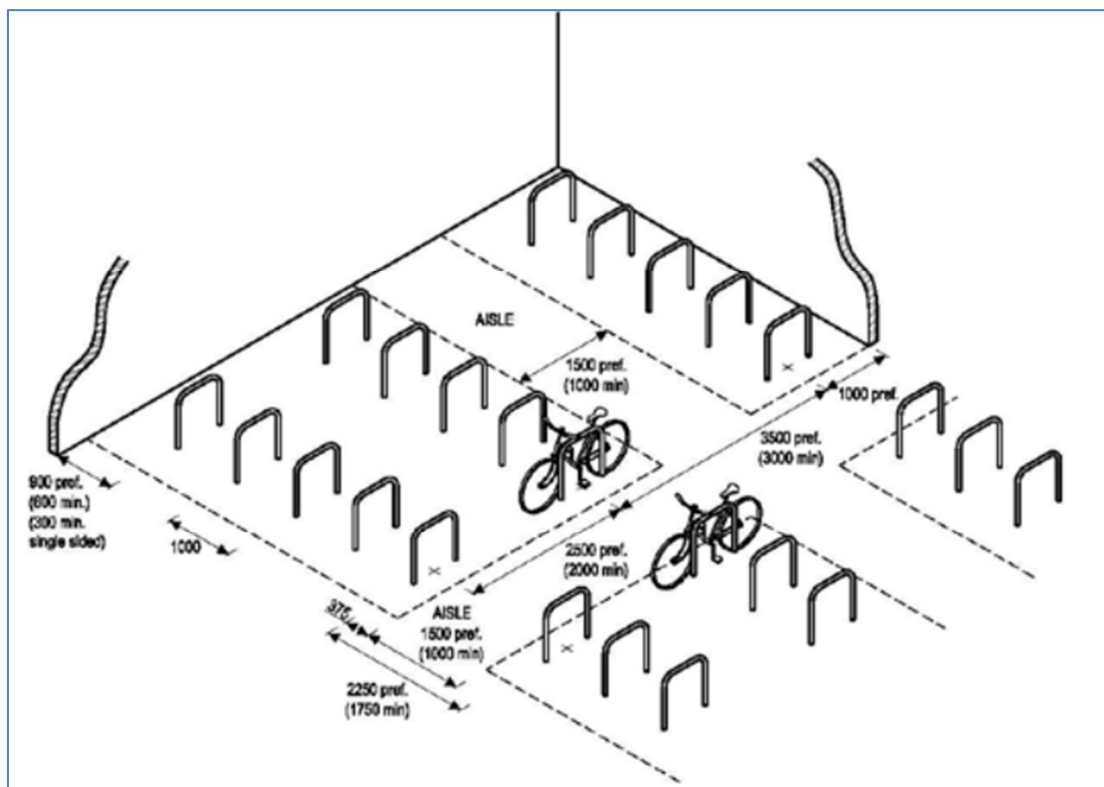

Figure 3.4 – Extract DLRCC Standards for Bicycle Parking

- 3.3 Being double sided, the total provision of 209 No. spaces exceeds the DLRCC visitor requirement to provide 83 cycle spaces by way of Sheffield Stands (DLRCC requirement being 1 per 5 units).

Table 3.1 – Formal Cycle Audit (Section 12.4.6.2) of the Dev Management Guidelines

12.4.6.2 Cycle Parking Assessment Criteria	Response
Is the number of cycle parking spaces and footprint adequate and is there suitable provision for parking of outsized formats (cargo bikes etc)?	Yes – cycle parking provided is in accordance with the DLR Cycle Policy numbers / types and spacing guidance as set out herein.
Is the location of cycle parking convenient, appropriate and secure with adequate provision for covered parking?	Yes – Visitor spaces are conveniently located within the landscaping and can be covered where necessary. The visitor parking is all subject to high quality passive surveillance, located dispersed through the scheme.
Is the cycle parking area accessible in terms of dedicated access routes with ramps and/or kerb dishing where required?	Yes - cycle parking areas area are accessible, with direct easy access available by way of flat or ramped surfaces to all residential and visitor cycle parking.
Do the internal cycle access routes connect well with off-site facilities – existing & proposed?	Yes –connects to off-site cycle facilities, existing & proposed on Temple Rd.
Is there adequate and appropriately designed and integrated provision for ancillary cycling and pedestrian facilities including showers, locker / changing rooms and drying areas?	Yes – all contained within the private apartment Units

- 3.4 We have further assessed the Bicycle Parking provided, with additional comments under the Cycle Audit provided below as **Table 3.2**.

Table 3.2 – Cycle Audit (Additional Assessment Criteria)

Other Cycle Parking Assessment Criteria	Response
Consideration should be given to requiring the provision of cycle parking-related directional signage, in particular for storage and commercial parking facilities. Bike lockers, showers and changing rooms should be available at destination storage facilities (private).	Given the type and small scale of the scheme, dedicated directional signage is not considered necessary. Visitor Cycle parking is conveniently located and as such visitor cycle parking is evident to arrivals, so that the travel distance to pedestrian access doors is acceptable in our opinion.
For short-term cycle parking (e.g. for customers or visitors), cycle parking is required at ground level. This should be located within 25 metres of the destination in an area of good passive surveillance. Weather protected covered facilities should be considered where appropriate.	Yes – at ground level conveniently located and by way of Sheffield Stands so that the travel distance to pedestrian access doors is short in all cases.
For long-term cycle parking secure covered cycle parking is a requirement. This should be conveniently located within 50 metres of the destination and located near building access points where possible.	Yes – Secure Enclosed Cycle Long Term Bicycle Parking is provided within the dedicated enclosed compounds or basement, with a numbering system to be deployed so that they are within closest walking distance of the allocated units.
In all cases it is a requirement to provide showers, changing facilities, lockers and clothes drying facilities, for use by staff that walk or cycle to work. CCTV cameras or passive surveillance of car parks and cycle parks may be required for personal safety and security considerations.	Yes – contained within the residential accommodation. Yes, CCTV can be deployed and Passive surveillance will also assist.

A	Bus Timetable Information <i>(Correct at Time of Collating Data and Writing Report)</i>
B	DART Timetable Information <i>(Correct at Time of Collating Data and Writing Report)</i>

1.0 INTRODUCTION

- 1.1 NRB Consulting Engineers Ltd were appointed to address the Bus and DART Demand and capacity associated with a planning application for a proposed residential development on lands at Temple Hill, Monkstown, Blackrock, Co. Dublin.
- 1.2 The proposed development consists of the construction of a residential development principally comprising 414 No. apartments.
- 1.3 The NRB commission on the project consists of this assessment of current and future Bus and DART capacity, a 'Bus and DART Capacity Assessment Report'.
- 1.4 Whilst this Report contains an assessment of Bus & DART Capacity and demand, it should be remembered that Service Providers are commercial in nature, running their businesses based on current demand rather than medium to longer term future demand. In simple terms, commercial services are provided based on actual existing footfall rather than potential future demand. If there is an increased demand for services (for example with full or over-capacity services), Operators then generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated by the services.
- 1.5 Notwithstanding the above, the purpose of this Study is to review the potential impact of the development upon the existing and future bus and DART services in the vicinity of the site.
- 1.6 The analysis of the existing and future services is based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) 2022 Small Area Map Data, available through the SAP online mapping tool. This data was used to quantify the anticipated demand for services as a result of the proposed development locally, based fully on adjacent CSO Statistical Small Areas.
- 1.7 The first step was to review the current and future planned services. The bus stops within an easy walking distance of the subject site were identified, with the current bus services, bus service frequency and capacity studied and assessed. Similarly, the demand for DART services at the nearest stop (Seapoint) was assessed based on current provision.
- 1.8 *BusConnects* is expected to be implemented within a relatively short timeframe. This initiative will reconfigure the bus services for the Greater Dublin Area completely. This

Study therefore considers both the existing bus network and the planned *BusConnects* Network.

- 1.9 The current and future improved DART services are also considered within the Report.
- 1.10 The Study focuses on the peak commuter periods for the development, and in particular the busiest weekday AM commuter peak demand for services – this represents the period of highest demand on the network consistent with the TII Traffic & Transport Assessment Guidelines (May 2014). The methodology assumes that the trips will be assigned to the nearest available bus stops and of course to Seapoint DART Station, which is closest DART Station, and which has good alternative transports links to it already in place

2.0 BUS/DART LOCATIONS AND SERVICES (CURRENT AND FUTURE)

CURRENT SERVICES

2.1 For commuting, a walk distance to/ from Bus Stops of up to 700m-1km is generally considered to be acceptable. For the purposes of this assessment however we have selected the current bus services within the immediate perimeter of the site running along Temple Road / Temple Hill only.

2.2 These services include the following:

- Dublin Bus Service #4 (Monkstown to Heuston Station / Return),
- Dublin Bus Service #7 (Mountjoy Sq to Brides Glen / Return),
- Dublin Bus Service #7A (Mountjoy Sq to Loughlinstown / Return), and
- G-Ahead Service S8 (Orbital Route Kingswood Ave – Dún Laoghaire).

Figure 2.1 – Existing Bus Stops & Site Proximity (Correct at Time of Writing)

- 2.3 The current timetable for each of these locally available bus services (which are current and correct at the time of writing) are appended to this Report. All of these existing bus services stop within an easy walking distance of the site as illustrated above on annotated Google Images as **Figure 2.1**.
- 2.4 The scheme also delivers pedestrian and cyclists connections directly to Temple Road / Temple Hill, providing for permeability for all pedestrians and accessibility to Bus services as illustrated above and to DART services, as illustrated below.
- 2.5 As an illustration of walk time to DART, we include below the typical *Google* walk time to Seapoint Station as **Figure 2.2**, and the typical *Google* Cycle time as **Figure 2.3**. In our experience, a significant proportion of residents within any residential scheme are cyclists, & the cycling/walking distance to/from the DART will ensure it is a viable alternative for use, for travel towards the city centre or south towards Bray.

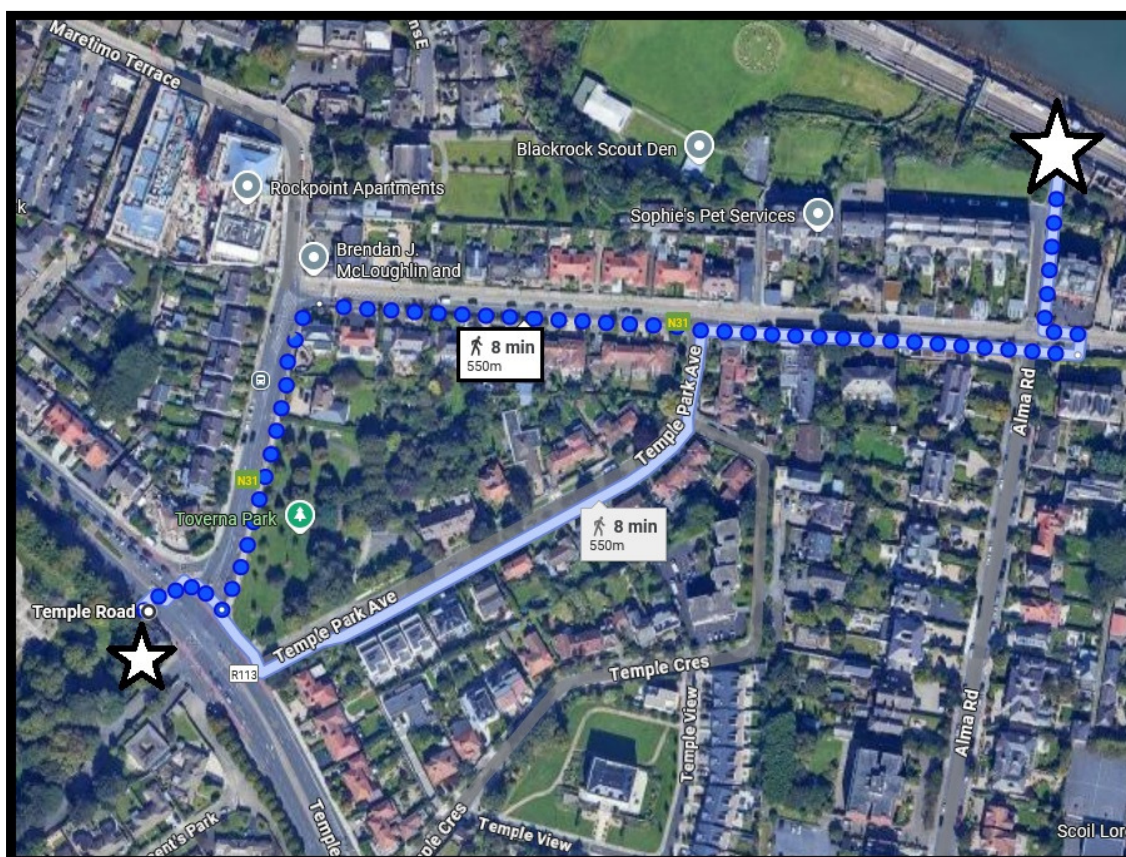

Figure 2.2 – Illustration of Walk Time to DART (8-10mins) (Google)

Figure 2.3 – Illustration of Cycle Time to DART (2-3 mins) (Google)

2.6 In terms of the **Existing Bus Service** Provision and Service Frequency, the Timetables for each of the existing Services are appended hereto. These details have been collated and are summarised below as **Table 2.1**, extracting information relating to the busy 7-9am weekday AM Commuter Period.

Table 2.1; - Buses within Easy Walk Distance, 7-9am Approx Capacity.

Bus #	Route	Operator	No. Buses 7-9am (Mon-Fri)	Total Cap (7-9am)	Thru City Core (Y/N)
4	Monkstown Ave to Heuston & Ret	Dublin Bus	10	910	Y
7	Mountjoy Square to Brides Glen & Ret	Dublin Bus	5	455	Y
7a	Mountjoy Square to Loughlinstown & Ret	Dublin Bus	4	364	Y
S8	Tallaght to Dún Laoghaire Orbital	Go Ahead Ire	5	455	N
Total (7-9am) All Routes			24	2184	
Total (7-9am) Routes Via City Centre			19	1729	

2.7 The above demonstrates that the site is clearly accessible to a significant existing bus provision, with a capacity of approximately 2,184 bus seats during the 7-9am commuter peak period, all within an easy walk-distance of the site.

- 2.8 And the bus services provide for connectivity to Public Transports Hubs and Interchanges (Rail, Intercity Bus Services, DART etc) located within the City Core.
- 2.9 The **Dublin Area Rapid Transit (DART)** is the long established electric rail system running along the east coasts between Greystones to the south and Malahide or Howth in the north. It is a quick and easy way to get around Dublin. The service operates on a frequency of approximately every 10 minutes all day. The full DART timetable can also be found appended hereto.
- 2.10 We have assessed the DART Service intervals during the weekday 7-9am period, and the approximate total DART people capacity is then illustrated below as **Table 2.2**.

Table 2.2; - DART Approximate Existing Capacity Each Way (7-9am)

DART Capacity/Demand Details	No. 7-9am	People Capacity
Commuter Services Leaving Seapoint Station 7-9am*	10	660
Total Approx People Capacity 7-9am	6600	

- 2.11 The Transport for Ireland & Irish Rail websites (and Mobile Phone Apps) now provide a service that allows customers access up to date real information for Arrivals and departures on a stop-by-stop basis. This information on Arrivals and Departures allows customers to plan their arrivals and departures & associated walk/cycle times accurately, facilitating efficient journey planning (and minimising congestion on platforms or stops).
- 2.12 Transport for Ireland also provides an interactive online tool that enables the user to plan journeys, with real time information on Bus & Rail services on a nationwide basis. The DART Trains have been recently upgraded and extended with new carriages increasing the capacity of each train. We have also set out below details of the proposed future improvements to the DART Services and also bus service improvements locally as part of *Bus Connects* plans.

FUTURE BUS SERVICES

- 2.13 In terms of **Future Planned Services**, the NTA have recently published details of the overall bus network for the GDA, the 'New Dublin Area Network' - showing Spine Routes, Feeder and Orbital Routes. An extract from the NTA Plans showing the site location is included below as **Figure 2.4**. It should be noted that the core corridor past the site has received planning permission from An Bórd Pleanála (now ACP).

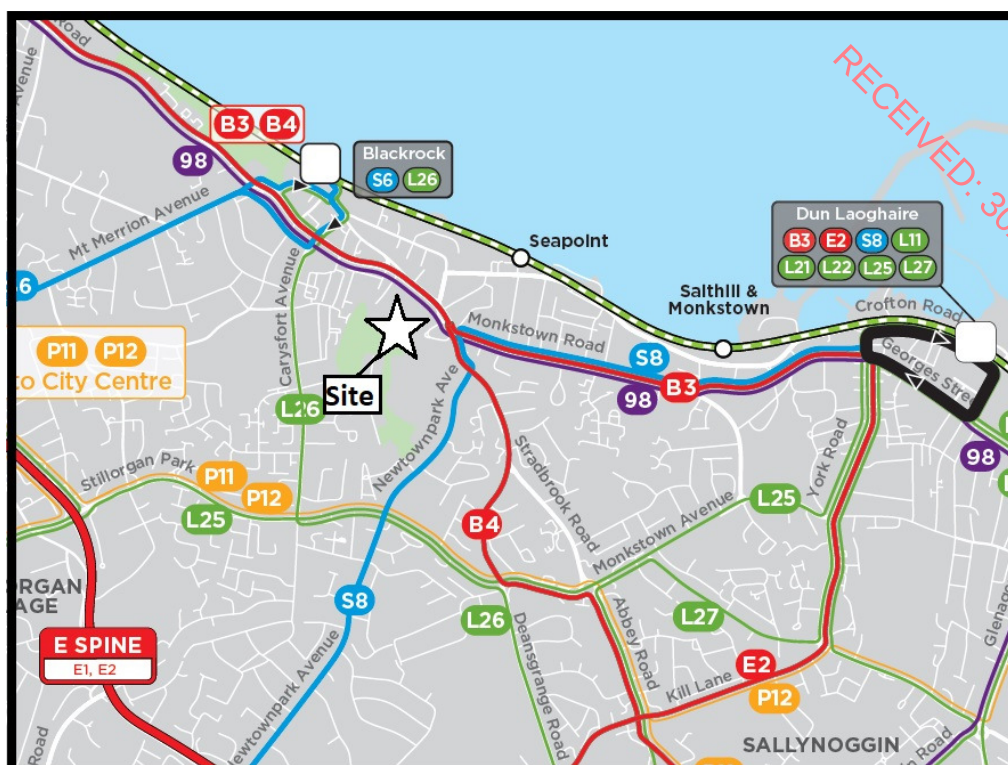

Figure 2.4 – Extract Current NTA Bus-Connects Network Plan and Site

2.14 This network shows that the site's accessibility to bus services will be further enhanced, with a high frequency and permeable service to be provided. The site is located served by **Main Spine Route B3 & B4 (Red)** and also several other **Local Routes S8 (Blue)** and **98 (Purple)**. The expected frequency of the Spine Routes are as illustrated in the extract included as **Figure 2.5** below. The site is therefore also ideally placed in terms of future high frequency bus availability, based on the NTAs published Plans.

New Dublin Area Bus Network / Network Implementation																
Spine frequency tables																
The number in each box is the expected time in minutes between buses. It is subject to adjustment in line with future passenger numbers.

Figure 2.5 –NTA Spine Route Frequencies

- 2.15 This future network shows that the site's accessibility to bus services will be further enhanced, with a high frequency and permeable service to be provided. This route corridor, the Belfield / Blackrock to City Centre Route Design has received planning permission and is proceeding to detailed design, with an extract from the approved plans showing the site and the new Bus Stop locations included below as **Figure 2.6**.

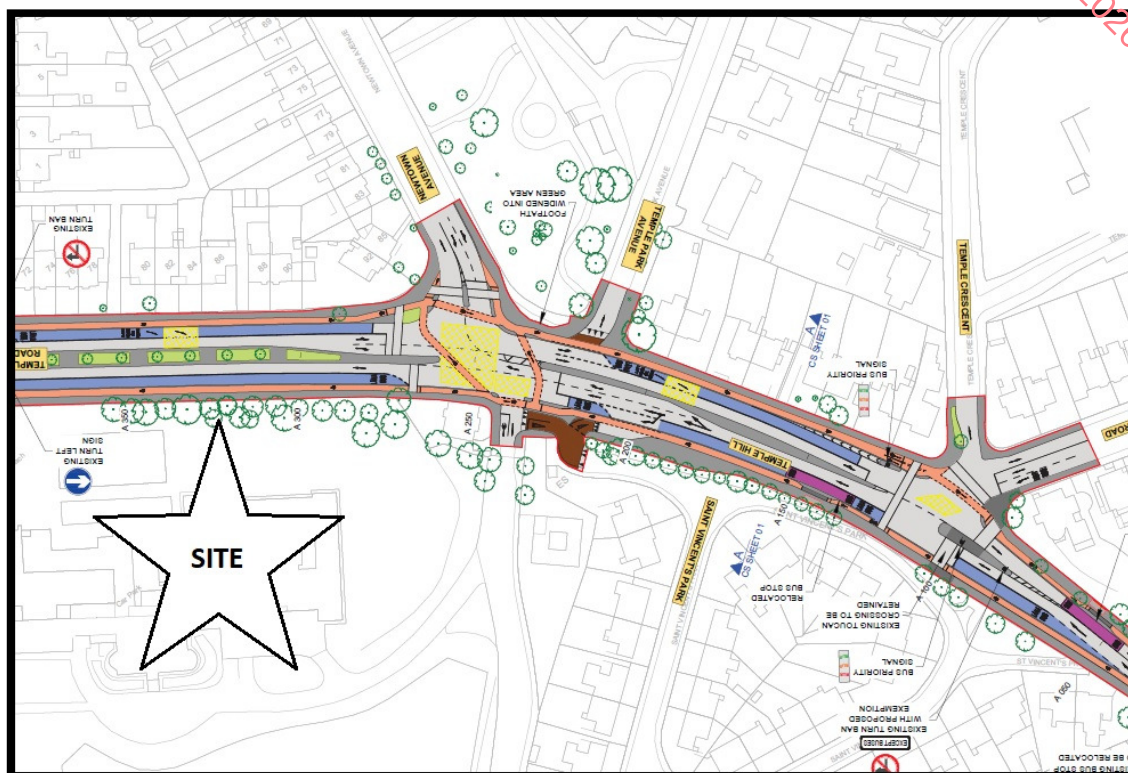

Figure 2.6 – Approved NTA Scheme Design (NTA / ARUP extract)

- 2.16 The site is therefore ideally placed in terms of future frequent bus availability, based on the NTAs published Plans.

FUTURE DART SERVICES

- 2.17 The DART & DART West projects are crucial milestones in further expanding and transforming the rail network in the Greater Dublin Area. The Government has also approved the preliminary business case for the wider DART+ Programme, which will:

- Double passenger capacity per hour to 52,000 and treble the length of the DART network to 150km;
- Facilitate sustainable mobility and transport-orientated development in the capital and surrounding counties; and
- Provide clean and green electrified rail services in line with the targets set in the Climate Action Plan.

2.18 Funded under the National Development Plan, DART & DART West and Coastal South are key to the entire programme and the approved projects will see construction of a new depot near Maynooth as well as electrification of the current Maynooth Line and upgrade of infrastructure at both Connolly and Docklands stations in the city centre, and significant upgrades on the Coastal Line serving Seapoint.

2.19 Part of the already funded plans include significant signal and crossing upgrades along the southern coastal section serving Bray, which will facilitate improved services.

2.20 In terms of **Bus Passenger Capacity**, the Dublin Bus services and a typical old-type Dublin Bus double decker bus have a capacity to accommodate ~91 passengers. However, it should be noted Dublin Bus are introducing new hybrid buses, some of which have extra capacity e.g. the new Wrightbus StreetDeck HEV 96 double-decker buses. The 44B is generally a single decker bus with a capacity for ~45 passengers.

3.0 BUS USE PREDICTIONS, CAPACITY AND DEMAND

- 3.1 We have used the 2022 CSO National Census (Local Small Area Mapping tool) to establish the proportion of Bus and DART Users within the local area surrounding the site in order to estimate the additional demand for services, utilising real data rather than simple estimations of modal split. An annotated extract from the CSO Database showing the Local Electoral Area of Blackrock is included below as **Figure 3.1**.

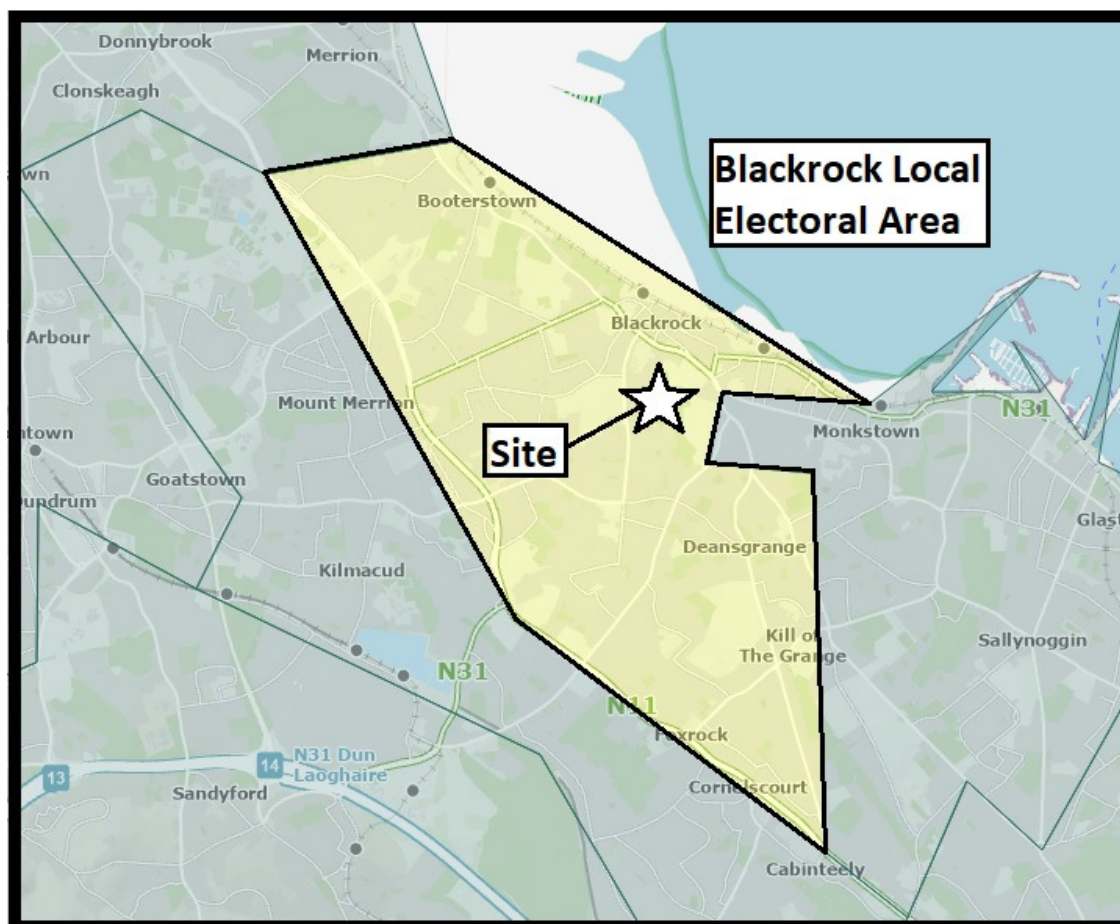

Figure 3.1 – Collated CSO Local Area Data

- 3.2 We have extracted information from the Census Data for the Electoral Area to calculate the demand for Bus & DART during the busy weekday AM Commuter period, and this is illustrated below as **Table 3.1**. The busy AM period represents the worst case demand for Buses/DART services for assessment purposes, as 'peak spreading' or staggered commuter departures occurs during the evening commuter peak, meaning that the AM Peak Hour represents the more onerous or worst case.

Table 3.1 – Bus & DART Demand Based on CSO Data & Expected Residential Numbers

Blackrock Local Elect Area	Total Population	Total Commuters Age 5+ to Work, School or College	No. of Bus Users	No. of DART Users	No. of Commuters Leaving Home 7-9am to Work/Schl or College
CSO Extract	34280	24326	3006	1595	14999
CALCULATION OF BUS & DART DEMAND DUE TO DEVELOPMENT BASED ON LOCAL CSO DATA					
Percentage of Total Population in Area Commuting =					71.0%
Percentage of Total Population in Area Commuting By Bus =					8.8%
Percentage of Total Population in Area Commuting By DART =					4.7%
Percentage of Commuters Leaving Home 7-9am =					61.7%
1150	Residents within Occupied Proposed Development, based on Bed Spaces				
101	Bus Commuters (Consistent with the Local Area Census Data)				
62	Total Additional Bus Commuters Between 7am and 9am				
54	DART Commuters (Consistent with the Local Area Census Data)				
33	Total Additional DART Commuters Between 7am and 9am				

BUS/DART CAPACITY & DEMAND

- 3.3 Based on exiting travel patterns in the locality, the above confirms that the Development will create an additional worst-case demand for approximately 62 seats on bus services between 7am and 9am. There will be an additional worst case potential demand for 54 DART seats between 7am and 9am. Of course, it is not possible to predict the commuting destination of future residents. Although it would sensibly be expected to be towards the City centre.
- 3.4 The predicted increased service demand should be considered in terms of the available capacity locally, for both Buses and DART.
- 3.5 In terms of **Buses**, the demand is illustrated in **Table 3.2** below - with c.2,184 bus seats available during the weekday AM commuter peak period, all within the perimeter roads of the subject site. There are a similar number for services and seats during the weekday PM Peak period 4pm-6pm, however demand is greater during the weekday AM Peak (due to 'peak spreading' that occurs in the evenings, with much more significant staggered departure times from work or College locations).

Table 3.2; Total Peak Demand for Bus Seats Due to Development

Details	Buses	Seats
Total Number of Buses (7-9am) All Routes	24	2184
Total Number of Buses (7-9am) Routes Via City Centre	19	1729
Total Demand for Seats Created by Proposed Development (7-9am)		62
Percentage Impact Upon Existing Services within 10min Walk (All Routes)		2.8%
Percentage Impact Upon Existing Services within 10min Walk (Routes Via City)		3.6%

3.6 The resulting increased demand for bus seats is less than 4% of the total available 7-9am seat capacity locally. This is considered negligible, and we believe it can easily be accommodated within the current service provision. This is particularly the case given that the demand for services is generally accepted to vary +/-10% due to day-of-week or weather conditions.

3.7 In terms of **DART** services, the demand associated with the development is illustrated in **Table 3.3** below & this was used to calculate the demand and impact upon services.

Table 3.3; Total Peak Demand for DART Due to Development

DART Capacity/Demand Details	No. 7-9am	People Capacity
Commuter Services Leaving Seapoint Stn 7-9am*	10	660
Total Approx People Capacity 7-9am		6600
Total Demand Created by Proposed Development		33
% Additional Demand Created		0.50%
* Based on published details of New Extended Trains introduced in 2021, with Train capacity increased by 30%		

3.8 The proposed development will therefore also create an additional demand for DART seats, equating to 0.5% of the current carrying capacity. This is also considered negligible and we believe it can easily be accommodated within the current service provision.

3.9 In terms of assessing current service capacity of Buses and DART, details of seat or space availability on any particular individual service, at any particular stop, is just not available. Service operators themselves accept cash fares, and as a result the availability of space for additional passengers cannot be accurately measured using Leap-Card software output (commercial information which is unavailable to us in any event). We therefore undertook a sample observation survey of the space availability on buses and DART Trains on Wednesday 14th & Thursday 15th May 2025. We observed occupancy at the local bus stops, together with observation of DART Train occupancy at Seapoint Station. The demand for services appeared greater on Thursday 5th May, and we have therefore used observations on the Thursday for the purposes of this assessment.

3.10 For the **Bus Services**, we observed occupancy over a one hour period on both days at Bus Stops #7660 and #3164 (between 730am to 830am). This observation survey confirmed that the buses are running with significant seat/space availability on both days, with the maximum observed occupancy being c 60 people on a double decker bus at both inbound and outbound stops surveyed (bus capacity being 91 persons). We conclude that the additional demand for Bus services created by the development can be

accommodated within the existing services, as there appears to be adequate capacity available.

- 3.11 In terms of **DART Services**, we observed Train arrivals & departures over the 2 days for a 1 hour period on each day (also 730am to 830am). During this time all waiting passengers were able to board the next available train. This would also appear to confirm that there is adequate capacity in the existing DART service to accommodate the additional demand created by the proposed residential development
- 3.12 We conclude that this additional demand for DART and Bus services can be accommodated within the existing services. In future, there are additional services to be created as part of Bus Connects as set out within Section 2.0 above, with additional further improvements to DART Services. There will also therefore be more than adequate capacity on the further improved services locally.
- 3.13 The analysis is based on 2022 CSO travel patterns, and whilst the development seeks to encourage modal shift, given the relatively small increase in predicted bus and DART demand, any possible future changes in demand due to improve modal shift (walking, cycling, increased working from home and public transport etc) will still have a small impact on bus or DART capacity here.

4.0 CONCLUSIONS

- 4.1 NRB Consulting Engineers Ltd were appointed to address the Bus & DART demand and capacity associated with a planning application for a proposed residential development on lands at Temple Hill, Monkstown, Blackrock, Co. Dublin.
- 4.2 The analysis of the existing and future Bus/DART services has been undertaken based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) 2022 Small Area Map Data, available through the CSO online mapping tool. This data was used to quantify the anticipated demand for Bus/DART as a result of the proposed development in this particular location, utilising current local modal shift patterns & statistics, based on the maximum anticipated residential population of the scheme.
- 4.3 This Report contains details of current and future Bus & DART Services and Bus & DART Capacity serving the site and the local area. The assessment confirms that the completion and full occupation of the development will result in an increased demand for Bus/DART seats, with an additional 62 Bus customers and 33 DART customers during the weekday AM Commuter Peak hours 7-9am (and less during the PM Commuter peak period). This represents a total of 3.6% of the Bus capacity and 0.5% (ie less than 1%) of DART capacity locally during this AM Period. The study also includes details of seat/space availability of existing services locally, based on an observation survey over 2 days.
- 4.4 We conclude that the additional demand for Bus/DART trips as a result of the proposed development can be accommodated on the existing and future improved services in the area without any significant effect.
- 4.5 Whilst this Report contains an assessment of current capacity, it should be remembered that service providers are commercial in nature, running their businesses based on existing demand, rather than medium to longer term future demand. If there is an increased demand for services, or indeed if there is a deficit in a service provision, Operators generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated.

Rothair ar Thraenacha Comaitéara agus DART

Tá cead rothair a thabhairt ar sheirbhísí Comaitéara agus DART idir 10:00 agus 15:30 agus tar éis 19:00 ó Luan go Aoine agus i gcaitheamh an lae Dé Sathairn agus Dé Domhnaigh.

Má tá rothar agat ar thraein Comaitéara nó DART, tabhair aird ar na níthe seo a leanas le do thoil:

- Ba chóir do chustaiméirí éirí dá rothar istigh sa stáisiún agus ar ardáin.
- Ba chóir do chustaiméirí leas a bhaint as na rampaí agus ardaitheoirí inrochtaineachta i stáisiúin seachas dul an staighre.
- Ba chóir do chustaiméirí fanacht in aice a rothair ar bord na traenach.
- Ní beidh cead ag leanbh nach mbeidh duine fásta leis rothar a thabhairt ar bord.
- Níl cead rothair leictreacha a thabhairt ar thraenacha.
- Níl cead rothair a mbeadh leantáin i bhfostú dóibh ar thraenacha.
- * Beidh srianta i bhfeidhm ar ócáidí a mbeadh imeachtaí speisialta ar siúl.

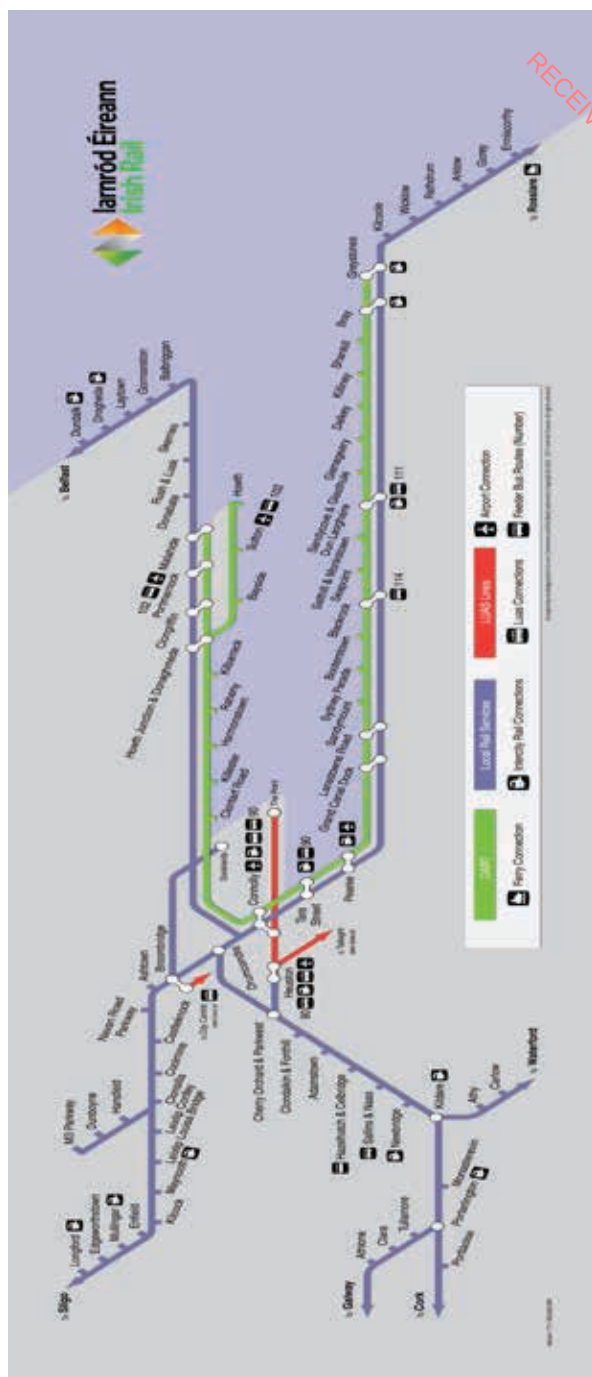

Bicycles on Commuter and DART Trains

Bicycles are allowed on Commuter and DART services between 10:00 and 15:30 and after 19:00 Monday to Friday and all day Saturday and Sunday.

If you are travelling with your bicycle on Commuter or DART trains please note the following:

- Customers should dismount from bicycles when they are in the stations and on the platforms.
- Customers should use accessibility ramps and lifts rather than stairs within stations.
- Customers should stay with their bicycles onboard trains.
- Unaccompanied children cannot bring bicycles onto trains.
- No motorised bicycles are allowed on trains.
- No bicycles with attached trailers are allowed on trains.

* Restrictions will apply on occasions of special events.

APPENDIX K

**Correspondence with NTA Regarding
Junction Form / Bus Connects**

Eoin Reynolds

Subject: FW: 07_Belfield-Blackrock - LRD Application

RECEIVED: 30/01/2026

From: Colm Kelly <Colm.Kelly@nationaltransport.ie>

Sent: 22 December 2025 09:55

To: Eoin Reynolds <eoin.reynolds@nrb.ie>; Paul Burke <paul.burke@nrb.ie>

Cc: Brian McMahon <brian.mcmahon@nrb.ie>; NRB Accounts Dept <accounts@nrb.ie>; Anthony Sheehy <Anthony.Sheehy@nationaltransport.ie>

Subject: Re: 07_Belfield-Blackrock - LRD Application

Hi Eoin and Paul,

Thank you for sending through this information.

The NTA have reviewed the previously attached drawing "*NRB - realigned St Vincents - with bus connects 28-10-25*" prepared by NRB which shows the proposed N31/ R113 junction, including the Belfield/ Blackrock to City Centre Core Bus Corridor (CBC) Scheme.

In relation to the interface between the proposed development and the Belfield/ Blackrock to City Centre CBC Scheme, the NTA are satisfied that the proposed development, as amended and indicated in the previously attached drawing, would not prejudice the delivery of the Belfield/ Blackrock to City Centre CBC Scheme. The NTA would request that the developer/ construction team would:

- Liaise with the NTA prior to commencement of construction to communicate any detailed design changes to the entrance/ exit of the proposed development; and
- Ensure that the levels along the entrance/ exit of the proposed development are co-ordinated with the Belfield/ Blackrock to City Centre CBC Scheme Design.

Kind regards,
Colm

Subject: Re: 07_Belfield-Blackrock - LRD Application

Hi Eoin,

I hope you are doing well. My name is Colm Kelly and I am part of the BusConnects Dublin Infrastructure, Transport Planning and Investments Team. Apologies for the delay in responding, as I thought this response had been sent through to you previously.

The proposed arrangement is significantly safer, as it provides a single exit lane from the proposed development and removes access via the left-turn slip lane from Temple Hill Road (Image 1 below). However, the proposed arrangement does not incorporate the protected cycle lane travelling towards Dublin City Centre, as specified in the Belfield/ Blackrock to City Centre Core Bus Corridor (CBC) Scheme (red circle in Image 2 below). We would like to see this protected cycle lane to be included in the Now-Proposed Junction Layout. I have attached to this email a CAD file, which includes the protected cycle lane.

Image 1 - Now-Proposed Junction Layout

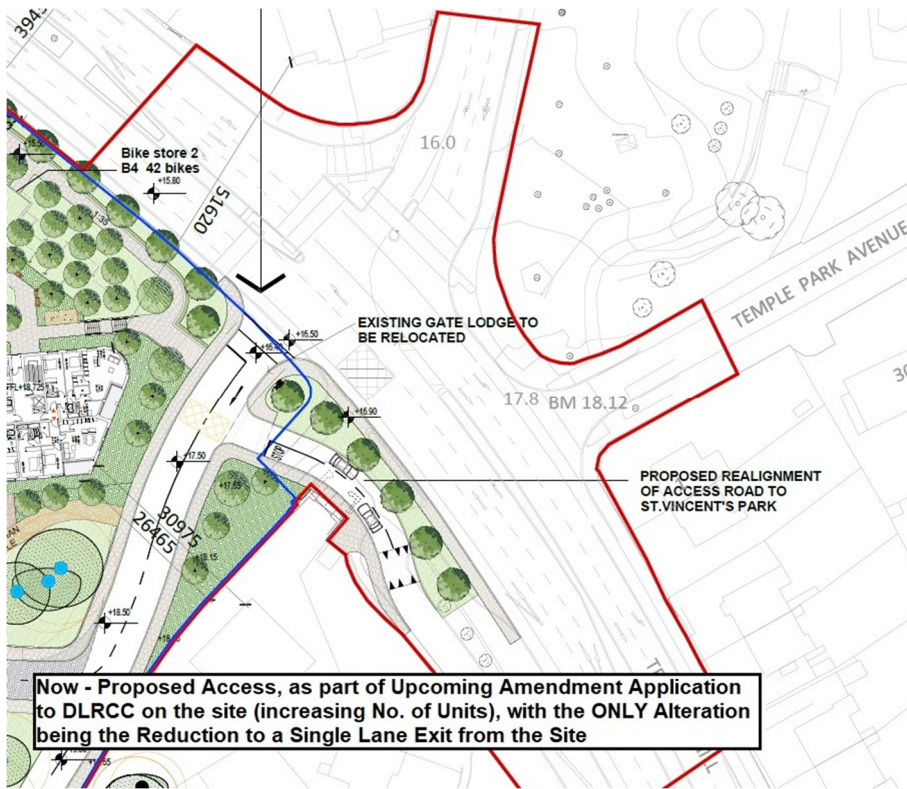

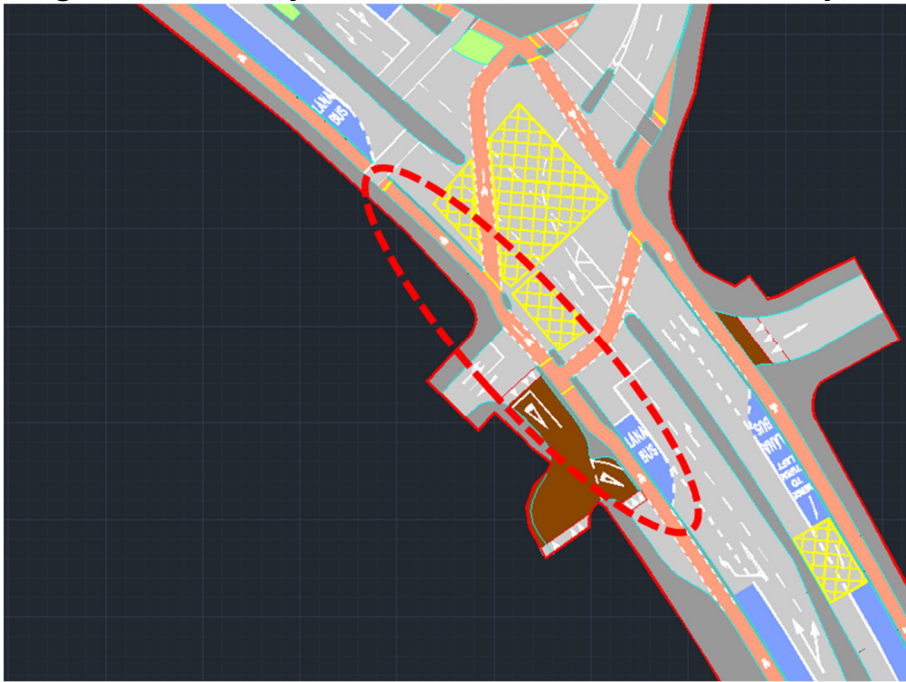

Image 2 - Protected Cycle Lane from Belfield/ Blackrock to City Centre CBC Scheme

Kind regards,
Colm

Subject: Important RE: Request for Bus Connects CAD Drawing, LRD Application

Some people who received this message don't often get email from evin.reynolds@nrb.ie. [Learn why this is important](#)

Conor

Thank you for sending on the CAD Drawing in the Trail of Emails below.

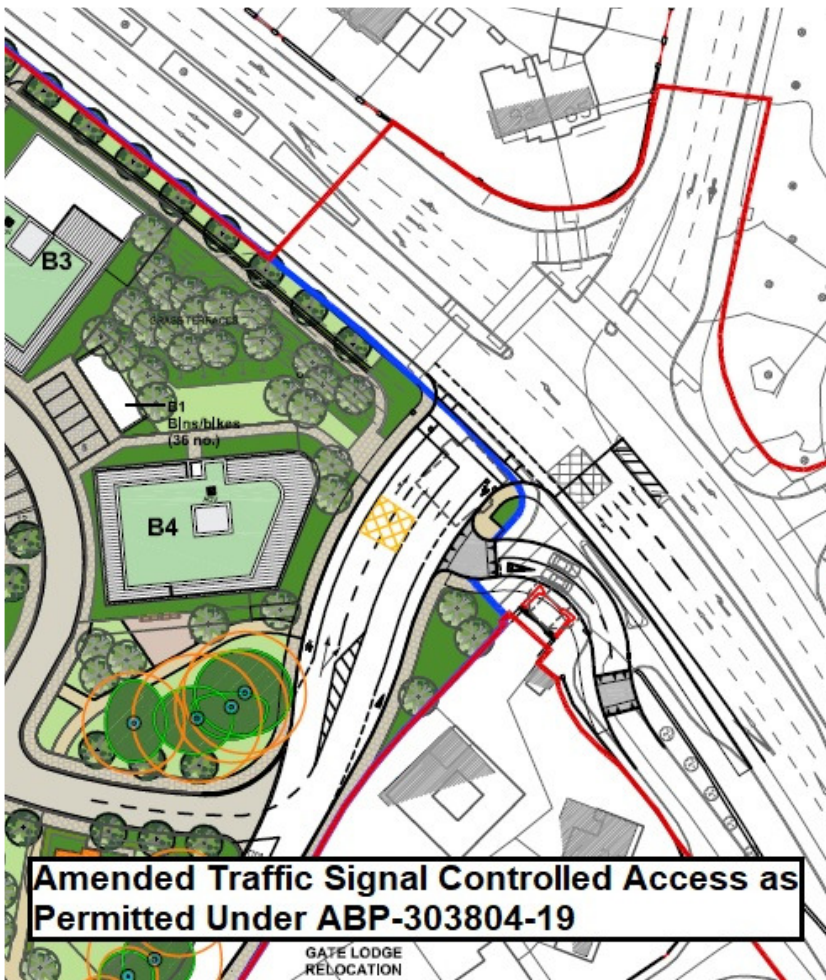

As you may be aware, there is a live planning permission on the subject site, for a significant Residential Apartment scheme, also with a permitted access arrangement (Reference ABP-303804-19, and this permission is in place for this proposal until 7 September 2029). Our client has had initial pre-planning discussions with DLRCC with a view to increasing the Number of Apartment Units.

Extract from Draft Description of Proposed Development: "The proposed development will consist of revisions to development previously permitted under SHD ABP-303804-19 (291 no. units permitted) to provide for a new residential scheme of 423 no. residential units in total (an overall uplift of 132 no. units overall)".

DLRCC requested that the approved-access arrangement be amended to reduce the footprint allowing only a single exit lane. You will appreciate that there are very significant benefits to the proposed access arrangement in terms of the NTA Approved scheme, particularly in terms of the treatment and control of traffic to/from St Vincents Park to the East. With the below layout these vehicles enter the junction to the rear of the stopline. This provides for a significantly safer arrangement.

This is an extract Image of the **Junction Layout as Permitted**:

RECEIVED: 30/01/2026

Below is an extract Image of the **Junction Layout as Now-Proposed** (following discussion with DLRCC):

We would be grateful if you could liaise with the NTA and revert with any pertinent comments.

If you have any queries, or need additional information please contact me.

Thank you.

Regards,

Eoin Reynolds

Conor

We NRB are Traffic / Transport Consultants working on a very significant Residential Development Application at St Catherines / Temple Hill in Blackrock.

Site location below in relation to the attached Bus connects Plan.

We clearly want to ensure that the Approved NTA Bus Connects Plans are reflected on our and the Architects Drawings for the submission.

Would it be possible to provide us with the Bus Connects Drawings in CAD / Dwg please?

Regards,

Eoin Reynolds

Please Note, the NRB office will be shut for 2 weeks from close of business on Friday 18th July until start of business Tuesday 5th August 2025. Emails and phone calls will not be monitored, reviewed or responded to during this time. We will get back to any queries in due course upon our return.

1.0 Introduction

This report was prepared in response to a request from Eoin Reynolds, NRB Consulting Engineers Ltd, for a Stage1 DMURS Quality Audit including a Stage 1 Road Safety Audit for a proposed large scale housing development (LRD) on lands at Temple Hill, Blackrock, Co. Dublin.

The Audit Team comprised of;

Team Leader: **Norman Bruton**, BE CEng FIEI, Cert Comp RSA.

TII Auditor Approval no. NB 168446

Team Member: **Owen O'Reilly**, B.SC. Eng Dip Struct. Eng NCEA Civil Dip Civil. Eng CEng MIEI

TII Auditor Approval no. OO1291756

The Audits involved the examination of drawings and other material provided and a site visit by both audit team members, together, on the 19th of December 2025. The weather at the time of the site visit was dry and the road surface was also dry.

The Stage 1 Road Safety Audit has been carried out in accordance with the requirements of TII Publication Number GE-STY-01024, dated May 2025.

The Quality Audit has been carried out in accordance with the guidance in the Design Manual for Urban Roads and Streets (DMURS), produced by Department of Transport Tourism and Sport in March 2013 and as updated in June 2019 including Advice Notes. The Quality Audit is composed of a number of distinct audits which include an Accessibility Audit, a Walking Audit and a Cycling Audit (i.e. aspects of a Quality Audit carried out independent of the Design Team.

Many issues raised in the Road Safety Audit would also be raised in the various aspects of the Quality Audit, however to avoid repetition items that are common to more than the Road Safety Audit have been included in a table at the start of Section 3.0 of this report.

The scheme has been examined and this report compiled in respect of the consideration of those matters that have an adverse effect on road safety. It has not been examined or verified for compliance with any other standards or criteria. The problems identified in this report are considered to require action in order to improve the safety of the scheme for road users.

If any of the recommendations within these audits are not accepted, a written response is required, stating reasons for non-acceptance. Comments made within the report under the heading of Observation are intended to be for information only. Written responses to Observations are not required.

The information supplied to the Audit Team is listed in **Appendix A**. The feedback form is contained in **Appendix B**. A plan drawing showing the problem locations is contained in **Appendix C**.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

2.0 Background

It is proposed to construct a 414 unit apartment development along with creche, small café and other ancillary works on lands at Temple Hill, Blackrock.

A previous planning on the site was granted (Planning ref ABP-303804-19) for a lower number of units (291 units). The same Audit Team carried out a Stage 1 Quality Audit on that scheme in November 2021 (Report Ref 1221R01).

The proposed development takes into account a proposed NTA BusConnects scheme which has been agreed. An extract from the design proposals is provided below. In interim layout is proposed if this scheme precedes the NTA scheme.

Access to the development will be via a widened carriageway from a realigned signalised junction (single lane entry and exit) with Temple Road and forming a cross roads junction with the N31

Temple Road is an urban dual carriageway with pedestrian and cyclist facilities, it has a speed limit of 50km/hr.

There is a left turn lane on the R113 for access to St. Vincent's Park which is a relatively small housing development (c. 30 units). It is proposed to close this left lane exists as it currently crosses the inbound cycle lane.

The Internal road layout of the proposed development consists of carriageways (including share surfaces), footpaths and parking (including basement parking) for motorists and cyclists. The internal speed limit will be 30km/hr.

It is proposed to provide pedestrian and cyclist links between the development and the adjacent Rockfield Park. The relocated gate lodge café will be serviced by vehicles parked in Dunardagh Avenue.

The upgraded access on Temple Road will also be used to access St Catherine's Provincial House and associated dwellings.

Emergency vehicle access will be provided from Temple Road at the northern end of the site.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

Car parking (244 spaces in total) and bicycle parking (962 spaces in total) will be provided at surface and basement level. A separate bicycle ramp (1:14 gradients) will be provided to the basement.

The proximity of public transport and other transport services are clearly laid out in the Traffic & Transport Assessment Report and its appendices (NRB Consulting Engineers, December 2025).

The site location is provided below.

3.0 Issues Common to More Audits than RSA

Below is a summary table of problems raised in the Road Safety Audit that would also be raised in the Quality Audit however are not repeated for clarity and brevity.

Problem Reference	Road Safety Audit	Access Audit	Walking Audit	Cycling Audit
4.1	✓	✓		
4.2	✓	✓	✓	✓

St 1 RSA & QA – Apartment Development, Blackrock**NRB**

RECEIVED: 30/01/2026

4.0 Items Raised in This Stage 1 Road Safety Audit.

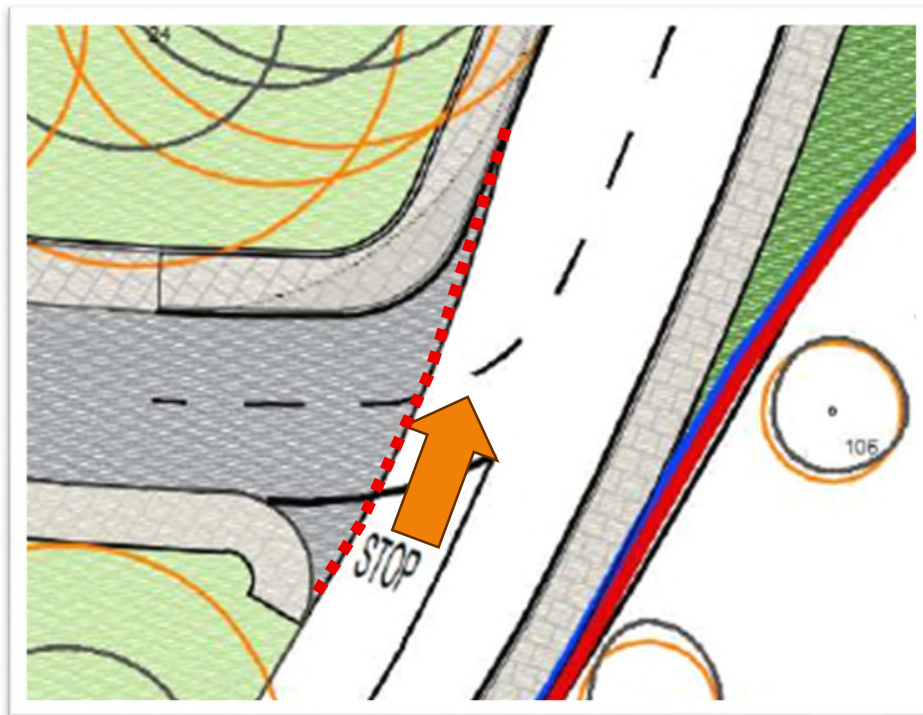

4.1 Problem

LOCATION

Drawing NRB-TA-008, Main Access Road/ Dunardagh Avenue.

PROBLEM

It is proposed that the access road into the development will become the through route and Dunardagh Avenue which will be less trafficked will become a side road with stop control. There is a risk that the priority may appear to be the opposite way given the straight ahead alignment for drivers exiting Dunardagh Avenue and the change of surfacing type along the new construction only and terminating at the edge of the access road. This could lead to overshoot of the stop line and side-impact collisions.

RECOMMENDATION

It is recommended that some traffic calming be provided on Dunardagh Avenue in advance of the junction and that the new surfacing material be extended around the curvature of the bend to give dominance to the route into the development.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

4.2 Problem

LOCATION

Drawing NRB-TA-008, Main Access Road.

PROBLEM

There is a short section of shared use pedestrian and cycle track leading to pedestrian only footpaths. There is a risk that cyclists will continue on the footpath where they may collide with pedestrians.

RECOMMENDATION

It is recommended that the shared use area be continued to a point where cyclists can transition from off-road to on-road.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

5.0 Items Raised in This Stage 1 Quality Audit – Accessibility Audit.

5.1 Issue

LOCATION

Basement.

ISSUE

It is unclear if the larger refuse bins (1100 litre) can easily be manoeuvred from the store to outside the lobby area given the tight geometry.

RECOMMENDATION

It is recommended that adequate space be provided.

5.2 Issue

LOCATION

Throughout the scheme, tactile paving.

ISSUE

It is assumed that as the design is developed that dropped kerbs and tactile paving details will be provided at crossing points and at interfaces between shared and non-shared surfaces so that adequate warning is provided for blind or visually impaired pedestrians.

St 1 RSA & QA – Apartment Development, Blackrock**NRB**

RECEIVED: 30/11/2026

*Example only***RECOMMENDATION**

It is recommended that tactile paving be provided along with fully dropped kerbs at the detailed design stage.

5.3 Problem**LOCATION**

Drawing NRB-TA-001 Rev A, Emergency access from Temple Hill.

PROBLEM

It is proposed to provide an emergency access only for the development via St Louise's Park from Temple Hill. This emergency access may also be suitable for regular use by pedestrians and cyclists and may be on a desire line for those vulnerable road users coming from Blackrock village.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

RECEIVED: 30/01/2026

RECOMMENDATION

It is recommended that a non-motorised user desire line assessment be undertaken and, if suitable provision be made for pedestrians and cyclists to enter the development via the emergency access route.

6.0 Items Raised in This Stage 1 Quality Audit – Walking Audit.

No additional items raised.

7.0 Items Raised in This Stage 1 Quality Audit – Cycling Audit.

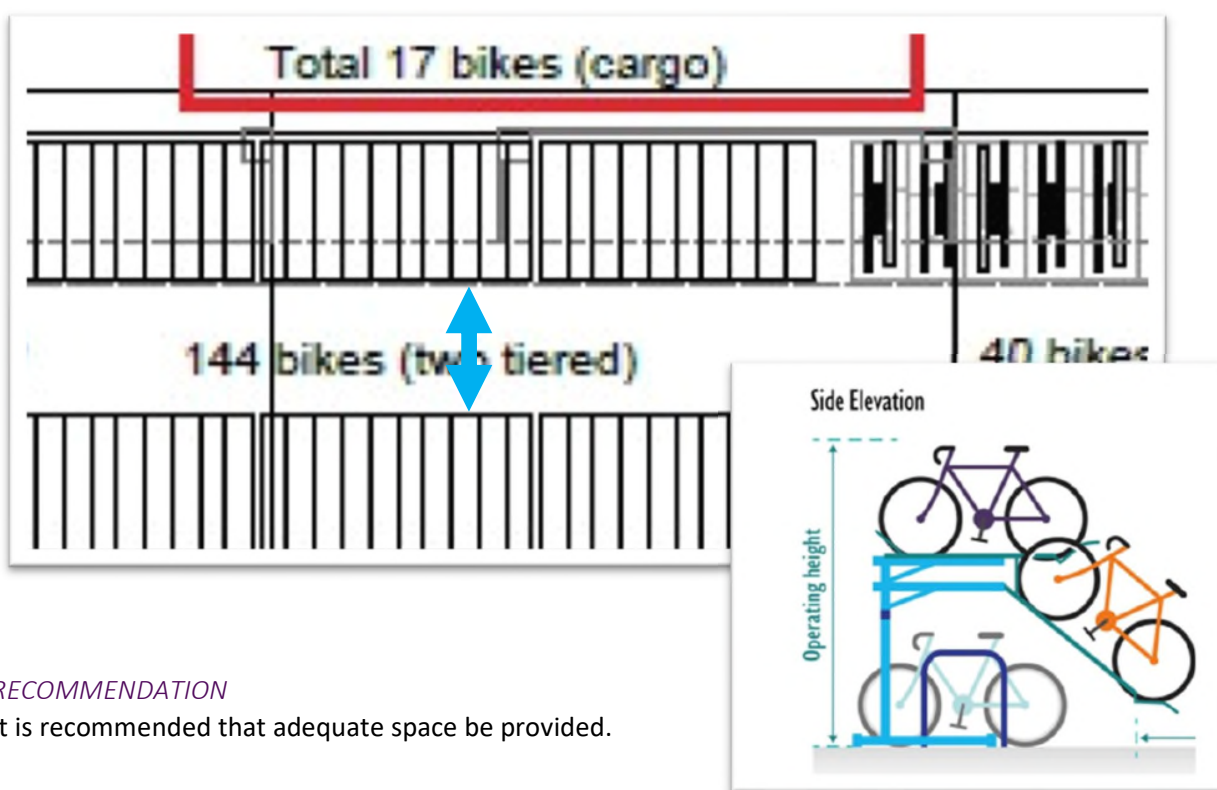

7.1 Issue

LOCATION

Basement.

ISSUE

It is unclear if there is enough spaces between the bicycle parking in the basement to facilitate the lowering of the second tier and unloading a bicycle.

RECOMMENDATION

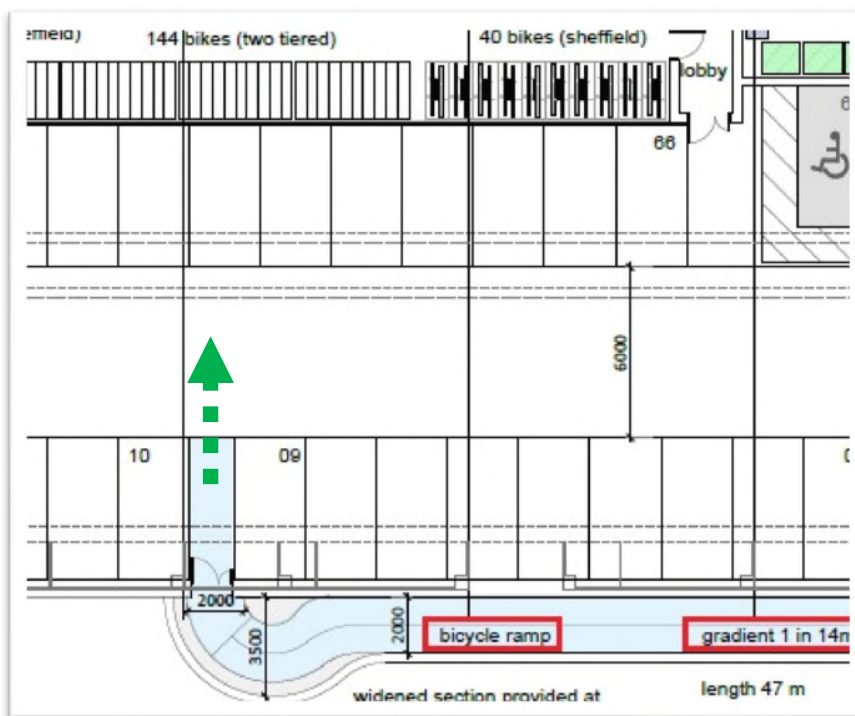

It is recommended that adequate space be provided.

St 1 RSA & QA – Apartment Development, Blackrock**NRB****7.2 Issue***LOCATION*

Basement.

ISSUE

Drivers entering the basement may not expect cyclists to emerge from between parked vehicles in car parking spaces 9 & 10. This could lead to sudden braking.

*RECOMMENDATION*

It is recommended that guidance road markings be provided for the cyclists route from the ramp to the bicycle store to alert drivers and to try and ensure that cyclists take a consistent route.

St 1 RSA & QA – Apartment Development, Blackrock

NRB

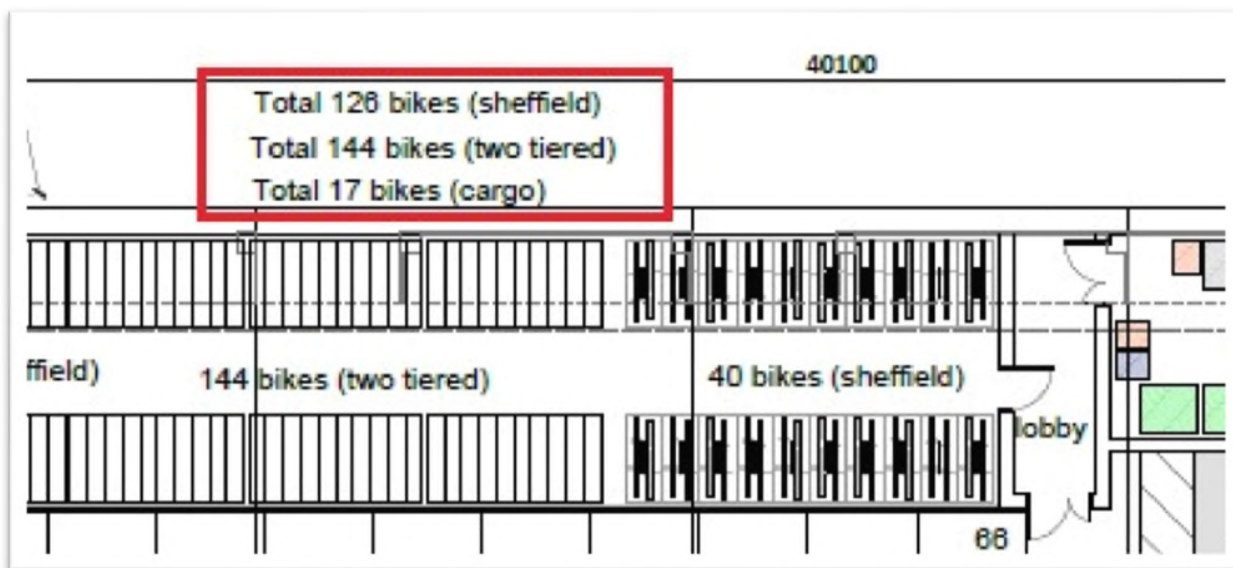

7.3 Issue

LOCATION

Basement.

ISSUE

There may not be enough space for cargo bikes to exit the basement lobby given their length and width.

RECOMMENDATION

It is recommended that adequate space be provided.

St 1 RSA & QA – Apartment Development, Blackrock**NRB****7.4 Issue***LOCATION*

Main Access Road.

ISSUE

The development proposals expect high bicycle use. There is however no cycle lane facilities along the main access road to the signalised junction. Vehicular traffic is given priority by the layout of lanes and road markings even though vehicular traffic will be relatively light.

*RECOMMENDATION*

It is recommended that cycle facilities be provided to the signalised junction to allow for connectivity with the future BusConnects scheme's cycle facilities.

8.0 Audit Statements.

Road Safety Audit Statement

We certify that we have examined the information provided and the site. The examination has been carried out with the sole purpose of identifying any features of the design which could be removed or modified in order to improve the safety of the scheme.

The problems identified have been noted in this report together with associated safety improvement suggestions which we would recommend should be studied for implementation. The audit has been carried out by the persons named below who have not been involved in any design work on this scheme as a member of the Design Team.

Quality Audit Statement

We certify that we have carried out this audit in accordance with DMURS for those areas independent of the Design team.

Problem Location Plan.

Subject: FW: Temple Blackrock RSA?
Attachments: 5.1 refuse store.pdf; 7.3 cargo bike store.pdf; 7.2 markings.pdf; Josta-aisle width.jpg; Turvec -aisle width.jpg; 7.1 bike store aisle width.pdf

Please see below responses to “Problems” 5.1, 7.1, 7.2, & 7.3

It is my understanding that some other issues can be readily addressed with amendments to landscape layout.

Text below and images attached.

5.1 Refuse bins.

1100l refuse bins are drawn 1100 mm x 1370mm .

Lobby width is 1900 mm.

400 mm clearance both sides in lobby.

Diagram shows how bins can be wheeled in / out via the lobby .

Note : all bin store and lobby doors must be shown opening outwards in the direction of escape.

A plan showing how bins can be manoeuvred through the lobby is shown in the attached pdf.

7.1 Adequate space for two-tier bike parking.

The aisle width between bike racks is 2.0 m. The overall width of the bike store is 6.32m.

There is adequate space to facilitate the lowering of the second tier and unloading a bicycle.

The two-tier and Sheffield type bike racks are drawn in accordance with manufacturers product data.

Manufacturers of two-tier bike racks, Josta and Turvec, require an aisle width of 2.0 m between bike racks.

A plan showing adequate space for two-tier bike parking is shown in the attached pdf.

7.2 Bicycle route markings

Guidance road markings will be provided for the cyclist route from the access ramp to the bike stores.

An example of such road markings is shown in the attached pdf.

7.3 Space for cargo bikes to exit the basement lobby.

The bike store identified in item 7.3 does not include any cargo bike parking spaces.

Only standard bikes are required to enter the bike store via this lobby.

A second entrance without a lobby approach is also provided to the same bike store.

Parking for 12 no. cargo bikes is located at the west end of the basement car park.

A further 5 no. cargo bike spaces are provided near the bottom of the vehicle ramp.

A plan showing cargo bike storage is shown in the attached pdf.
