

Performance Specification

- Planter constructed in painted galvanised steel of sufficient thickness and containing sufficient reinforcing and bracing to prevent visible panel distortion as a result of pressure caused by the contents.
- Cross strapping as required to resist distortion from internal forces.
- Planter manufacturer to allow for detailed site appraisal in advance of manufacturing.
- All planters need to be level in situ and in some instances a shorter / longer leg will be required on the planter to ensure the same. (This will be enclosed within the body of the planter).

DISCLAIMER
Dimensions in meters, unless otherwise stated. Heights in meters relative to NAP (Normal Amsterdam Ordinance Datum), unless otherwise stated.
All dimensions must be verified on-site. If dimensions deviate, the client and landscape architect must be notified.
OKRA drawings are design drawings and must always be further developed into engineering drawings.
The contractor must prepare working drawings prior to commencing work.
Working drawings must be submitted to the landscape architect for approval.
The contractor must prepare material samples, test areas, and/or mock-ups and submit them to the landscape architect for approval.
Execution must be based on approved drawings and materials.
OKRA assumes no responsibility for the work/constructions to be carried out.
This drawing may not be reproduced, published, or stored in an automated database, including photocopying and digital reproduction.
Written permission from OKRA is required for any form of use.

This drawing is based upon the following base drawings:
