# HERITAGE PHOTOMONTAGES

RECEIVED: 07/08/2025

Kellystown Wind Farm

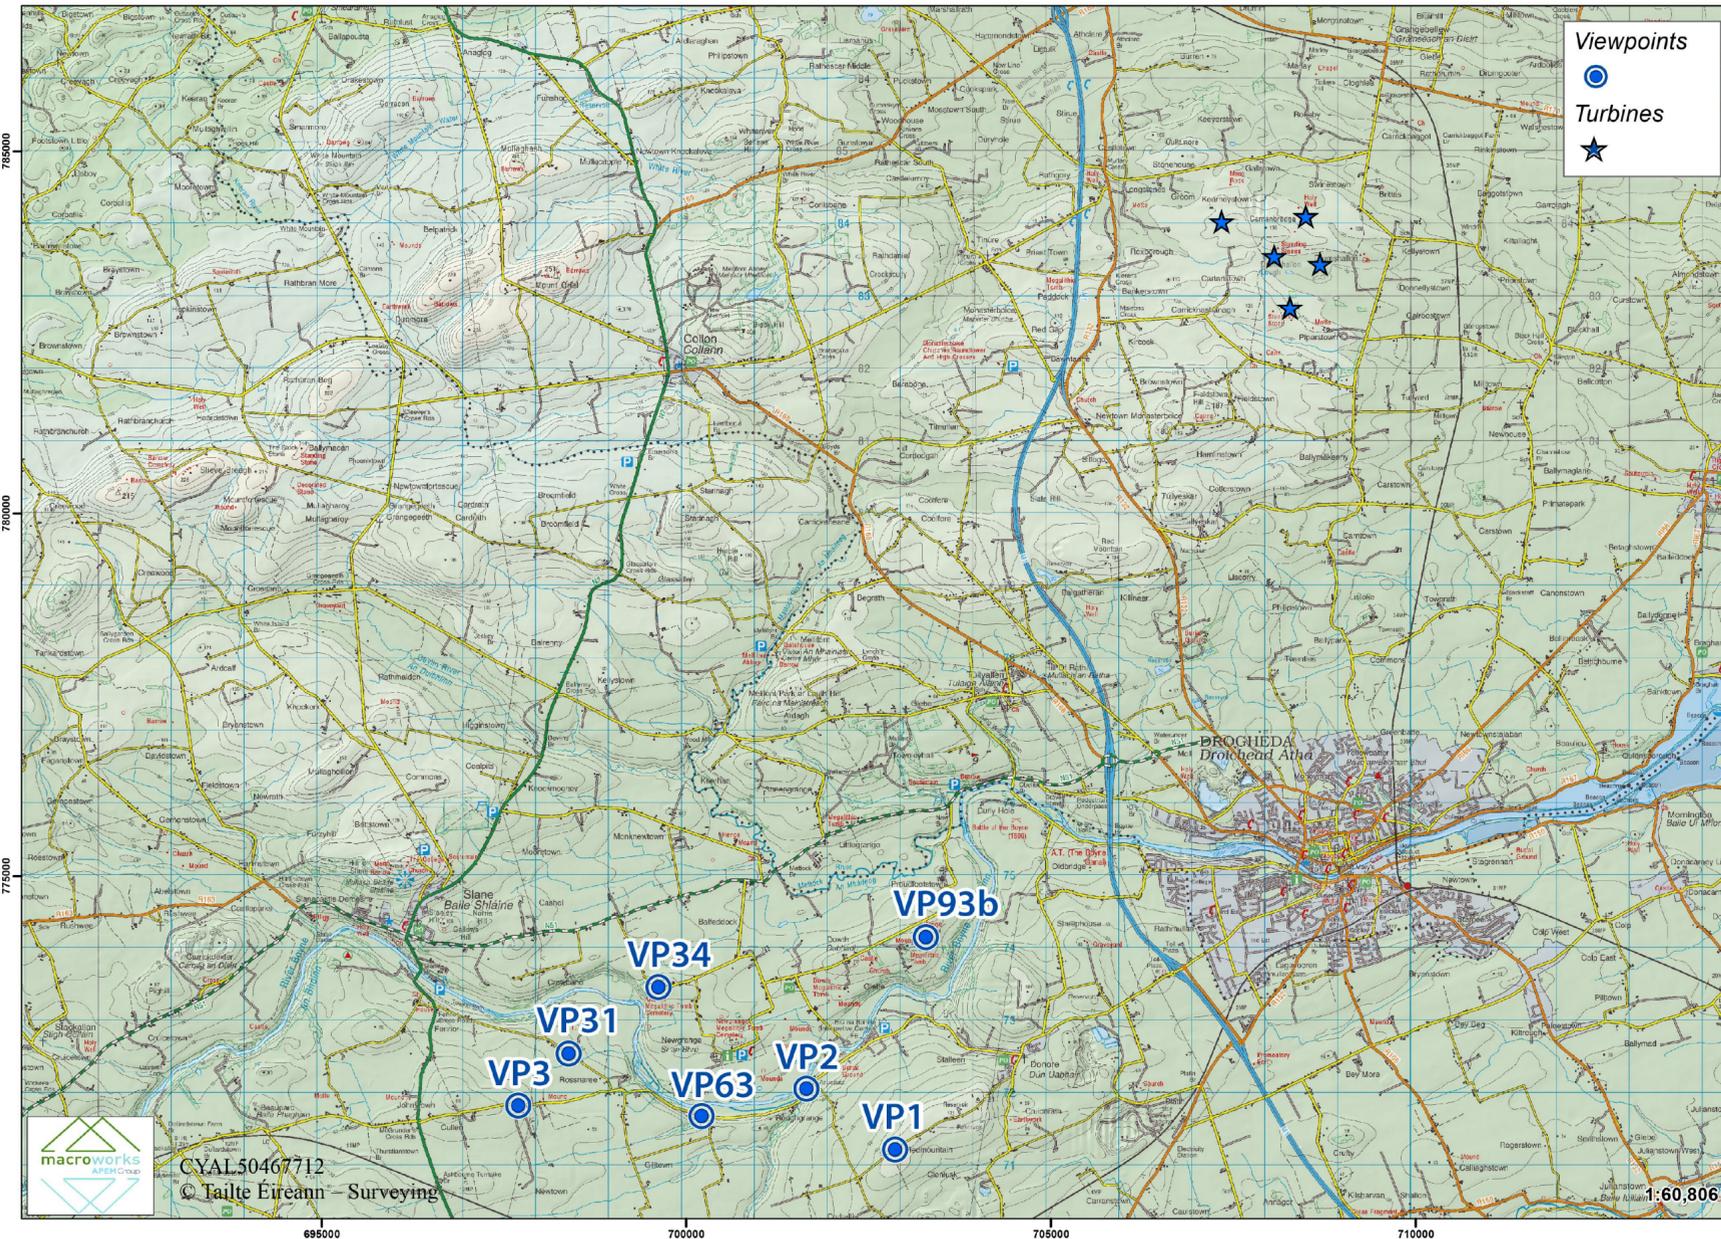

June 2025

LVIA | TVIA | Landscape Design | Visibility Analysis | Glint and Glare | Verified Photomontages | CGI | Shadow Flicker Analysis

# Index of Imagery

Heritage viewpoints selected for the Kellystown Wind Farm project

**VP1: View from Dowth Henge**

Page 1: Baseline (Contextual Wireline and Photo)  
 Page 2: Wireline  
 Page 3: Photomontage

**VP2: View from Knowth**

Page 1: Baseline (Contextual Wireline and Photo)  
 Page 2: Wireline  
 Page 3: Photomontage

**VP3: View from Rossnaree Carpark**

Page 1: Baseline (Contextual Wireline and Photo)  
 \*Please Note: The proposed wind farm is not visible from this viewpoint as it is completely screened by existing vegetation and/ or terrain

**Meath CDP VP31: View N from footpath along Boyne Canal, Roughgrange**

Page 1: Baseline (Contextual Wireline and Photo)  
 \*Please Note: The proposed wind farm is not visible from this viewpoint as it is completely screened by existing vegetation and/ or terrain

**Meath CDP VP34: View NE N2 between Slane and Balrath at McGruder's Cross Roads**

Page 1: Baseline (Contextual Wireline and Photo)  
 Page 2: Wireline  
 Page 3: Photomontage

**Meath CDP VP63: View N county road between Donore and Redmountain**

Page 1: Baseline (Contextual Wireline and Photo)  
 \*Please Note: The proposed wind farm is not visible from this viewpoint as it is completely screened by existing vegetation and/ or terrain

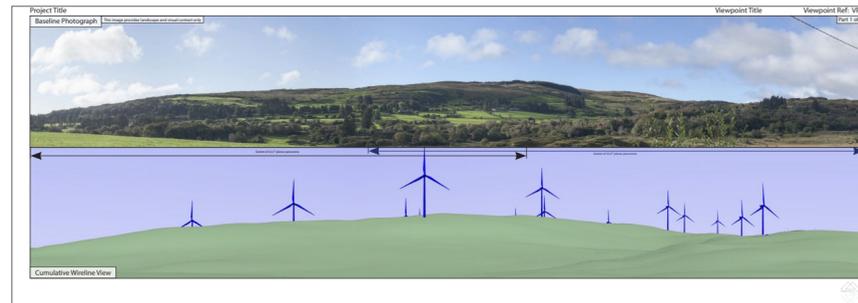

**Meath CDP VP93b: View E Local Road L16002 0.7km west of Rossnaree**

Page 1: Baseline (Contextual Wireline and Photo)  
 \*Please Note: The proposed wind farm is not visible from this viewpoint as it is completely screened by existing vegetation and/ or terrain

How photomontages are presented for each viewpoint

Sheet 1: 90° Baseline panorama and matching wireline

What is Displayed

90° Baseline Panorama Photograph and matching Cumulative Wireline (Cylindrical Projection - to be viewed curved):

The top image depicts a 90° (included angle) Baseline panorama generated from captured photography.

The bottom image depicts a 90° (included angle) matching computer generated wireline. This image includes the proposed wind farm development and includes other cumulative wind farm developments (existing and/or permitted wind farm developments in the public domain and projects in the planning system pending a decision from a planning authority).

Extent bars indicate the extent of the 53.5° Panoramic Photomontage/Wireline Views within the depicted 90° Baseline views.

Information relating to the viewpoint, proposed development and photography capture are included.

A small thumbnail map is included which indicates the location of the viewpoint and the direction and extent of the depicted view.

A coloured legend referencing turbines are also included to help distinguish the proposed turbines from the other cumulative turbines.

Rationale

As required by the SNH guidelines, the purpose of the baseline panorama and wireline is to provide wider landscape and visual context to help the viewer understand where development sits within the wider landscape. The wireline also illustrates cumulative effects and provides the viewer with the full cumulative context. The baseline panorama is not intended to represent how large or small the turbines will appear in reality or how close they will appear to the viewer.

Sheet 2 (provided where necessary): Contextual Panoramic Photomontage View (120° - 180°)

Contextual Panoramic Photomontage View (ranging from 120° to 180°) (Cylindrical Projection - to be viewed curved):

The image demonstrates a contextual panoramic photomontage view (ranging from 120° to 180° included angle) which is generated from captured photography. It includes the proposed wind farm development and includes only other existing cumulative wind farm developments.

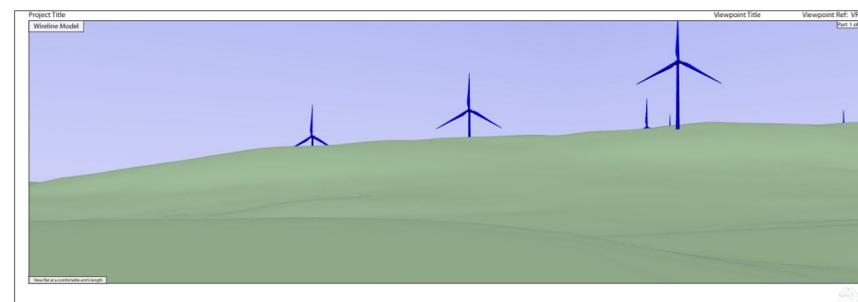

Extent bars indicate the extent of both the 53.5° Panoramic Photomontage/Wireline Views and the 90° Baseline Views within the depicted Contextual Panoramic Photomontage View.

Information relating to the viewpoint, proposed development and photography capture are included.

A small thumbnail map is included which indicates the location of the viewpoint and the direction and extent of the depicted view.

An additional page not required by the guidelines, this contextual photomontage view is included to give a broader context to the viewer. It is generally included where there are multiple 90° and 53.5° views, which are required by the guidelines for a particular viewpoint.

Sheet 3: 53.5° Wireline View

53.5° Wireline View (Planar Projection - to be viewed flat)

This image shows a 53.5° (included angle) Wireline View which matches the 53.5° Panoramic Photomontage View. It includes the proposed wind farm development and includes other cumulative wind farm developments (existing and/or permitted wind farm developments in the public domain and projects in the planning system pending a decision from a planning authority).

Wirelines are computer-generated images which depict the 'bare ground' terrain along with the proposed wind farm development and other cumulative wind farms developments within the depicted view. They are generated in GIS (Geographic Information System) mapping software based from a DTM (Digital Terrain Model).

Information relating to the viewpoint, proposed development and photography capture are included.

A small thumbnail map is included which indicates the location of the viewpoint and the direction and extent of the depicted view.

A coloured legend referencing turbines are also included to help distinguish the proposed turbines from the other cumulative turbines.

As required by the SNH guidelines, the A1 wireline is intended to provide the best impression of the apparent size of the turbines and the distance to the development from the viewpoint location.

It illustrates the 'bare ground' visibility and a provide a clear view of the wind farm to inform the assessment. **Only images at this scale, held at a comfortable arms length, should be used when trying to understand the size of the development and its distance from the viewpoint.**

Sheet 4: 53.5° Panoramic Photomontage View

53.5° Panoramic Photomontage View (Planar Projection - to be viewed flat):

This image demonstrates a 53.5° (included angle) photomontage generated from captured photography.

It includes the proposed wind farm development and includes only other existing cumulative wind farm developments.

Information relating to the viewpoint, proposed development and photography capture are included.

A small thumbnail map is included which indicates the location of the viewpoint and the direction and extent of the depicted view.

As required by the SNH guidelines, the A1 panorama is intended to provide the best impression of the apparent size of the turbines and the distance to the development from the viewpoint location. **Only images at this scale, held at a comfortable arms length, should be used when trying to understand the size of the development and its distance from the viewpoint.**

Part 1 of 1

RECEIVED: 07/08/2025

Cumulative Wireline View

Extent of 53.5° planar panorama

This cylindrical projection panorama has been captured, prepared and presented in accordance with the guidance set out in the Scottish Natural Heritage 2017 guidance 'Visual Representation of Wind Farms'.

- Proposed Turbines
- Existing Turbines
- Permitted Turbines

National Grid Coordinate (ITM)  
 Easting: 702863  
 Northing: 771226  
 Elevation: 112.1 m

Horizontal Field of View: 90 ° (cylindrical projection)  
 Principal Distance: 522 mm  
 Turbine Tip Height: 180m  
 Turbine Hub Height: 102.5m  
 Turbine Rotor Diameter: 155m

Date and Time: 2025/05/19 07:50  
 Camera: Canon 5D Mark II  
 Lens: Fixed 50mm  
 Camera Height: 1.7m (AGL)

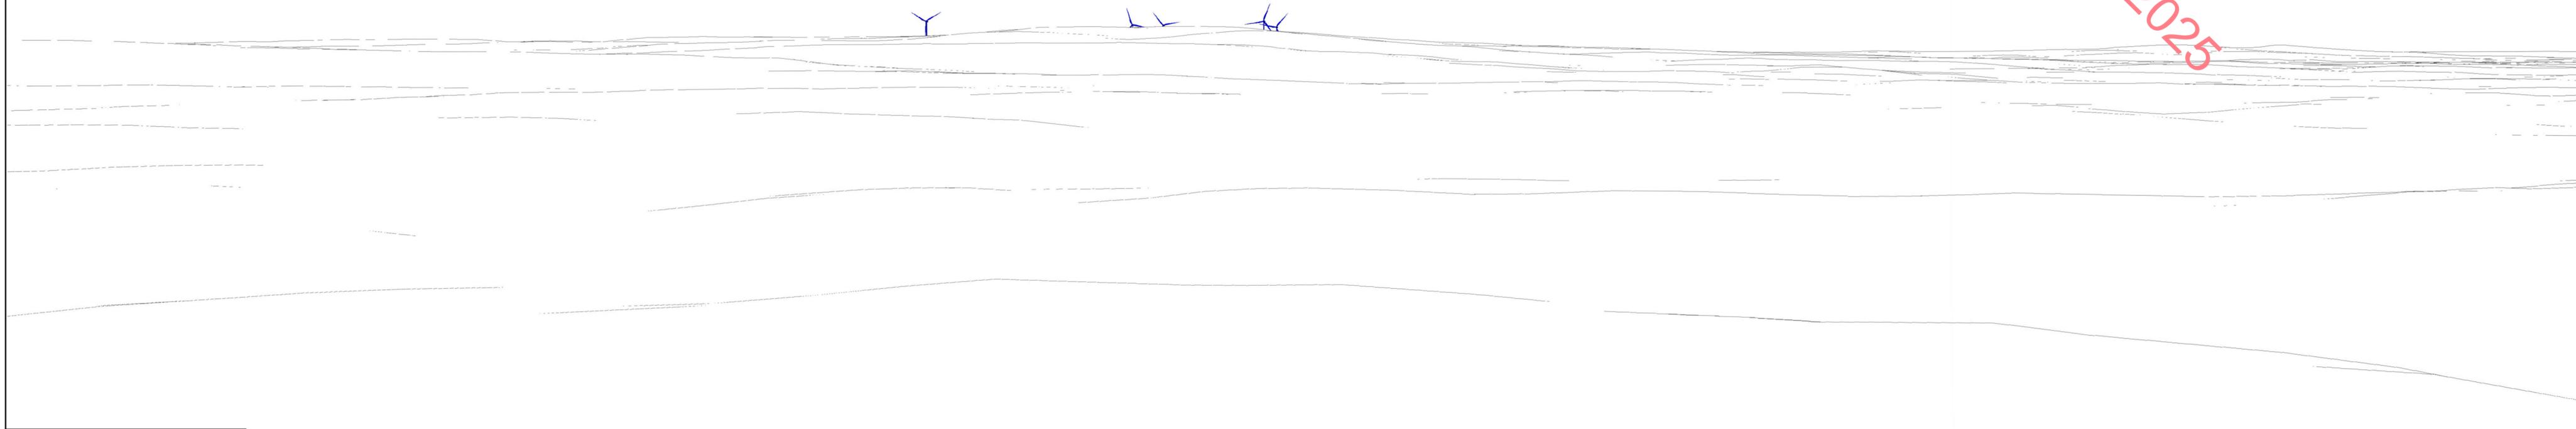

Direction (clockwise from Grid N): 31 °  
 Distance to Nearest Visible Turbine: 10 km  
 Nearest Turbine: T5

Wireline Model

View flat at a comfortable arm's length

This planar projection panoramic model has been prepared and presented in accordance with the guidance set out in the Scottish Natural Heritage 2017 guidance 'Visual Representation of Wind Farms'.

- Proposed Turbines
- Existing Turbines
- Permitted Turbines

National Grid Coordinate (ITM)  
 Easting: 702863  
 Northing: 771226  
 Elevation: 112.1 m

Horizontal Field of View: 53.5 ° (planar projection)  
 Principal Distance: 812.5 mm  
 Paper size: (half A1) 841 x 297 mm  
 Correct printed image size: 820 x 260 mm

Date and Time: 2025/05/19 07:50  
 Camera: Canon 5D Mark II  
 Lens: Fixed 50mm  
 Camera Height: 1.7m (AGL)

Direction (clockwise from Grid N): 31 °  
 Distance to Nearest Visible Turbine: 10 km  
 Nearest Turbine: T5
